HUMAN MILK FORTIFIER, **ENFAMIL (Mead Johnson)** **USE:** A milk-based medical food (Nutritional) for breastfed premature or LBW infants with high calorie and protein needs. When mixed with mother's milk, increases the amount of protein, energy, calcium, phosphorus, and other nutrients. Iron-fortified. Gluten-free. Per 4 packets: 14 kcals, 1.1 g pro, 1 g fat, <.4 g CHO, 1.44 mg iron Vitamins: A - 950 IU, D - 150 IU, E - 4.6 IU, K - 4.4 mcg, C – 12 mg, B1 - 150mcg, B2 - 220mcg, B6 - 115 mcg, B12 - .18mcg, niacin – 3 mg, folacin - 25mcg, pantothenic acid .73 mg, biotin 2.7mcg Minerals: 90 mg calcium, 50 mg phosphorus, 1 mg magnesium, 1.44 mg iron, .72 mg zinc, 10 mcg manganese, 44 mcg copper, 16 mg sodium, 29 mg potassium, 13 mg chloride Osmolality: 35 mOsm/kg Note: To be added to breast milk for premature and low-birth-weight infants (not designed for term infants). Generally use full-strength until baby reaches approximately 2500 g (5.5 lb) body weight and half-strength from 2500-8400 g body weight, or until 9 months corrected age. Babies <1000 g (2.2 lb) body weight on full feedings of Enfamil(R) Human Milk Fortifier should be monitored for high blood calcium levels. No additional vitamin/mineral supplements should be given unless recommended by a healthcare professional. If more than 25 packets are used daily, the infant should be monitored for evidence of excessive vitamin A and D intake. Preterm breast milk collected <2 weeks postpartum is rich in nutrients, so use of Enfamil Human Milk Fortifier is generally not required. **CAUTION:** For use only under strict medical supervision. Not intended as a sole source of nutrition. Do not add fortifier to breast milk in a ratio greater than 1 packet per 25 ml breast milk (no greater than 24 kcals/oz). Do not administer other nutrient supplements in addition to fortifier unless medical tests indicate a need for further supplementation.	**Not Idaho WIC Approved.** (Product should be appropriately prescribed for short-term use only. Infant needs to be followed closely, preferably by a RD that is also a CLE).	.025 oz (0.71 g) packet powder 100 packets/case Breastmilk = 20 kcals/oz Standard dilution: 1 packet of powder added to - 50 ml human milk adds 2 kcals/oz (Final dilution of 22 kcals/oz) - 25 ml human milk adds 4 kcal/oz (Final dilution of 24 kcals/oz)	**Protein** (32% kcals) (60% whey, 40% casein) - Milk protein isolate, whey protein isolate hydrosylate **Fat** (63% kcals) -MCT, soybean oil **CHO** (5% kcals) - Corn syrup solids

MSUD AID III(Nutricia North America) **USE:** An isoleucine-, leucine- and valine-free medical food (Nutritional) for individuals over the age of 1 year with Maple Syrup Urine Disease. Must be consumed in conjunction with natural protein, fluid and other nutrients. Does not contain fat, allowing for flexibility in modifying energy intake. Flavorless. Per 100 g: 326 kcals, 77 g pro, 0 g fat, 4.5 g CHO, 25 mg Iron **CAUTION:** Must only be used under strict medical supervision. Not intended for use as the sole source of nutrition. Not recommended for infants under 1 year of age. Not for parenteral use. Not suitable for metabolic disorders other than MSUD or as a supplement for individuals who do not have MSUD.	**Approved with Medical Documentation form.**	(500 g) can powder 4 cans/case Reconstituted amount unavailable. Intake dependent on age, body weight and medical condition. Follow Rx as directed by physician.	**Protein** (96% kcals) - Amino acids (without isoleucine, leucine and valine) **Fat** (0% kcals) **CHO** (4% kcals) - Hydrolyzed cornstarch
MSUD ANAMIX Infant (Nutricia North America) **(Previously MSUD ANAMIX INFANT EARLY YEARS)** **USE:** An isoleucine-, leucine and valine-free infant formula for infants 0-12 months and as a supplementary feed up to three (3) years of age with maple syrup urine disease (MSUD). Contains a balanced mixture of all other essential and non-essential amino acids, CHO, vitamins, minerals and trace elements. Contains DHA, ARA. Prebiotics.Iron fortified. Unflavored. Contains milk, soy, coconut. Per 100 g: 457 kcals, 13.1 g pro, 23 g fat, 49.5 g CHO, 8.1 mg iron Osmolality (at 21 kcal/fl oz): 380 mOsm/kg **CAUTION:** Must only be given to children with proven maple syrup urine disease under strict medical supervision. Not intended as a sole source of nutrition. Not for parenteral use. Must be consumed in conjunction with a whole protein source (e.g. breast milk or standard infant formula) in quantities prescribed by a dietitian or physician to meet the general nutrition requirements to ensure normal growth and development.	**Approved with Medical Documentation form.**	14.1 oz (400 g) can powder 6 cans/case Recommened dilution = 21kcals/oz: 1 scoop (5 g) powder to every 1 fl oz water Reconstituted amount 90.1 fl oz Intake dependent on age, body weight and medical condition. Follow Rx as directed by physician	**Protein** - Amino acids (without isoleucine, leucine and valine) **Fat** - Refined vegetable oil(High oleic sunflower,soy, non-hydrogenated coconut, canola, sunflower) **CHO** - Corn syrup solids

Product	WIC Issuance	Size	Nutrient Source
MSUD LOPHLEX LQ (Nutricia North America) **USE:** An isoleucine-, leucine and valine-free medical food (Nutritional) for children (4+) and adults with maple syrup urine disease (MSUD). Contains a balanced mixture of all other essential and non-essential amino acids, CHO, vitamins, minerals and DHA. No artificial flavors. Per pouch (4.2 fl oz): 120 kcals, 20 g pro, 0.44 g fat, 8.8 g CHO, 5.3 mg iron Osmolality: 2460 mOsm/kg Flavors: Juicy berries **CAUTION:** Must only be given to children with proven maple syrup urine disease under strict medical supervision. Not intended as a sole source of nutrition. Not for parenteral use.	**Approved with Medical Documentation form.**	4.2 fl oz (125 ml) pouch 30 pouches/case Reconstituted amount unavailable. Intake dependent on age, body weight and medical condition. Follow Rx as directed by physician	**Protein** (67% kcals) - Amino acids (without isoleucine, leucine and valine) **Fat** (< 1% kcals) - DHA (C.Cohnii oil) **CHO** (31% kcals) - Corn syrup solids, sucralose, fruit, juice from concentrate (apple, grape, blackcurrant, elderberry)
MSUD MAXAMAID (Nutricia North America) **USE:** An isoleucine-, leucine and valine-free medical food (Nutritional) for toddlers and young children with maple syrup urine disease (MSUD). Contains a balanced mixture of all other essential and non-essential amino acids, CHO, vitamins, minerals and trace elements. Does not contain fat, allowing for flexibility in modifying energy intake. Per 100 g: 309 kcals, 25 g pro, <0.5 g fat, 51 g CHO, 12mg iron Osmolality: Dilution 1 to 7 - 680 mOsm/kg Dilution 1 to 5 - 940 mOsm/kg Flavors: unflavored **CAUTION:** Must only be given to children with proven maple syrup urine disease under strict medical supervision. Not intended as a sole source of nutrition. Not for parenteral use.	**Approved with Medical Documentation form.**	16 oz (500 g) can powder 6 cans/case Recommended dilution (1 to 7) is 100 g powder to 700 ml fluid. 1 Tbsp powder = 9 g Reconstituted amount unavailable. Intake dependent on age, body weight and medical condition. Follow Rx as directed by physician	**Protein** (31% kcals) - Amino acids (without isoleucine, leucine and valine) **Fat** (< 1% kcals) - Negligible **CHO** (69% kcals) - Sugar, corn syrup solids
