Welcome to the Idaho Early Learning eGuidelines!

For those who care for and teach young children, the *Idaho Early Learning eGuidelines* is a resource designed to assist in guiding children’s development and learning. The *Idaho Early Learning eGuidelines* is a foundational resource document that will be produced and utilized in several different ways:

- A relatively comprehensive foundational document, the purpose and function of the *Idaho Early Learning eGuidelines* is to provide detailed guidelines and strategies for early childhood development. It is a comprehensive piece designed to guide adult practice and policy making for young children.
- A series of collateral products will be generated to meet the needs of specific users; including parents, child caregivers, child care educators, and more.
- The *Idaho Early Learning eGuidelines* are an electronic resource, allowing any user to access the broadest to the most specific information available in that user’s area of interest. This electronic format links to important resources, research, and supplemental information enabling opportunities for efficient editing and additions as new information becomes available.

Adapted from the products of a number of states, national experts, and professional organizations, a representative group of Idaho educators and professionals generated the *Idaho Early Learning eGuidelines* utilizing the latest research in early childhood development. Idahoans and national experts revised and refined the product to meet the unique needs and concerns of children, parents, and stakeholders in our state. We wish to acknowledge the work of Washington State, Alaska, and other states for providing foundation material for the *Idaho Early Learning eGuidelines*; as well as the guidance and support of the National Child Care Information Center.

The following sections outline the background, principles, and framework for the *Idaho Early Learning eGuidelines*. This information will aid your understanding of why the eGuidelines were created and how to use them.

Carolyn Kiefer, Idaho Department of Health and Welfare - Head Start Collaboration
Marybeth Wells, Idaho State Department of Education
A child’s earliest years, from birth to age five, are an extraordinary period of growth and development. Infants begin life totally dependent on adults, and over time, develop into young children with abilities to communicate with others and explore the world around them. Human development is so amazingly complex during these years that some have called this period the “magic years” (Selma Fraiberg).

Central to the growth and development of each child is the family – regardless of what that family structure looks like. The term “parent” is used here to include birth parents, adoptive parents, foster parents, and other adults who serve as the primary caregiver to young children. In many Idaho communities; grandparents, aunts, and uncles play a role in raising children and are included as a parent in this context. All learning takes place in the context of the child’s relationships with their parents and environment.

While parents are primarily responsible for nurturing and educating children, there are many people and resources available to support parents and their children during these critical early years. Parents receive support as nurturers from family and community members, friends, community programs, medical professionals, teachers, and child care providers.

Fundamental to this support system is the recognition that each child develops individually. Each child has unique individual characteristics and situations.

Over fifty (50) percent of young children in Idaho spend at least part of the day in the care of someone other than their parents.

With the Idaho Early Learning eGuidelines to assist caregivers, a shared understanding and consistency can be generated throughout a child’s environment.
INTRODUCTION

Each child has unique characteristics embedded in the context of family, culture, and community. Idaho Early Learning eGuidelines acknowledge and embrace the diversity and variation that exists among young children. Diversity includes socioeconomic, cultural, racial, linguistic, ethnic, gender, abilities, family composition, and regional variations.

The Idaho Early Learning eGuidelines are not grounded in any single theoretical perspective or in any single cultural context. They are based on research from various theoretical perspectives, and are specifically intended to acknowledge and accommodate cultural differences. The eGuidelines include goals for young children’s development that reflect the perspectives, values, and recommended practices of a diverse range of people, institutions, and communities throughout Idaho.

The eGuidelines emphasize that young children’s learning is individual, interconnected, and multi-dimensional. Young children develop at individual rates physically, socially, emotionally, linguistically, and cognitively. All dimensions of development are critical to healthy development.

Parents are part of a child’s cultural fabric. Effective teachers are familiar with the different cultures of the children they serve, especially those cultures that differ from their own. Recognizing that development and learning are influenced by social and cultural contexts sensitizes teachers to acknowledge how their own cultural experience shapes their perspective. Early childhood teachers can understand the influence of sociocultural contexts on learning, recognize children’s developing competence, and accept a variety of ways for children to express their developmental achievements.

Children are capable of learning to function in more than one cultural context simultaneously. The goal is that all children learn to function well in the society as a whole and move comfortably among groups of people who come from both similar and dissimilar backgrounds.

CULTURE is defined as the customary beliefs and patterns of and for behavior, both explicit and implicit, which are passed on to future generations by the society they live in and/or by a social, religious, or ethnic group within it. Because culture is often discussed in the context of diversity or multiculturalism, people fail to recognize the powerful role that culture plays in influencing the development of all children.

The eGuidelines are specifically intended to accommodate, support, and build upon individual family characteristics and cultural heritage. Efforts were made to acknowledge the learning needs of children with developmental delays and disabilities, and children who have a home language other than English.

Embracing the right of every child to learn, grow, and play with children their own age in community settings, these eGuidelines endorse natural and least restrictive environments for all young children. The definition of “children with special needs” includes those who are medically fragile, delayed in one or more developmental domains, have a known medical condition that may lead to a delay, and/or a disability. Concerns about a child’s development may warrant a screening by a physician or early childhood educator. If the screening shows concern, refer the child for a developmental evaluation/assessment.

SCOPE

Families, early childhood education and programs, the community, and policy makers share responsibility for all children’s development. The Idaho Early Learning eGuidelines underscore shared responsibility and shared accountability for development in terms of both learning opportunities and outcomes for children.

The eGuidelines are arranged by “domains” that organize the broad sweep of child development theory, research, and practice. The five developmental and learning domains include:

Domain 1: Approaches to Learning and Cognitive Development*
Domain 2: Physical Well-Being, Health, and Motor Development

Domain 3: Social and Emotional Development

Domain 4: General Knowledge

Domain 5: Communication, Language, and Literacy.

* Domain 1 addresses aspects of development that permeate all domains. All five domains are interdependent.

**PURPOSE AND USE**

This foundational document is designed as a resource to support the growth and development of young children from birth through third grade. The information in the document applies regardless of the setting: children’s own homes, others’ homes, child care programs, early intervention programs, Head Start programs; or in private, faith-based, or public schools.

Some people will work from the resource document itself, while others will use collateral products to inform their specific inquiry and interest. The *Idaho Early Learning eGuidelines* are intended to:

- **Inform** and **Guide** adult practices in working with young children.
- **Describe** typical milestones about the child’s development process.
- **Develop** a common, research-based guide that describes the development of young children from birth to five.
- **Provide** social and emotional developmental characteristics and approaches to learning materials that supplement Idaho Content Standards for children K-3.
- **Integrate** early learning guidelines as a component to the larger system of services including quality initiatives, professional development, personnel preparation; and curriculum for higher education, professional development, vocational education, and pre-service training.
- **Empower** Idaho’s families to enrich childhood.
- **Help** adults understand, nurture, support, and teach young children during the critical years of birth to five.

Within each domain, the *Idaho Early Learning eGuidelines* present a set of goals, developmental growth, and child indicators that reflect how young children develop at different stages in their lives.

Age divisions are intended only as a means by which to capture the discussion about development, and are not intended to be absolute. The overlap in ages, as indicated in the table below, is a deliberate acknowledgement of variations in child development.

**Idaho’s Early Learning eGuidelines are grouped by Domains that are divided by ages, and then described by Goals, Developmental Growth, Child Indicators, and Caregiver Strategies.**

**Organization**

Each domain is categorized by age ranges. Each domain may be further divided by sub-domain. For each domain or sub-domain, the *Idaho Early Learning eGuidelines* provide the following:

- Goal statement,
- Age Range,
- Developmental Growth,
- Child Indicators that describe what parents and others might observe about the child's development respective to that task,
- Caregiver Strategies to stimulate development related to that goal.
## Domain 1: Approaches to Learning and Cognitive Development

### Sub-Domain: Learning Approaches

#### Curiosity, Motivation, Exploration, and Experimentation

**Goal 1:** Children show curiosity and interest in learning and experimenting.

<table>

</table>
  - Shows interest in people by kicking legs, smiling, reaching, and looking at the person.  
  - Reacts to new voices or sounds by turning in the direction of sound, becoming more quiet or active, or changing facial expressions. |  
  - Create a safe, secure, and attractive environment for children to explore toys, books, and caregiver.  
  - Respond to and initiate play with the child during the course of everyday routines (diaper changing, bathing).  
  - Observe child to understand unique temperament, learning styles, and ways of showing curiosity.  
  - Introduce child to new people, places, objects, and experiences.  
  - In group child care settings, establish a primary caregiver to create a trusting relationship from which the child can explore. |
ACKNOWLEDGEMENTS AND GRATITUDE

In addition to the Idaho professionals of the Interagency Work Group who gave generously of their time and knowledge to develop the content of the Idaho Early Learning eGuidelines, there were a cadre of colleagues who contributed to the direction, form, and review of this eDocument. We wish to acknowledge their contributions.

The metaphor of a child was used many times for this project. Just like new parents, we knew this project would be a lot of work . . . but until we were well committed, we did not fully realize the full scope of what it would entail. Development of the Idaho Early Learning eGuidelines took us through a variety of stages; times of integration and disintegration. In addition, we faced difficult choices, challenges, uncertainties, and successes. The Work Group and the following people constitute the extended family or, if you will, “the proverbial village” that supported the development of the Idaho Early Learning eGuidelines.

Marsha Bracke, Facilitator, whose skills and clarity continue to move us through this challenging project. We would have been lost without her thoughtful help.

Gene Sue Weppner, Idaho Child Care Administrator, whose support was greatly appreciated as she provided access to the rich resources of the National Child Care Information Center (NCCIC).

Janice Fletcher, Ph.D., a member of the Interagency Work Group whose final professional edits for theoretical and content accuracy, consistent depth of content, and unified voice are invaluable. Janice helped us resolve many thorny issues.

Dawn Larzelier, Administrative Assistant, performed a myriad of essential tasks; bringing with her an abundance of computer skills and patience.

Luis Calas, State Department of Education, designed the logo.

NATIONAL RESOURCES

Lori Connors-Tadros, Ph.D., NCCIC, brought the national perspective and understandings of other states’ experiences to get us started and give us perspective.

Joe Varano, NCCIC Region X TA, contributed articles and much needed information.

Billie Young, NCCIC Region X TA, a resource and reviewer who got us started on the evaluation component.

IDAHO CONTENT CONSULTANTS

Alice Anderson, College of Southern Idaho, contributed extra work on Domain 2.

Shelly Counsell, Ph.D., recreated Domain 4 after all the content vanished twice into a computer “black hole”.

Julie Wall, Ph.D., provided content for 6-8 year olds in Domain 1.

Susan Nelson, Infant Toddler Program – Region 2, developed the initial ELG applications for ITP.

IDAHO REVIEWERS

Mary Bostick, Ph.D., University of Idaho Center for Disabilities and Human Development, reviewed early special education content and sensitivity.

Julie Fodor, PhD., University of Idaho Center for Disabilities and Human Development, performed content review.

IDAHO HEAD START TECHNICAL ASSISTANCE TEAM

Melissa Bandy, Zero to Three, performed careful content edits of all Domains.

Sandra De Angelo, TA Team Leader, reviewed content and the team’s work to create the crosswalk between the ELG and the Head Start Child Outcome Framework.
Anita Hoag, TA Team, brought focus on special education and the Head Start crosswalk.

**Electronic Format**

Dan Ross and Dene Sue Ross, *Write Way, Inc.*, designed and built the electronic architecture and turned this huge mass of information into a web-based tool.

**National Reviewers**

Linda Gillespie, Zero to Three, Washington D.C., served as an advisor and thoughtful editor for the birth through three content, especially in Domains 1 and 3.

Oxana Golden, The After School Project, (NCCIC), performed content review for 6-8 year olds.

Debra Drake and Rudy Anderson, TAC-12, National Migrant and Seasonal Head Start Technical Assistance, provided helpful review of second language acquisition and cultural sensitivity.

Elaine Shea, Head Start American Indian Alaska Native Technical Assistance, provided review and comments for cultural sensitivity.

We also wish to express our deep gratitude to the many members of the Idaho early childhood community who encouraged, questioned, suggested, and supported the development of this foundational eDocument. You are the colleagues who will put this tool to work and help us develop supplemental materials, and make corrections and additions. Most importantly, we hope that you will use this document to support healthy, rich, and happy childhoods for young children!

Carolyn, Mary, Larraine and Marybeth

Children are active learners who learn through play.

Play is fundamental to a child’s learning. Children learn through experiences and relationships with the people and objects in their world. Experience through play, shared knowledge, curiosity, and sense of wonder are foundations for children’s learning.

Each child learns in unique ways.

Children have unique characteristics that influence learning. The rate of development and learning varies for individuals and is not the same for every child of the same age. Learning may be uneven or occur in spurts. An individual’s learning is impacted by genetics, culture, environment and experiences, interests, motivation, and approaches to learning.

Children receive learning opportunities that support their unique needs in inclusive environments.

All children, who are both typically and atypically developing are supported with opportunities to grow and learn in inclusive settings in child care, school, and community activities.

Learning is most meaningful when it is integrated across all areas of development.

Children construct knowledge and integrate new ideas and concepts into their existing understanding. Their achievements in language and learning are influenced by the social and emotional aspects of their development. Communication influences mathematical and scientific understanding. There are no clear lines between the domains of development or areas of learning.

Learning is continuous and sequential.

Children’s understanding grows from simple to complex and from concrete to abstract. New knowledge is built on previous experience and understanding. Young children learn best in safe, content-rich environments with supportive adults. Successful programs, teachers, and caregivers base decisions and plans on accepted child development principles, research, and best practices to support and enhance children’s growth.

Development and learning are rooted in culture and supported by the family.

A child’s language, knowledge, traditions, and family expectations are the primary influences on development. Learning is enriched by stable, nurturing relationships within the family and community.

Parents want their children to be happy and part of their community.

Early learning is the groundwork for learning from age five through the high school years and adult, life-long education. Early learning opportunities are best when children are healthy, well nourished, and safe. Engaged, healthy, and happy children are ready to explore through listening, watching, smelling, touching, and tasting.

Children are supported by the greater community.

Children are regarded and respected as unique, competent individuals who have individual temperaments, learning styles, home environments, cultures, and ways of understanding. Families' and children’s health and well-being is a community priority. The community supports children’s growth with high quality early learning and development opportunities.
ESSENTIAL PRACTICES

To value learning styles and to embrace children’s rich diversity of predispositions, attitudes, habits, and cultural patterns the following strategies are helpful for all children from birth to school entry. These examples of strategies reflect learning opportunities and experiences to support children’s individual needs:

HEALTH AND SAFETY

- Ensure that children are provided with caregivers who interact in consistent and caring ways.
- Provide adult supervision and guidance for children’s health and safety.
- Promote trust, security, and exploration through nurturing relationships and safe, consistent, and stimulating environments.
- Seek medical or developmental expertise if concerned about a child’s learning and development.
- Gain access to comprehensive health care (Medical Home) including preventive medical and dental check-ups, mental health, immunizations, and care for acute and chronic health problems.
- Be aware of risk factors and signs of child abuse and neglect, and the responsibilities for reporting incidences.
- Have access to nutritious foods and feeding strategies that promote children’s optimal health and development.

INTERACTION AND ACTIVITIES

- Engage and play with children; supporting and encouraging their exploration.
- Provide multiple strategies to include the senses (sight, hearing, touch, smell, and taste).
- Engage children in open-ended activities for learning including play around dramatic themes, artistic creations, and sensory play. Encourage children to expand and elaborate their experiences.
- Use supportive verbal, visual, and physical cues in interactions and activities.
- Immerse children in language and print-rich environments.
- If the child needs extra support, simplify complicated tasks by breaking them into smaller parts or reducing the number of steps.
- Encourage child to play and form relationships with other children.

CULTURAL CONTEXT

- Observe, recognize, and support children’s unique ways of approaching new information and expressing themselves; taking into consideration their temperaments, inclinations, and attitudes.
- Provide a range of experiences to all children even though their responses may differ and some children may need adaptations.
- Strive for an environment that respects all people and is free of bias.
- Individualize experiences, activities, interactions, and instructions to meet the needs of each child.
- Take time to learn about children’s everyday experiences at home and in their community. Incorporate traditional (or long-standing) effective strategies used by children’s home cultures to support learning and development.
- Provide continued acknowledgements in ways that reflect children’s cultural beliefs and traditions so that all children feel valued. Support a sense of competence.
- Incorporate teaching and learning strategies from children’s cultural background (e.g., use culturally and linguistically appropriate song games, stories, changes, music, dance, and movement; and culturally specific knowledge in coordination
with cognitive development.

**PROBLEM-SOLVING SKILLS**

- Help children learn to accept, understand, and manage their emotions.
- Model and teach conflict resolution and problem-solving skills.

**FAMILY SUPPORT**

- Build strong relationships with and among families, teachers, caregivers, and community programs.

BACKGROUND
INTRODUCTION
GUIDING PRINCIPLES
ESSENTIAL PRACTICES
CONTACTS FOR ASSISTANCE
eCONTENTS

DOMAIN 1: APPROACHES TO LEARNING AND COGNITIVE DEVELOPMENT

INTRODUCTION

SUB-DOMAIN: LEARNING APPROACHES

Goal 1: Children show curiosity and interest in learning and experimenting.

Goal 2: Children are able to generate new ideas, approaches, and activities in daily routines.

Goal 3: Children are confident to initiate and complete activities using a variety of approaches.

Goal 4: Children sustain attention to tasks even when faced with challenges and frustration.

Goal 5: Children demonstrate an expanding ability to develop and carry out plans.

Goal 6: Children show ability to change or adapt thought processes, applying previously learned concepts and skills to new situations.

Goal 7: Mediated by individual temperament, children learn to understand and appreciate individual style in approaching and interacting with the world.

SUB-DOMAIN: COGNITION AND COGNITIVE PROCESSES

Goal 8: Children demonstrate awareness of cause and effect relationships.

Goal 9: Children use prior relationships, experiences, and knowledge to expand understanding.

Goal 10: Children show emerging ability to imitate behaviors that they have observed.

Goal 11: Children find multiple solutions to questions, tasks, problems, and challenges, including trial and error.

Goal 12: Children expand abilities for conjecture, hypothesizing, and guessing.

Goal 13: Children compare, contrast, and evaluate experiences, tasks, and events building on prior knowledge.

Goal 14: Children participate in exploratory play.

Goal 15: Children participate in pretend or symbolic play.

Goal 16: Children represent experiences and thought through symbolic representation such as movement, drawing, singing/vocalizing, and play.

DOMAIN 2: PHYSICAL WELL-BEING, HEALTH, AND MOTOR DEVELOPMENT

INTRODUCTION

SUB-DOMAIN: MOTOR DEVELOPMENT

Goal 17: Children demonstrate strength and coordination of large motor muscles.
Goal 18: Children demonstrate strength and coordination of small motor muscles.

Goal 19: Children use their senses (sight, hearing, smell, taste, and touch) to guide and integrate their interactions.

**Sub-Domain: Physical Development**

Goal 20: Children demonstrate the stamina and energy to participate in daily activities.

Goal 21: Children engage in a variety of physical activities.

**Sub-Domain: Health and Personal Care**

Goal 22: Children practice basic personal care routines.

Goal 23: Children demonstrate personal health and hygiene skills.

**Sub-Domain: Nutrition and Feeding**

Goal 24: Children eat a variety of nutritious foods.

**Sub-Domain: Safety**

Goal 25: Children demonstrate knowledge about and avoid harmful objects and situations.

Goal 26: Children demonstrate awareness and understanding of safety rules.

**Domain 3: Social and Emotional Development**

**Introduction**

**Sub-Domain: Social Development**

Goal 27: Children trust, interact with, and seek assistance from adults.

Goal 28: Children develop friendships with peers.

Goal 29: Children demonstrate positive negotiation skills.

Goal 30: Children demonstrate awareness of behavior and its effects on others.

Goal 31: Children participate positively in group activities.

Goal 32: Children demonstrate sympathy and empathy.

Goal 33: Children develop a sense of humor.

Goal 34: Children adapt to diverse settings.

Goal 35: Children recognize, appreciate, and respect similarities and differences in people.

**Sub-Domain: Emotional Development**

Goal 36: Children perceive themselves as unique individuals.

Goal 37: Children demonstrate belief in their abilities.

Goal 38: Children regulate their feelings and impulses.

**Domain 4: General Knowledge**

**Introduction**

**Sub-Domain: Mathematics and Numeracy**

Goal 39: Children demonstrate understanding of numbers, ways of representing numbers, relationships among numbers, and number systems.
Goal 40: Children demonstrate understanding of measurable attributes of objects and the units, systems, and processes of measurement (including size, volume, height, weight, length, area, and time).

Goal 41: Children demonstrate understanding of patterns, relations, and functions used to organize their world and facilitate problem solving.

Sub-Domain: Science

Goal 42: Children observe, describe, and collect information by exploring the world around them.

Goal 43: Children further engage in exploring and making sense of the natural world by asking questions and making predictions about cause and effect relations that can lead to generalizations.

Sub-Domain: Social Studies

Goal 44: Children differentiate between people, places, activities, and events in the past and present that relate to self, group identity, and a sense of their community.

Goal 45: Children demonstrate awareness and understanding of individual fairness, group rights, and responsibilities (democratic ideals) for membership and participation in group activities (successful citizenship).

Sub-Domain: Creative Arts

Goal 46: Children use creative arts to express and represent what they know, think, believe, or feel.

Goal 47: Children demonstrate understanding and appreciation of creative arts.

Domain 5: Communication, Language, and Literacy

Introduction

Sub-Domain: Communication

Goal 48: Children demonstrate the meaning of language by listening.

Goal 49: Children communicate effectively.

Goal 50: Children comprehend and use conventions of social communication.

Sub-Domain: Language

Goal 51: Children use receptive vocabulary.

Goal 52: Children use expressive vocabulary.

Goal 53: Children demonstrate progression in grammar and syntax.

Goal 54: Children demonstrate comprehension and meaning in language.

Goal 55: Children use language for a variety of purposes.

Sub-Domain: Literacy

Goal 56: Children develop phonological awareness.

Goal 57: Children demonstrate awareness of letters and symbols.

Goal 58: Children demonstrate awareness of print concepts.

Goal 59: Children demonstrate comprehension of printed materials and oral stories.

Goal 60: Children demonstrate awareness that written materials can be used for a variety of purposes.

Goal 61: Children demonstrate knowledge and use of letters and symbols.
Goal 62: Children use writing skills and demonstrate knowledge of writing conventions.

Goal 63: Children use writing for a variety of purposes.

**Sub-Domain: English Language Learners**

Goal 64: Children demonstrate competency in home language while acquiring beginning proficiency in English.
INTRODUCTION

The Approaches to Learning and Cognitive Development domain covers the inclinations, dispositions, attitudes, habits, and styles that reflect the diverse ways that children learn. This domain is not about what skills children acquire, but how they construct meaning and how children orient themselves to learning.

The developers of the Idaho Early Learning eGuidelines chose to link approaches to learning with cognitive development. Compelling research in cognitive psychology and brain development are expanding our understanding about “how” and “when” the complexities of thinking and learning develop. The focus moves beyond looking at the development of brain structures and functions and encompasses the growth of the mind. The adult work is to support children in this process of active self-organization that creates new knowledge and understanding from everyday experiences.

This domain spans development from birth through third grade. The Idaho K-12 Standards do not address approaches to learning and cognition. The ripple of cognitive development from birth through age eight is notable. Developmental learning and skills are essential to understanding children’s growth. The goals of Domains 1 and 3 were requested and needed by special education professionals to address needs and plan services.

RATIONALE

Approaches to learning and cognitive development are the platform on which learning takes place and include attributes which predispose children toward success in school and in life. Acknowledging children’s capacity to figure out a problem, apply their skills, and make larger meanings as their cognitive skills develop is foundational to a child’s continuing growth in approaching learning. By nurturing and supporting children’s individual approaches to learning, adults help children use their current knowledge and understanding of their world as a basis for creating meaningful new experiences and ideas.

GENERAL DEFINITION

Children’s approaches to learning include motivation, attitudes, habits, and cognitive styles that are demonstrated as they engage in learning and respond to different situations. Even though the ways in which children express their approaches to learning may vary according to their temperament or cultural contexts, the following goals are essential for children’s success in school and in life. For the purposes of the Idaho Early Learning eGuidelines, Domain 1: Approaches to Learning and Cognitive Development include:

- **Curiosity and Interest** indicate children’s sense of inquisitiveness, interest in pursuing new information, keenness for new knowledge, and desire to learn.

- **Initiative** indicates children’s willingness to take on tasks, volunteer to participate in learning activities, and take reasonable risks in learning new information.

- **Persistence and Attentiveness** indicate children’s ability to stay with and concentrate attention to complete a task without being distracted or frustrated. Sometimes persistence is demonstrated by leaving a project and returning later for more work or elaboration.

- **Creativity and Invention** indicate children’s ability to extend existing knowledge; and to have a “great idea” and make it happen.

- **Reflection and Interpretation** indicate children’s ability to absorb, think about, compare, question, and understand knowledge and information to inform future actions and learning.

- **Concept Formation** indicates children’s ability to imitate and remember people, carry out routines, and categorize information and objects from prior experience.

- **Reasoning and Logic** indicates children’s growing skills to create and analyze attributes (similarities, differences, and associations between objects, events and people). These goals include causation, critical and analytical thinking, and problem solving.

- **Representational Thought and Play** indicates children’s ability to explore actions and sensory experiences. Functional play is exploring objects or materials in the absence of fantasy, and includes sensory play (sand/water) and physical
exploration. Pretending is a complex form of intellectual activity and a critical element in symbolic thinking and the symbolization process. In pretend play, children take on roles, have objects that are not present, and use things as substitutes for real objects. Through symbolic play and maturation, children come to distinguish between fantasy and reality, without losing either. Play is both the means and manifestation of children's growing understanding of the world and their roles within their culture.

**Supporting Individual Differences, Language, and Cultural Diversity**

A discussion about Domain 1: **Approaches to Learning and Cognitive Development** acknowledges that children learn and express themselves in different ways. Skilled caregivers appreciate and value the diversity of children, families, and cultures; and strive to observe, understand, and support each child as an individual. Some children look and watch; seeming to figure out the situation before they move to engage. Other children may have great tactile sensitivity and use touch to explore or alternately to hold back from new sensations. Parents and caregivers can create supportive environments in which children are allowed to take risks and try new ideas, and in which creative processes of learning and expressing self are nurtured and valued. Caregivers who use children’s current knowledge and understanding of their world to build on that knowledge, help children create meaning from new experiences, relationships, and concepts. Children with differing abilities, with developmental delays or who are at risk for developmental delays, or with special talents may require particular attention and perhaps adaptations to foster their engagement in learning.

Children are exposed to cultural patterns and values in their immediate context of family as well as in the neighborhood, community, and environment at large. At the family level, differences in child-rearing practices, including parental behaviors of instruction, modeling, and responses to children’s initiatives influence children’s learning approaches. Culture may influence children’s work styles, the way they approach and interpret experiences, and their orientation to action or reflection. Some cultures encourage children to obey and defer to adult opinions while other cultures encourage children to question and negotiate with adults. Cultural patterns also influence the way children learn. For example, some cultural settings promote learning through hands-on manipulation of materials, while others focus on visual representation, and still others focus on oral traditions of storytelling or more structured interactions. Whatever the cultural influence on children’s predispositions, learning styles can be embraced as equal, valued, and respected as a child approaches learning.
GOAL 1: CHILDREN SHOW CURIOISITY AND INTEREST IN LEARNING AND EXPERIMENTING.

Domain 1: Approaches to Learning and Cognitive Development
Sub-Domain: Learning Approaches

Birth through 8 Months
6 to 18 Months
16 to 38 Months
36 to 60 Months
60 Months through Kindergarten
First, Second, and Third Grades
### Goal 1: Children show curiosity and interest in learning and experimenting.

</table>
| 16 to 38 Months | Display curiosity with deliberate exploration and experimentation with people and objects. | ▪ Explores immediate environment (asks about a new object, actively searches through a collection of toys).  
▪ Shows interest in new activities and others’ activities.  
▪ Asks simple “wh” questions (why, who, what, where, and when).  
▪ Asks about people in their own environment.  
▪ Turns objects around, upside down, and inside out to examine the characteristics of the object.  
▪ Opens, closes, fills, empties, and builds up and knocks down objects and containers. | ▪ Make child’s surroundings safe and inviting to encourage exploration.  
▪ To increase interest, provide child with a variety of safe objects/toys that can be used in multiple ways.  
▪ Interact with child by asking simple questions and responding to his/her questions.  
▪ Wonder aloud with child about why, who, what, when, and where.  
▪ Describe and talk about what you see around you.  
▪ Read and tell stories that introduce the child to many people, places, and cultures.  
▪ Offer a variety of materials and activities that match child’s exploration style (a child who is slow to warm may respond best to an activity that allows play at the edge of the group, a blind child may explore best with materials that have a variety of textures).  
▪ Offer sensory play to include water and sand toys. |
## Domain 1: Approaches to Learning and Cognitive Development

### Sub-Domain: Learning Approaches

### Curiosity, Motivation, Exploration, and Experimentation

</table>
| 36 to 60 Months | Become inquisitive; seeking understanding and gaining descriptive vocabulary to seek understanding. | - Asks others for information (e.g., “What is that?” “Why is the moon round?”).  
- Investigates and experiments with materials; matching, sorting, and grouping.  
- Shows interest in how and why others do things.  
- Uses “wh” questions to get additional information about how their world works (why, who, what, where and when).  
- Develops personal interests (trains, animals, dinosaurs).  
- Develops sense of competence by actively engaging in play and putting materials together in new ways to test end results.  
- Builds a vocabulary of adjectives and adverbs to describe and categorize words and actions.  
- Uses fantasy and reality to explain phenomenon.  | - Provide opportunities and time for child to explore a variety of activities and materials, including those in the larger community and those from diverse cultures.  
- Identify and build on child’s individual interests.  
- Provide a variety of stimulating, open-ended materials reflecting child’s expressed interests, and self-directed time to use them.  
- Provide opportunities for child to explore ideas and ask questions where adults and other children listen and respond.  
- Help child find answers to their questions by exploring together and asking open-ended questions (e.g., “I wonder...?” “How could that work?” “What do you think about...?” or “What ideas do you have?”).  
- Play question-and-answer games that inspire child’s curiosity.  
- Read about topics of interest with the child (trucks, insects, gardening) to demonstrate how and where people find information.  
- Elaborate and embellish a child’s utterances (Child says, “I rode the trike.” Adult responds, “Yes, you rode on the tricycle with two small wheels and one large wheel.”).  
- Offer many sensory play opportunities using textures, mixing substances, block play, and dramatic play. |

| 60 Months through Kindergarten | Initiate and sustain play and activities with confidence through increased personal and shared interests. | - Chooses to work on a project because the activity is of personal interest.  
- Invents projects and works on them with little assistance.  
- Forms a plan for an activity and acts on it.  
- Tells the difference between appropriate and inappropriate (or dangerous) risk-taking, with assistance.  
- Chooses to leave a project and returns to it later for completion or elaboration.  
- Participates in displaying a completed project. | - Provide opportunities for children to set and pursue goals.  
- Encourage children to follow through on own interests or projects.  
- Create projects for children to work on over time (planting seeds and nurturing them to watch them grow).  
- Provide opportunities for children to take on activities or responsibilities that last more than one day (feeding the gerbil this week).  
- Provide adequate time and support for children to complete increasingly complex games or tasks.  
- Provide opportunities for children to work successfully together on complex projects.  
- Provide opportunities and assistance, if necessary, for children to join other children playing.  
- Provide opportunities for children to play by themselves and with others.  
- Encourage children to follow through on own interests by providing comments, information resources, or props, as needed.  
- Provide opportunities for children to interact with a variety of people (peers, elders, shopkeepers, neighbors).  
- Provide opportunities for children to form, design, and undertake activities and projects. |
**Domain 1: Approaches to Learning and Cognitive Development**

**Sub-Domain: Learning Approaches**

**Confidence and Initiative**

**Goal 3:** Children are confident to initiate and complete activities using a variety of approaches.

<table>

<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| First, Second, and Third Grades | Sustain autonomous work and also contribute to group efforts. Use rules and conventions to help them carry activities out to conclusion. | ▪ Comments on self competence or self confidence in social, physical, or cognitive situations.  
▪ May exhibit feelings of helplessness (believes they cannot influence the world around them).  
▪ Shows awareness of gender and cultural differences in perceived competence.  
▪ Shows assertiveness toward rules and social conventions (older children can resolve conflicts between groups.).  
▪ Shares interests with peers, and displays mutual understanding of situations.  
▪ Takes initiative in selecting activities and approaches to problems.  
▪ Sustains interest in and returns to creative projects over time. | ▪ Provide opportunities to extend projects related to themes over a period of time.  
▪ Provide opportunities for children to work on projects in groups.  
▪ Be sensitive to children's emerging ability to compare their competencies to others (social comparison), which can negatively influence their self-esteem.  
▪ Involve children in resolving conflicts when they occur between groups (girls and boys, cultural differences).  
▪ Respect cultural differences in the value placed on competition and cooperation.  
▪ Encourage children to solve their problems and acknowledge their efforts. |
GOAL 4: CHILDREN SUSTAIN ATTENTION TO TASKS EVEN WHEN FACED WITH CHALLENGES AND FRUSTRATION.

Domain 1: Approaches to Learning and Cognitive Development
Sub-Domain: Learning Approaches

- Birth through 8 Months
- 6 to 18 Months
- 16 to 38 Months
- 36 to 60 Months
- 60 Months through Kindergarten
- First, Second, and Third Grades

| 36 to 60 Months | Take more risks by extending previous learning to the exploration of new settings, people, and objects. | ▪ Plays beside others and uses common materials.  
▪ Begins to plan play themes corporately with others.  
▪ Plays with shared meaning and evolving scripts.  
▪ Shows interest by asking about new things and people around them.  
▪ Seeks out and engages in new experiences and with toys that are unfamiliar.  
▪ Tells others about events that happened in the past.  
▪ Represents things in the environment with available materials; moving from simple to complex representations.  
▪ Thinks out loud and talks themselves through a situation.  
▪ Works out problems mentally, or remembers past experience as well as using trial and error. | ▪ Provide many and varied safe toys and activities for children to play with alone and in adult-mediated groups.  
▪ Talk with child about what they have seen, heard, and done.  
▪ Rotate toys as child appears to lose interest. Later, re-introduce toy to spark renewed interest.  
▪ Provide opportunities for child to explore nature and the outdoors.  
▪ Provide time for and materials to process experiences and information.  
▪ Help child remember experiences with photos, mementoes, found objects, and written stories.  
▪ Ask open-ended questions to encourage reflection (e.g., “What if?” “How else...?”).  
▪ Expose child to differences in people and clarify understanding.  
▪ Interpret a peer’s intentions or point of view as part of conflict resolution. |
**DOMAIN 1: APPROACHES TO LEARNING AND COGNITIVE DEVELOPMENT**

**SUB-DOMAIN: LEARNING APPROACHES**

**REFLECTION AND INTERPRETATION**

**GOAL 6. CHILDREN SHOW ABILITY TO CHANGE OR ADAPT THOUGHT PROCESSES, APPLYING PREVIOUSLY LEARNED CONCEPTS AND SKILLS TO NEW SITUATIONS.**

<table>

<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 60 Months through Kindergarten | Consider multiple approaches to new situations and tasks. Cooperate with peers and adults to assess new situations and tasks. | - Engages in activities and solve problems cooperatively.  
- Uses a variety of methods to express thoughts and ideas (discussions, art activities).  
- Demonstrates long-term memory of meaningful events and interesting ideas.  
- Recognizes others’ feelings and begins to consider them in problem solving.  
- Applies past learning to new activities and object through trial and error testing out of hypotheses.  
- Shows interest in and asks many questions about new things and people.  
- Desires to solve problems on their own.  
- Prefers to choose activities and are self-sufficient in following through with the choice. | - Provide many and varied toys and activities for children to play with in groups and on their own.  
- Make materials accessible for self-sufficiency, free choice, and self expression.  
- Provide time for child to engage in meaningful play.  
- Talk with child about what has been see, heard, or done.  
- Provide opportunities to recall past experiences in planning new activities and setting goals.  
- Provide time to process experiences and information.  
- Ask open-ended questions to encourage reflection.  
- Help child recognize emotions in their peers and talk through conflicts.  
- Provide opportunities to engage group activities (science and cooking projects).  
- Expose child to different cultural traditions.  
- Support child with special needs who may need clarification of others’ motives and intentions. |
**Goal 6.** Children show ability to change or adapt thought processes, applying previously learned concepts and skills to new situations.

<table>

<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| First, Second, and Third Grades | Use complex mental models of how the world works and increased perspective-taking skills; resulting in strategic problem solving. Increasingly use conventions and rules to interpret new situations. | ▪ Can have multiple perspectives, including those of others.  
▪ Can consider the past, present, and future and reason about what might happen.  
▪ Can imagine multiple solutions.  
▪ Uses multiple sources of information for further understanding.  
▪ Can consider more than one element of something at the same time.  
▪ Can generalize learning and use imagination in new settings and with new activities (effective problem solving).  
▪ Self-sufficient in problem solving though peer and adult help is often needed.  
▪ Generalizes skills used in previous situations to solve new problems. | ▪ Provide many opportunities for child to explore more complex subjects and processes.  
▪ Allow children to work in groups to solve problems.  
▪ Allow child to come up with own solutions and to consider multiple solutions.  
▪ Question child to help them see multiple solutions and ask child to talk about their thought process.  
▪ Acknowledge child’s imagination and abilities.  
▪ Help child resolve conflicts with peers on their own.  
▪ Provide opportunities for child to explore different cultures and new activities.  
▪ Provide opportunities for hands-on learning of different processes (building, cooking, art, music, etc.). |
GOAL 7: MEDIATED BY INDIVIDUAL TEMPERAMENT, CHILDREN LEARN TO UNDERSTAND AND APPRECIATE INDIVIDUAL STYLE IN APPROACHING AND INTERACTING WITH THE WORLD.

Domain 1: Approaches to Learning and Cognitive Development
Sub-Domain: Learning Approaches

- Birth through 8 Months
- 6 to 18 Months
- 16 to 38 Months
- 36 to 60 Months
- 60 Months through Kindergarten
- First, Second, and Third Grades
Goal 7. Mediated by individual temperament, children learn to understand and appreciate individual style in approaching and interacting with the world.

| Birth through 8 Months | Increasingly aware of self and primary caregivers. | - Looks for or orients toward a dropped object or sound.  
- Uses sounds, gestures, and movements to impact the environment and interactions.  
- Acts on an object to make a pleasing sight, sound, or motion (kicks or swats mobile, continues to bat object to repeat sound).  
- Repeats actions many times to cause the desired effect.  
- Sustains brief interactions, with caregiver support.  
- When mobile, seeks caregiver for support. | - Provide a safe and stimulating environment for baby to explore.  
- Provide opportunities for baby to see objects and people move out of sight and return.  
- Provide baby with consistent responses, environments, and routines.  
- Play turn-taking games with baby (Peek-a-Boo).  
- Provide opportunities for baby to experience cause and effect. |
**DOMAIN 1: APPROACHES TO LEARNING AND COGNITIVE DEVELOPMENT**

**SUB-DOMAIN: COGNITION AND COGNITIVE PROCESSES**

**REASONING AND LOGIC**

**GOAL 8: CHILDREN DEMONSTRATE AWARENESS OF CAUSE AND EFFECT RELATIONSHIPS.**

| Age Range      | Developmental Growth                                                                                                                                                                                                 | Child Indicators                                                                                                                                                                                                                                                                                                                                 | Caregiver Strategies                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 6 to 18 Months| Use goal-oriented exploration. Actively explore self, others, and objects; recognize the effect of actions on the environment.                                                                                          | ▪ Uses variety of tools (containers, switches, doors).  
  ▪ Manipulates object to experiment with cause and effect.  
  ▪ Uses motor skills to experiment with cause and effect.  
  ▪ Uses two- to three-step sequencing.  
  ▪ Experiments with effects of own actions on objects and people.  
  ▪ Looks to others for understanding and response (social referencing with caregivers).  
  ▪ Begins to express an understanding of cause and effect.  
  ▪ Understands "no," but may not inhibit actions.  
  ▪ Begins to understand that meaning and language are linked to actions.  
  ▪ Does not understand impact of actions on others (biting, pushing).                                                                                     | ▪ Demonstrate and explain the relationships between things (e.g., “Your toy is on the floor. You can’t reach it.”).  
  ▪ Model opportunities for the child to experience the connection between action and language. Understand that the child’s comprehension of combining action and language is not well-formed.  
  ▪ Explain what is happening while interacting with child.  
  ▪ Use consistent routines so child learns to predict (after a nap, it’s snack time).  
  ▪ Describe what is happening/seen when child looks to caregiver for information.                                                                   |
## Domain 1: Approaches to Learning and Cognitive Development

<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| **16 to 38 Months** | Begin to use prior relationships and experiences to expand understanding and problem solving. | ▪ Generalizes actions to similar objects (stacks boxes like blocks).  
▪ Realizes that behaviors can precede events (if mom puts a pot on the stove, she is going to cook something to eat; when mom puts on her coat, she is leaving).  
▪ Anticipates separation and reunion.  
▪ Alters behavior based on a past event and builds on it (I did this and it didn’t work, so I will do this instead.).  
▪ Relates an experience today to one that happened in the past (hand washing prior to mealtime).  
▪ Looks in several places for a desired object, or when asked to find an object (e.g., “Go see if your other shoe is under your bed.”).  
▪ Enjoys simple hide-and-seek games.  
▪ Begins to understand that a parent goes away to work, but will come home.  
▪ May over generalize terms such as hot/cold/sweet/sour/big/old based on limited experiences.  
▪ Talks to self, saying words repetitively (referred to as rehearsal; where child tries out putting thoughts into words). | ▪ Think out loud and talk about ideas with child using descriptive language (e.g., “You remembered where the puzzle piece fits.”).  
▪ Invite child to share thoughts and ideas about the world around him/her.  
▪ Provide materials that are similar but produce different results (crayons, markers, paint).  
▪ Narrate child’s play by describing what you see and hear.  
▪ Demonstrate, explain, and provide opportunities for child to think about and avoid negative or problem situations.  
▪ Play safe, simple, hiding and finding games.  
▪ Incorporate storytelling into every day routines (at naptime tell child individual stories about their morning, what they did, what happened, etc.).  
▪ Offer a window where child can watch family members arrive and depart.  
▪ Help child understand the passing of time by describing a sequence of events (we get up from our nap, have a snack, play on the playground, then mommy comes to get you.).  
▪ Offer sensory experiences paired with descriptive vocabulary (e.g., “The snow is cold.” “The rain is cool.” “The soup is warm.” “The book is big.” “The door is tall.” “Your dad is tall.”). |

</table>
| 36 to 60 Months | Connect current behavior and past experience to new situations, relationships, and problem solving. | - Explains events that happened in the past.  
- Represents things in environment with available materials; moving from simple to complex representations (recreate picture of a house, build road with blocks, or make a tree with modeling clay).  
- Thinks out loud and talks themselves through a situation.  
- Works out problems using information from prior experiences rather than through trial and error.  
- Tells a story or recounts an event from photographs of self and others (e.g., "We made a big tent with boxes and blankets.").  
- Points to objects that are out of place.  
- Points out objects in complex pictures and puzzles.  
- Asks or tells when a parent goes away to work and will they come home.  
- Completes a sequence of three to six pictures or pieces of a sequence puzzle.  
- Sings and chants along with repetitive lines in songs, poems, and stories.  
- Uses words for yesterday, today, and tomorrow even though the timing may be incorrect.  
- Tells others about their acquaintances and experiences without considering the other person’s lack of knowledge with the topic or person. | - Engage child about what he/she has seen, heard, or done.  
- Provide child with time to respond in conversation where they want to offer experiences and information.  
- Help child remember experiences using photographs, mementos, and re-told stories.  
- Ask open-ended questions that encourage reflection (e.g., “What if…?” “How else could you do this?”).  
- Provide play interactions with other children and props that elicit previous experiences.  
- Use photos to prompt routines such as hand washing, brushing teeth, putting away toys.  
- Sing songs and tell/read stories with repeating lines or sequences of activities.  
- Play “remember when” games, family stories.  
- Play name word games and sing name songs to help children know one another’s names.  
- Rotate toys and activities based on input from children and their comments about past experiences. |
## Domain 1: Approaches to Learning and Cognitive Development

### Sub-Domain: Cognition and Cognitive Processes

### Concept Formation/Memory

**Goal 9:** Children use prior relationships, experiences, and knowledge to expand understanding.

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 60 Months through Kindergarten | Mediate current behavior, exploration, and problem solving by remembering past experiences. | - Uses a variety of methods to express thoughts and ideas (discussion, art activities).  
- Demonstrates memory of meaningful events and interesting ideas using explanations and creative expression.  
- Describes or acts out a memory of a situation or action.  
- Seeks information for further understanding.  
- Uses multiple sources of information to complete projects and acquire new information, with assistance.  
- Plans activities and sets goals based on past experience.  
- Demonstrates beginning understanding of what others are thinking, their intentions, or motivations.  
- Collects and categorizes objects from field trips or travels (rocks, shells, photos).  
- Tells stories about the past or future, and elaborates on stories told by others. | - Provide opportunities for child to express thoughts through writing, speaking, or creative arts.  
- Provide opportunities for child to recall past experiences in planning new activities and setting new goals.  
- Provide opportunities for child to share the lessons learned from his/her experiences (story time).  
- Support children who may have difficulty understanding others’ motives and intentions with adult-mediated negotiations and conflict resolution strategies.  
- Help child to understand children’s differing actions, and what they might represent or mean.  
- Provide display space for collected items and encourage dictated labels or stories to explain significance.  
- Ask about a certain trip or event, what happened, what came first, and what might happen next.  
- Maintain portfolios of child’s work so they can see past and present examples of their work. Encourage child to choose items to put in their portfolios.  
- Encourage child to hypothesize and carry out experiments and document results (water, sand, natural environmental relationships). |
DOMAIN 1: APPROACHES TO LEARNING AND COGNITIVE DEVELOPMENT

| 60 Months through Kindergarten | Cooperate with others and systematically test ideas about how things work. Draw on past experience and increasing awareness of others. | - Structures experiments to see how changes in one factor can influence changes in others.  
- Explains how one change can lead to another.  
- Explains how simple events occur.  
- Sets up and pursues purposeful experimentation; trying out different solutions.  
- Makes predications about what will happen next.  
- Builds an awareness of other peoples’ points of view and feelings.  
- Can hold more than one attribute in mind at once (teacher can also be a parent).  
- Moves from magical thinking to reasons for events.  
- Understands difference between live, not alive, and dead.  
- Understands problem-solving process includes classifying and reframing within co-constructed meaning.  
- Uses analogical thinking to allow transfer of problem-solving strategies to new situations. | - Engage child in experimentation; ask predicting questions.  
- Provide child with a variety of materials to create experiments.  
- Demonstrate, explain, and engage child in taking steps to cause an outcome.  
- Recognize importance of children’s effectiveness in teaching one another. |
<table>

<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| First, Second, and Third Grades | Become autonomous and confident to realistically identify problems and find solutions. | - Transfers and generalizes some kinds of problem-solving patterns and schemas to new situations and predicts outcomes.  
- Has clearer understanding of other peoples’ actions and emotions, as separate from own.  
- Can predict intent of other child’s actions.  
- Uses problem-solving process, which includes classifying and reframing within co-constructed meaning.  
- Uses problem solving, which includes planning and mental representations of tasks, and is able to focus on the most relevant information.  
- Develops the capacity for purposeful experimentations and plans for a range of solutions.  
- Can delay gratification to find a solution. | - Ask child to explain what they were thinking in relationships to activities, problems, experiments, situations.  
- Arrange opportunities for children to work in small groups or teams.  
- Engage children in “if/then” scenarios that are both fanciful and realistic (e.g., “If cows could fly, then . . . .”, or “If a car has a flat tire, then . . . .”). |
GOAL 13: CHILDREN COMPARE, CONTRAST, AND EVALUATE EXPERIENCES, TASKS, AND EVENTS BUILDING ON PRIOR KNOWLEDGE.

Domain 1: Approaches to Learning and Cognitive Development
Sub-Domain: Cognition and Cognitive Processes

- Birth through 8 Months
- 6 to 18 Months
- 16 to 38 Months
- 36 to 60 Months
- 60 Months through Kindergarten
- First, Second, and Third Grades
### Domain 1: Approaches to Learning and Cognitive Development

**Sub-Domain: Cognition and Cognitive Processes**

**Reasoning and Logic/Critical and Analytic Thinking**

**Goal 13:** Children compare, contrast, and evaluate experiences, tasks, and events building on prior knowledge.

</tr>
</thead>
</table>
| 16 to 38 Months | Begin to take some risks and actively explore new ways of doing things with familiar people, objects, and settings to achieve additional positive consequences. | - Generalizes ideas based on past experiences (watches caregiver blow on hot food before eating, then blows on food, hot or cold, at next meal).  
- Connects objects and ideas (broom for sweeping, swimsuit for swimming).  
- Labels that a person’s apparel is based on the weather outside (wearing a sweater means it is cold outside).  
- Imitates behavior seen in another place and time.  
- Notices and describes how items are the same or different.  
- Uses actions or words to justify choices.  
- Makes choices when given options (which toy to play with).  
- Articulates changes noticed in familiar places and people.  
- Identifies differences between own and others’ work. | - Use child’s home language, experience, and culture to make connections to new experiences.  
- Engage child in routine activities while explaining the whys (e.g., “We vacuum the floor to clean up the dirt.”).  
- Help child make generalizations (“If it is sunny here, it will probably be sunny at school.”).  
- Acknowledge child when a past event is recalled and used as the basis for a choice.  
- Demonstrate, explain, and engage child in comparing objects’ size, shape, and other characteristics.  
- Demonstrate, explain, and engage child in discussing what he/she likes and does not like about experiences.  
- Provide opportunities to talk about how one picture and block structure is alike, or for child to build following a field trip. |

| First, Second, and Third Grades | Use some systematic thinking to reason about social and natural phenomena.              | ▪ Combines, separates, orders, and transforms information and objects.  
▪ Understands that such physical aspects of objects (size, quantity, and number) remain the same even when some aspects of their appearance change.  
▪ Can consider more elements of a problem at the same time (can think about alternatives when solving problems).  
▪ Can mentally retrace their steps, if they want to.  
▪ Can play games with rules.  
▪ Has increased ability to consider both behavior and psychological states and better interpret other people's intentions.  
▪ Succeeds in solving problems and cooperatively playing in peer groups.  
▪ Can think about past, present, and future states of objects and people.  
▪ Organizes collections according to multiple criteria (sorting baseball cards according to league, team, and position). | ▪ Provide child many and varied activities and objects to stimulate their new abilities in problem solving.  
▪ Allow child to arrive at their own conclusions through experimentation.  
▪ Let child work in groups to generate multiple ideas and solutions.  
▪ Share stories about a variety of people and cultures.  
▪ Share stories with moral dilemmas and encourage child to generate multiple solutions.  
▪ Ask child to relate their own stories.  
▪ Listen to child's explanations of things and ask questions to explore alternate solutions.  
▪ Provide learning games.  
▪ Introduce history and compare to the present and future.  
▪ Provide opportunities to collect and classify objects. |
GOAL 14: CHILDREN PARTICIPATE IN EXPLORATORY PLAY.

</table>
| 36 to 60 Months | Explore materials and actions. | ▪ Uses sorting, classifying, and seriation and patterning.  
▪ Climbs, swings, jumps, dances, and hops to test skills.  
▪ Aims, throws, catches, and kicks balls to explore projectile management.  
▪ Uses tools, hammers, saws, shovels, and levers to explore the physical properties of moving masses.  
▪ Plays with wheeled toys (tricycles, scooters, wagons) to explore velocity.  
▪ Uses art materials to make functional objects.  
▪ Constructs with building bricks and manipulative toys to explore spatial relationships  
▪ Uses senses to explore physical environment (sand and water, sweet and sour, loud and soft, identify smells). | ▪ Provide manipulative toys for sorting, classifying, and arranging in groups and sequences, by attribute.  
▪ Understand functional play and its relationship to math and science foundations.  
▪ Provide time for outdoor activities and play with digging tools, buckets, wheel toys, and balls. |
## DOMAIN 1: APPROACHES TO LEARNING AND COGNITIVE DEVELOPMENT

### SUB-DOMAIN: COGNITION AND COGNITIVE PROCESSES

### REPRESENTATIONAL THOUGHT AND PLAY

**Goal 14. Children participate in exploratory play.**

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 60 Months through Kindergarten | Work with persistence and confidence. | - Creates elaborate block construction.  
- Uses rules and boundaries in representational building.  
- Experiments with balance, ramps, pulleys, and other tools when block building, constructing, or manipulating objects.  
- Takes apart/deconstructs to gain an understanding (gears, old sewing machine).  
- Works to replicate a building, object, or event through drawing/painting or block building.  
- Climbs, slides, runs, kicks, and jumps to explore movement.  
- Makes up games to test skills.  
- Reinterprets the rules for a game or sport to fit skill levels. | - Enrich and structure environment (block area with extensive shapes and number of blocks; provide block props and raw materials).  
- Ask clarifying questions to extend play or overcome frustration.  
- Help groups of children negotiate rules and fairness.  
- Provide outdoor play environments for active games, observation, and exploration. |
### Domain 1: Approaches to Learning and Cognitive Development

</thead>
</table>
| Birth through 8 Months | Sustain brief interactions with caregiver support. | ▪ Coordinates body and visual cues with caregiver.  
▪ Responds with interest to Peek-a-Boo and hand clapping.  
▪ Plays with sounds while exploring a toy.  
▪ Smiles, coos, relax muscles in reciprocal play with caregiver. | ▪ Engage baby in playful interactions (smiles, face-making, stroking).  
▪ Watch for child's signals of looking to engage in interactions.  
▪ During care giving tasks, bring baby close and talk softly (feeding, diapering, face washing).  
▪ Provide baby opportunities to see objects and people when interested and alert.  
▪ Sing songs, say rhymes, look out the window, and show picture books while baby is alert and interested. |
<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 6 to 18 Months | Use senses and mobility to explore functionally, and evolve into using sensory motor objects symbolically. | - Uses objects functionally.  
- Uses objects symbolically. Use simple abstraction (a stick for a spoon, a tissue for a blanket).  
- Makes animal sounds.  
- Uses make-believe play (rocking or feeding a baby doll).  
- Imitates the roles of adults and older children. | - Tell child stories about daily events or something special that happened, with the child as the central character.  
- Expose child to make-believe stories and songs from a variety of cultures.  
- Demonstrate and engage child in making a variety of animal sounds.  
- Recognize child’s cues to engage in play.  
- Help coordinate and explain child’s often vague cues to initiate play to other children.  
- Support social referencing with child to engage in play with adult of other child.  
- Provide props and opportunities for imaginative play. |
**DOMAIN 1: APPROACHES TO LEARNING AND COGNITIVE DEVELOPMENT**

**SUB-DOMAIN: COGNITION AND COGNITIVE PROCESSES**

**REPRESENTATIONAL THOUGHT AND PLAY**

**GOAL 15: CHILDREN PARTICIPATE IN PRETEND OR SYMBOLIC PLAY.**

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 16 to 38 Months | Use objects symbolically and creates symbolic play.                                    | - Uses one object as a symbol for another (holds blocks to ear to represent a cell phone).  
- Explores experiences by taking on family roles from within the family. Uses simple, not elaborate, forms.  
- Moves from mostly solitary play to some parallel play.  
- Uses props in pretend play (dolls, animals, trucks, objects).  
- May have an imaginary friend.  
- Reacts to people in costume as if they are the characters they portray.  
- Reacts to puppets as if they are real and not extensions of an adult or another child.  
- May use play to address some fears.  
- Initiates play with another child through gestures, offering a toy, smiling, and eye contact.  
- Uses theme play (animals go to the barn; babies are fed and put to bed).  
- Initiates favorite play themes with peer or adult.  
- Starts giving emotions and language to dolls and other play characters.                                                                 | - Participate in child’s sense of imagination by engaging in make-believe play, with child leading.  
- Dispel child’s fears that result from confusion over fantasy and reality.  
- Discuss child’s dreams, ideas, and imagination with him/her.  
- When a child has imaginary friends, acknowledge the “friend.”  
- Scaffold child’s inclusion of peers into dramatic play scenarios.  
- Read fiction and nonfiction books and share family and traditional oral stories with child, and discuss how they are different.  
- Provide ample time and creation of imaginative play themes.  
- Provide props for creating play themes.  
- Acknowledge a child’s play with props, which is for the sake of using the prop, rather than for creating a theme (repeatedly opens and closes a cash register rather than playing store). |
**Goal 15: Children participate in pretend or symbolic play.**

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 36 to 60 Months   | Use elaborate plots, shared scripts, and multiple sequences and roles, with a mixture of reality and fantasy. | ▪ Explores experience by taking on familiar roles in the home and community (firefighters, restaurant, doctor’s office).  
▪ Takes on pretend roles and situations. Uses appropriate language, tone, and movements (pretends to be a baby, crawling on the floor and making baby sounds).  
▪ Engages in complex make-believe play (theme-oriented play that involves multiple characters and settings).  
▪ Makes connections between characters in books, stories, or movies, with people in real-life.  
▪ Questions if characters in books, family, and traditional oral stories and movies are real or not.  
▪ Believes objects, events, and characters can be “magic” or have “powers.”  
▪ Understands that conflict can arise from “misunderstanding each other.”  
▪ Can return to favorite play themes with friends.  
▪ Uses dramatic play to recreate a real situation with self involvement.  
▪ Plays out social and emotional issues (power, loss, fears).  
▪ Uses block and dramatic play areas for imaginative settings and extended play.  
▪ Extends and consolidates understanding through play. | ▪ Engage the child in activities and interactions that develop fantasy characters while helping them differentiate between make-believe and reality.  
▪ Help child distinguish between cartoons, puppets, characters in books and movies, and real people.  
▪ Provide environment and time for dramatic play.  
▪ Scaffold entrance into dramatic play for child who needs support to join play.  
▪ Clarify scripts and roles as part of conflict resolution.  
▪ Provide opportunities for pretend play outdoors with materials such as sand, water, buckets and pans, fabric for tents, play scripts, balls, and opportunities to invent games. |

</table>
**Domain 2: Physical Well-Being, Health, and Motor Development**

**Introduction**

During the first years of life, the human body changes continuously and dramatically. These changes are not simply a matter of growing taller or gaining more weight; they also involve a complex series of changes in body composition, proportion, and motor development. Long acknowledged as cornerstones of early development and learning and as key dimensions of school readiness, children’s physical well-being, health, and motor development have received substantial attention in medical, educational, and developmental literature.

Through an interaction of maturation and experience, physical and motor development occurs along a relatively predictable sequence from simple to complex. Three general principles underlie the acquisition of motor skills:

- Most children develop motor control and coordination from head to toe.
- Children develop motor control and coordination from the center of their bodies outward.
- Children develop motor skills involving reflexes, then large muscles, and then progress to smaller muscles. The order in which these abilities develop is virtually the same for children around the world (e.g., they learn to lift their heads up before they learn to control their fingers).

**Rationale**

Physical well-being, health, and motor development are central to children’s learning experience and are building blocks to a lifelong active and healthy lifestyle. Motor development is closely linked with children’s:

- Language development (e.g., babbling, pointing to objects).
- Cognition (e.g., exploring new environments, crawling or stooping down to explore, building with blocks).
- Social competencies (e.g., hugging, watching others, waving bye-bye, sharing a tricycle ride).
- Emotional development (e.g., smiling, laughing, dancing).

The development of young children’s physical and motor skills is often uneven. Growth spurts in physical development are common. Growth spurts in physical development are common.

**General Definition**

**Domain 2: Physical Well-Being, Health, and Motor Development**, consists of five sub-domains:

- Motor Development
- Physical Development
- Health and Personal Care
- Nutrition and Feeding
- Safety

**Motor Development**

Motor development has three distinct components: gross motor skills, fine motor skills, and sensorimotor skills.
Gross motor skills are characterized by movements of the large muscles of the body and include such movements as rolling over, walking, jumping, and climbing.

Fine motor skills involve the ability to coordinate smaller muscles including the muscles of the hands, fingers, and face that allow for movements such as grasping, cutting, picking up food, or intentionally winking.

Sensorimotor skills involve the ability to use and integrate the senses (sight, hearing, smell, taste, and touch) to support activity. These skills provide a foundation for behavior, learning, and overall development for young children.

**PHYSICAL DEVELOPMENT**

Children need access to free time, play opportunities, adequate space, and challenging materials to pursue their physical development needs. Physical competence allows children to participate in group activities and maintain attention to, and interest in tasks necessary to the learning process. Elements of physical competency and development include:

- Stamina
- Energy
- Strength
- Flexibility
- Coordination
- Endurance

**HEALTH AND PERSONAL CARE**

Prenatal care, personal hygiene, and basic personal care are essential to a child’s physical health. Children’s physical health is impacted by access to medical and dental care, nutrition, healthy sleep patterns, and opportunity for physical activity and active play. Recognizing and addressing acute and chronic illness is essential to sustain healthy physical development.

**NUTRITION AND FEEDING**

**Goal 24, Children eat a variety of nutritious foods** encompasses far more than food groups and nutrients fed to children. Attitudes, self-regulation, culture, and general areas of development are entwined with food and feeding.

**SAFETY**

Safety includes protecting children from exposure to harmful substances and situations and helping children learn to avoid harmful objects, environments, and circumstances. Though young children can learn safety rules and regulations, know when and how to ask for help, and recognize the boundary between safety and danger, they cannot be expected to keep themselves safe. Young children’s physical well-being is dependent on adult-provided safety.

**SUPPORTING INDIVIDUAL DIFFERENCES**

Physical and motor development includes biological maturation that reflects genetics, nutrition, health, and the environment. Development of physical skills and abilities follows a predictable progression, though the rate of physical and motor development varies widely among individuals, cultures, and contexts.

Children’s physical well-being, health, and motor development are sometimes impacted by visual, hearing, motor, neurological, or other disabilities. Young children who experience delays, disabilities, or who are at risk for developmental delays may benefit from assistive technology or adaptive equipment, specialized activities, space, play settings, and other resources to support daily activities.
GOAL 17: CHILDREN DEMONSTRATE STRENGTH AND COORDINATION OF LARGE MOTOR MUSCLES.

Domain 2: Physical Well-Being, Health, and Motor Development
Sub-Domain: Motor Development

Birth through 8 Months
6 to 18 Months
16 to 38 Months
36 to 60 Months
60 Months through Kindergarten

| 36 to 60 Months | Use fingers and hands for purposeful tasks. | ▪ Eats with utensils; scoops, spears, and spreads food.  
▪ Uses various drawing and art materials (crayons, brushes, finger paints).  
▪ Copies shapes and geometric designs.  
▪ Opens and closes blunt scissors with one hand.  
▪ Cuts a piece of paper on a straight line and on a curve. Child needs sharp scissors to cut accurately.  
▪ Manipulates small objects with ease (strings beads, fits small objects into holes).  
▪ Fastens large buttons.  
▪ Uses large zippers.  
▪ Uses stapler or paper punch.  
▪ Completes increasingly complex puzzles (single, cut-out figures to 10-piece puzzles).  
▪ Writes some recognizable letters or numbers. | ▪ Engage child in activities that strengthen hand grasp (molding play dough, using a hand-held hole punch).  
▪ Encourage child to strengthen grasp of thumb/forefinger (gluing small pieces of paper, peeling/sticking stickers, picking up small objects with fingers).  
▪ Encourage use of precision grasp (using writing utensils such as crayons, pencils, markers, paints).  
▪ Provide opportunities for child to practice tying, buttoning, and beading.  
▪ Demonstrate and provide opportunities for child to use scissors safely (include adaptive scissors).  
▪ Modify activities to ensure participation of each child (attach rubber grips to pencils and pens).  
▪ Offer supervised wood-working opportunities (gluing, hammering, screwing, sawing). |
## Domain 2: Physical Well-Being, Health, and Motor Development

### Sub-Domain: Motor Development

**Fine-Motor Skills: Prehension, Reaching, and Manipulation**

**Goal 18:** Children demonstrate strength and coordination of small motor muscles.

<tbody>
<tr>
<td>Birth through 8 Months</td>
<td>Respond to sensory input.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
- Responds by turning toward sound, movement, and touch.  
- Focuses eyes on objects near and far.  
- Tracks objects by turning head.  
- Explores the environment with mouth and hands.  
- Adjusts to changes without becoming distressed (moving through space, sudden noises, etc.).  
- Distinguishes and responds to differences in sound and intonation. |  
- Simplify sensory experiences (decrease clutter, noise, visual input, etc.).  
- Ensure child receives routine vision and hearing screenings.  
- Monitor child’s environment for variety of sound levels and types of sound.  
- Avoid putting electronic toys in crib. Keep loud noises away from infant’s ears.  
- Place a mobile near infant’s crib (safety out of the child’s reach) to stimulate vision and other senses.  
- Avoid prolonged periods in highchairs or devices that restrict movement (mechanical swings, baby carrier).  
- Wait for child’s visual or tactile response as sensory changes occur in the environment.  
- Give adequate time for the baby to respond to changes. |
### Domain 2: Physical Well-Being, Health, and Motor Development

### Sub-Domain: Motor Development

#### Sensory Motor Skills

**Goal 19:** Children use their senses (sight, hearing, smell, taste, and touch) to guide and integrate their interactions.

<td>Coordinate motor activities based on sensory input.</td>
<td>• Coordinates motor activity based on visual input.</td>
<td>• Play word games and sing songs that use the senses.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Holds materials at an appropriate distance.</td>
<td>• Set up an obstacle course of chairs, sticks, boxes, and give directions; go over the box, under the chair, and beside the stick.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Moves eyes rather than head to track objects.</td>
<td>• Provide opportunities for the child to explore natural surroundings through the senses.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Physically reacts appropriately to the environment (bends knees to soften a landing, moves quickly to avoid obstacles).</td>
<td>• Provide opportunities for the child to integrate rhythm, sounds, and music with motor activity; like striking a drum to the beat or marching with the rhythm.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Demonstrates concepts through movement (imitates an animal through movement, sounds, dress, dramatization, dance).</td>
<td>• Provide opportunities to use touch, pressure, and texture to learn to push, pull, or lift an object effectively.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Improves eye-hand coordination for precise movement (catches a bounced ball).</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Coordinates motor activity based on auditory input (runs to look out the window when hearing a siren).</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Demonstrates sensory regulation by pushing objects, climbing short ladders, swinging on a swing, and sliding.</td>
<td></td>

Goal 31: Children participate positively in group activities.

Goal 32: Children demonstrate sympathy and empathy.

Goal 33: Children develop a sense of humor.

Goal 34: Children adapt to diverse settings.

Goal 35: Children recognize, appreciate, and respect similarities and differences in people.
Domain 3: Social and Emotional Development

Sub-Domain: Emotional Development

Goal 36: Children perceive themselves as unique individuals.

Goal 37: Children demonstrate belief in their abilities.

Goal 38: Children regulate their feelings and impulses.
Domain 4: General Knowledge

Sub-Domain: Mathematics and Numeracy

**Goal 39:** Children demonstrate understanding of numbers, ways of representing numbers, relationships among numbers, and number systems.

**Goal 40:** Children demonstrate understanding of measurable attributes of objects and the units, systems, and processes of measurement (including size, volume, height, weight, length, area, and time).

**Goal 41:** Children demonstrate understanding of patterns, relations, and functions used to organize their world and facilitate problem solving.
**Idaho Early Learning eGuidelines**

Domain 4: General Knowledge

**Sub-Domain: Science**

**Goal 42:** Children observe, describe, and collect information by exploring the world around them.

**Goal 43:** Children further engage in exploring and making sense of the natural world by asking questions and making predictions about cause and effect relations that can lead to generalizations.
Idaho Early Learning eGuidelines

Domain 4: General Knowledge

Sub-Domain: Social Studies

**Goal 44:** Children differentiate between people, places, activities, and events in the past and present that relate to self, group identity, and a sense of their community.

**Goal 45:** Children demonstrate awareness and understanding of individual fairness, group rights, and responsibilities (democratic ideals) for membership and participation in group activities (successful citizenship).
Idaho Early Learning eGuidelines

Domain 4: General Knowledge

Sub-Domain: Creative Arts

Goal 46: Children use creative arts to express and represent what they know, think, believe, or feel.

Goal 47: Children demonstrate understanding and appreciation of creative arts.
Domain 5: Communication, Language, and Literacy

Sub-Domain: Communication

Goal 48: Children demonstrate the meaning of language by listening.

Goal 49: Children communicate effectively.

Goal 50: Children comprehend and use conventions of social communication.
Idaho Early Learning eGuidelines

Domain 5: Communication, Language, and Literacy

Sub-Domain: Literacy

Goal 56: Children develop phonological awareness.

Goal 57: Children demonstrate awareness of letters and symbols.

Goal 58: Children demonstrate awareness of print concepts.

Goal 59: Children demonstrate comprehension of printed materials and oral stories.

Goal 60: Children demonstrate awareness that written materials can be used for a variety of purposes.

Goal 61: Children demonstrate knowledge and use of letters and symbols.

Goal 62: Children use writing skills and demonstrate knowledge of writing conventions.

Goal 63: Children use writing for a variety of purposes.
Idaho Early Learning eGuidelines

Domain 5: Communication, Language, and Literacy

Sub-Domain: Language

Goal 51: Children use receptive vocabulary.

Goal 52: Children use expressive vocabulary.

Goal 53: Children demonstrate progression in grammar and syntax.

Goal 54: Children demonstrate comprehension and meaning in language.

Goal 55: Children use language for a variety of purposes.
Domain 5: Communication, Language, and Literacy

Sub-Domain: English Language Learners

**Goal 64:** Children demonstrate competency in home language while acquiring beginning proficiency in English.
### Goal 26: Children demonstrate awareness and understanding of safety rules.

INTRODUCTION

By nature, humans are social creatures. Throughout all phases of life, people interact with one another. Children learn to be around others as they construct knowledge about the world through social interaction. Healthy children in all cultures form early attachments with significant adults. These relationships form the foundation for later emotional, social, language, and cognitive development.

Even though emotions are a universal human phenomenon and social behavior is observed constantly in the world around us, social and emotional development is challenging to define and measure. The challenges stem from:

- the broad range of behaviors and concepts included within social and emotional development;
- the difficulty of assessing processes that are primarily internal, and therefore, not always visible processes; and
- social and emotional variability according to culture and situations.

Social and emotional development serves as the foundation for relationships and interactions that give meaning to a child’s experiences in the home, at school, and in the larger community. Brain research consistently supports the importance of the first five years as the critical years for developing foundational social and emotional skills.

RATIONALE

Social and emotional development is a predictor of a child’s overall success in school and in life. Relationships play a central role in:

- fostering a child’s social and emotional well-being,
- providing a sense of stability and belonging, and
- allowing a child to make the most of learning opportunities.

Successful social and emotional development requires secure, consistent, responsive, and physically and emotionally nurturing relationships. With guidance and through playful interactions, children develop skills to cooperate, negotiate, lead and follow, be a friend, and express their feelings in a socially and culturally acceptable manner. These skills include the ability to read body language, communicate non-verbally, and be sensitive to others’ feelings.

Forming warm, responsive bonds and intimacy with others offers security to children, as well as protecting them emotionally from negative effects associated with poverty, violence in the home or community, parental depression, and other stressors that endanger mental health and social adjustment.

GENERAL DEFINITION

Social and emotional development encompasses a child’s ability to interact effectively with adults and children. Social development and emotional development are closely interrelated skills in that each is acquired in a relatively predictable sequence. For example, a child establishes warm and responsive interactions with adults (social development) before he/she develops emotional skills such as self-control. These skills typically precede the development of relationships with peers and groups.

SOCIAL DEVELOPMENT

Young children’s ability to form and sustain social relationships with adults and other children is at the heart of their social development. A child’s social relationships with adults can be understood in terms of the child’s ability to trust and interact easily with adults, as well as the ability to recognize adult roles. A child looks to adults for guidance, cues, and information on how to act, think, and feel.

As children develop, the ability to establish relationships with peers influences how they view themselves and the world. Building friendships assists a child to cooperate, form and maintain relationships, and negotiate. Meaningful play experiences offer the child key opportunities to practice social skills of cooperating, compromising, and taking turns. Cooperation with peers implies an understanding of others’ rights and the ability to balance one’s own needs with those of others.

A child can develop successful social relationships while recognizing and appreciating similarities and differences in other people, as well as learn to interact comfortably with children and adults who may have different characteristics, cultures, and life
experiences. Positive social relationships are formed and maintained when a child develops adaptive social behavior. The effects of different behaviors are understood as he/she adapts to diverse settings and participates positively in group activities. Finally, social competence is demonstrated when a child shows empathy when understanding, respecting, and showing sensitivity toward other children.

**Emotional Development**

A child’s ability to recognize and express feelings and to understand and respond to the emotions of others provides him/her with important emotional skills. Central to the understanding of emotional development is the overall perception of self; including traits, feelings, abilities, motives, and social roles. As a child acquires a self-concept, he/she begins to answer the question: “Who am I?” Another aspect of emotional development is self-efficacy, which is the belief that one can succeed in accomplishing what one sets out to do. Self-efficacy creates feelings of self-confidence, competence, and positive emotions that a child must have to be successful in learning tasks at home and at school.

Emotional development includes acknowledging emotions and the ability to manage or regulate them in both personal and social contexts. A child’s ability to identify and label his/her emotions and effectively express the range of feelings is another important aspect of emotional well-being. Emotional expression includes expressing primary emotions (joy, anger, fear), emotions linked to sensory stimulation (disgust, delight, horror), and self-appraisal emotions (pride, satisfaction, shame, guilt).

**Supporting Individual Differences, Language, and Diversity**

Children’s social identity is shaped by many factors including gender, race, cultural and family background and values, language, religion, abilities, life experiences and circumstances, and temperamental qualities and personality. Family and cultural stories help children build identities. The values and practices of each child’s family, peers, community, and culture shape the feelings, knowledge, and expectations that influence social and emotional development.
GOAL 27: CHILDREN TRUST, INTERACT WITH, AND SEEK ASSISTANCE FROM ADULTS.

Domain 3: Social and Emotional Development
Sub-Domain: Social Development

- Birth through 8 Months
- 6 to 18 Months
- 16 to 38 Months
- 36 to 60 Months
- 60 Months through Kindergarten

| 60 Months through Kindergarten | Use strategies to interact with familiar adults in a variety of situations. | - Shows confidence and positive feelings about relationships with significant adults in addition to primary caregivers (teachers, next door neighbors, custodian, bus driver).  
- Plays independently, but seeks comfort from adults when distressed.  
- Uses words to express needs and negotiates with adults.  
- Seeks adult assistance to resolve conflict or safety concerns.  
- Asks questions and checks with an adult before deviating from rules and routines.  
- Confides in at least one adult.  
- Demonstrates knowledge of culturally-specific communication styles and their appropriate uses. | - Offer child suggestions for overcoming challenges when he/she asks for assistance.  
- When a bias situation occurs, use the experience to discuss solutions and alternatives.  
- Offer opportunities for the child to talk about and be listened to around emotional issues; individually with trusted adults.  
- Model acceptance of individual differences.  
- Specifically identify trusted members of the community (what their role is).  
- Supports child’s social negotiations.  
- Engage in meaningful conversations with child, following child’s cues.  
- Offers increasing choices and independence within safe boundaries. |
## Domain 3: Social and Emotional Development

### Sub-Domain: Social Development

#### Interaction with Adults

**Goal 27:** Children trust, interact with, and seek assistance from adults.

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| First, Second, and Third Grades | Interact with familiar and unfamiliar adults in a variety of settings. | - Attends to facial cues, tone of voice, and uses situational and past experiences to determine how to interact with or ask assistance from adults.  
- Seeks help, when needed, before attempting a new task.  
- Becomes responsible and independent to get needs met.  
- Distinguishes ability, effort, and luck in attributions for success and failure.  
- Can wait for adult's attention.  
- Sees teachers and adults outside of family as trusted resources.  
- May deliberately seek adult approval.  
- Seeks adults for arbitration.  
- Evaluates own achievements against peers and perceived teacher’s expectations.  
- Initiates independent social interactions and responds to negative and positive interactions with adults, by the end of the period. | - Provide stable environment and routines throughout the day.  
- Offer opportunities to solve social conflicts without direct adult support.  
- Acknowledge a child’s pain, fear, and anxiety if the child is having difficult times with trusted adults (divorcing parents, economic trauma, or a loss).  
- Support child’s ability to explore new concepts, accept different expectations, and view self as a learner.  
- Acknowledge cultural values and beliefs about educators and education.  
- Communicate frequently with the child’s family to support them in the child’s education and learning.  
- Support various learning styles and rates of learning. |
GOAL 28: CHILDREN DEVELOP FRIENDSHIPS WITH PEERS.

Domain 3: Social and Emotional Development
Sub-Domain: Social Development

- Birth through 8 Months
- 6 to 18 Months
- 16 to 38 Months
- 36 to 60 Months

<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 36 to 60 Months | Use novel language, sounds, and meanings to initiate interaction with adults and peers. Use physical humor for social purposes. | - Likes simple verbal jokes/riddles, although may not be able to replicate format (Knock-Knock); pre-riddle stage.  
- Participates in group glee.  
- Mimics impersonation.  
- Uses slapstick, physical humor.  
- Laughs for the delight of laughing.  
- Uses body function humor.  
- Makes rude noises.  
- Makes up sounds and rhymes without meaning.  
- Combines nonsense and real words.  
- Uses distortions of familiar attributes/concepts (man’s head/dog’s body, changes in size, shape).  
- Laughs at gender reversals and incongruous actions (a cow on skates). | - Expect jokes and group silliness, know how to guide.  
- Monitor intensity of experience.  
- Use humor as a behavior management strategy.  
- Read silly books and sing silly songs.  
- Understand role of humor in cognition and social development.  
- Use humor as a tool for language development.  
- Clarify social humor between children.  
- Use joint attention, social referencing, and reciprocation with child when humor is tentative.  
- Clarify and support joking/humor between peers. |

</thead>
</table>
| 60 Months through Kindergarten | Use humor to consolidate understanding of concepts and language use. Use increased abstract thinking and humor as a social skill. | ▪ Uses more word play, rhymes, magic tricks, and jokes.  
▪ Begins to tell riddles and jokes with a format (Knock-Knock); riddle stage.  
▪ Participates in social interaction with humorous situations (silly pretend play).  
▪ Uses deliberate, humorously provocative actions.  
▪ Uses physical humor (jumping, silly walks).  
▪ Uses humor for leadership and group acceptance.  
▪ Likes gag jokes and toys (plastic poop or vomit).  
▪ Likes stories with funny characters, expressions, outcomes.  
▪ May use humor to initiate interaction with a trusted adult.  
▪ Uses humor with peers to initiate or extend social interactions. | ▪ Respond to and create opportunities for humor.  
▪ Recognize differences in expression/response of humor.  
▪ Provide books with wordplay and situational humor.  
▪ Understand role of humor in cognition and social development.  
▪ Use humor to extend child’s thinking.  
▪ Clarify jokes and humor for child who is slightly younger to scaffold understanding.  
▪ Find a riddle book and routinely engage child in “riddle time”.

| Birth through 8 Months | Begin to calm and soothe self for brief periods of time. | ▪ Signals needs with sounds or motions (cries when hungry or reaches for wanted object of comfort).  
▪ Relaxes or stops crying when comforted (when swaddled or spoken to softly).  
▪ Comforts self by clutching, sucking, or stroking when tired or stressed (calm while stroking or holding soft blanket; get fist, fingers, or pacifier to mouth for self soothing).  
▪ Cries or uses other vocalizations, facial expressions, or body language to express emotions and to get needs met.  
▪ Communicates need for support or help from adults (holds out arms when tired).  
▪ Anticipates routine interactions (lifts arms toward caregiver to be picked up).  
▪ Develops increasing consistency in sleeping, waking, and eating patterns.  
▪ Shows awareness of change and routine; may object to changes.  
▪ Responds to emotional cues and social situations (crying when other babies cry). | ▪ Snuggle, cuddle, and physically nurture child in ways appropriate to their specific sensory needs.  
▪ Respond to child’s signals for attention.  
▪ Check environment for appropriate levels of noise, temperature, light, and other stimuli. Be aware of environmental factors that might cause distress.  
▪ Establish routines for eating, sleeping, diapering, and other regular activities while taking into account family’s care practices and child’s schedule.  
▪ Be aware that babies cry to express a range of feelings, and respond appropriately.  
▪ Comfort a child quickly when he/she cries; this helps him/her feel safe.  
▪ Model and respond to child’s displays of pleasure by matching child’s emotions with facial expressions, tone, and words.  
▪ Respond to child’s displays of distress by staying with child and sensitively helping child with difficult feelings.  
▪ Nurture child with kind words, hugs, and cuddles being sensitive to individual sensory needs.  
▪ Encourage use of transitional object. |

§ Guide child’s ability to identify their own emotions and those of others.  
§ Provide opportunities for civic engagement.  
§ Provide opportunities for child to support each other. |
Domain 4: General Knowledge

Introduction

During the first few years of life, children gain greater knowledge and understanding of their environments. They develop skills in:

- Logic
- Reasoning
- Observation
- Imagination
- Problem-solving

Learning is facilitated and mediated by development of cognitive skills that include:

- Attention
- Memory
- Sensory awareness
- Analysis
- Interpretation

Exploration, play, repetition, and elaboration are key elements of these complex developing brain processes. Children connect learning experiences with their life and see the relevancy of the new knowledge. A child’s culture is foundational to how the child learns to use these process skills.

Rationale

The early childhood years encompass significant development of the child’s brain as well as the emergence of language and thinking. At birth, a child’s brain is nearly 30% developed; and by age 5, the brain is over 90% developed. (Shonkoff & Phillips, 2000) This rich and unique time of growth creates the foundation for later academic learning. The indicators in this domain are aligned with the Idaho K-12 Standards and are grounded in the research and best practices of early childhood development.

General Definition

For the purposes of the Idaho Early Learning eGuidelines, Domain 4: General Knowledge is divided into sub domains:

- Mathematics and Numeracy
- Science
- Social Studies
- Family, Community, and Culture
- Creative Arts

Mathematics and Numeracy

Mathematics and numeracy skills include skills for understanding and using numbers and quantity, special relations, numerous mathematical operations, measurements, and properties of ordering. These skills are essential for children to effectively navigate mathematical situations that arise in everyday life. (National Council of Teachers of Mathematics, 2009)

Science

Scientific thinking and knowledge skills include observation, building an understanding of cause and effect in the natural world, and making predictions. It is the development of scientific thinking that helps children apply and test their knowledge through methodical inquiry and verification. By acquiring scientific knowledge, children gain an understanding of and information about their surroundings.

Social Studies

Developing knowledge of social studies allows children to understand how people interact with and relate to the people in the world around them. Here, social studies include:
history and historical reasoning (includes concepts about time, past and future),
geography (includes weather, land forms, and impact of geography on humans),
economics (includes understanding very basic concepts of money markets),
ecology (includes the natural world around us), and
technology.

The goals in this section are based on recommendations from the Idaho State Department of Education Social Studies Position Statement, (2010-2016).

FAMILY, COMMUNITY, AND CULTURE

This aspect of cognitive development involves children learning how to interact with people in their families and the larger community.

CREATIVE ARTS

Children's ability to express and represent themselves through movement, music, theater, and visual arts are an outgrowth of cognition. Expressing and representing ideas through the arts is paired with an understanding and appreciation of the arts. The arts give children ways to express their feelings, experiences, and meanings in ways that go beyond the limits of language. This includes learning the symbolic and cultural arts traditions of their community and culture.

SUPPORTING INDIVIDUAL DIFFERENCES, LANGUAGE, AND DIVERSITY

Children differ in their rates of acquiring general knowledge and in the ways in which they learn, remember, and understand. For example, some children favor logical reasoning to tackle a learning task, while others take a creative or movement-based approach. Differences in children's cognitive approaches are not, and should not be viewed as deficits. Some children who have disabilities, developmental delays, or who are at risk for developmental delays, may require adaptations to support their development.
GOAL 39: CHILDREN DEMONSTRATE UNDERSTANDING OF NUMBERS, WAYS OF REPRESENTING NUMBERS, RELATIONSHIPS AMONG NUMBERS, AND NUMBER SYSTEMS.

Domain 4: General Knowledge
Sub-Domain: Mathematics and Numeracy

Birth through 8 Months
6 to 18 Months
16 to 38 Months
36 to 60 Months
60 Months through Kindergarten
### Domain 4: General Knowledge

**Sub-Domain: Mathematics and Numeracy**

**Number Sense and Operations**

**Goal 39:** Children demonstrate understanding of numbers, ways of representing numbers, relationships among numbers, and number systems.

</thead>
</table>
| Birth through 8 Months | Begin to develop awareness of quantity. | - Begins to show awareness of differences between people and objects.  
- Begins to show awareness of small quantity differences; looking at or reaching for two or more people or objects.  
- Begins to respond to the spoken concept, “more” in reference to food or play.  
- Shows cues of hunger and fullness.  
- Uses gestures to request “more.”  
- Responds by focusing on an object pointed to by someone. | - Count objects in child’s environment “out loud” in the home language.  
- Engage child in activities that show “more.”  
- Use counting finger-plays, songs, and number rhymes (One, Two, Buckle My Shoe).  
- Tell stories and read books with numbers and counting, and provide large age-appropriate magnetic numerals and multiple hand-size blocks.  
- Respond to child’s hunger and fullness cues with either more food or by withdrawing food.  
- Pair words for “more” with action around hunger, fullness, reaching for more toys, more hugs, or more music.  
- Feed infants in relation to hunger and fullness cues.  
- Comment on socks and shoes as they are put on the infant (e.g., say, “one shoe ... two shoes”). |

| 16 to 38 Months | Compare differences between two or more objects or groups of objects. Compare differences in the quantity of objects. | ▪ Matches objects by a single characteristic (size, color, shape, or quantity).  
▪ Sorts objects by a single characteristic (size, color, shape, or quantity).  
▪ May begin to imitate counting. Uses some number words (one, two . . .).  
▪ Recognizes that a single object is “one” regardless of size, shape, or other attributes.  
▪ Imitates counting rhymes or songs (Five Little Monkeys).  
▪ Recognizes some quantities (sees 2 blocks and says, “Two.”).  
▪ Manipulates sets of up to three items.  
▪ Uses words to symbolize quantity and comparisons of quantity (all, some, none, more).  
▪ Understands basic common relations (toothbrush and toothpaste).  | ▪ Use quantity concepts in everyday routines (e.g., Would you like one more or two more pieces?).  
▪ Pair objects during daily activities (one child gets one snack).  
▪ Provide child with math-related toys and objects from own and other cultural backgrounds, for grouping and counting.  
▪ Model using math and writing numerals in daily activities (using tally marks to count children who want milk).  
▪ Use counting finger-plays, songs, and number rhymes, repeatedly.  
▪ Tell stories, sing songs, and read books with numbers and counting, repeatedly.  
▪ Provide opportunities for child to fill and dump containers with objects at the water table and sand table.  
▪ Provide small table blocks and unit blocks for child to play and explore with. |
### AGE RANGE

<th>Caregiver Strategies</th>
</tr>
</thead>
<tbody>
<tr>
<td>36 to 60 Months</td>
<td>Use number words and concepts to explore and manipulate quantity, size, and relationships.</td>
<td>Develops understanding of counting process (recognition and naming numerals one, two and three); counting up to ten from memory in home language (e.g., recites, “one, two, three”), without assistance.</td>
<td>Talk aloud and engage child in meaningful counting and activities that incorporate simple math computations during daily routines (e.g., number of snacks needed for the number of children).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Counts up to ten objects; matching numbers one-to-one with objects (cubes, toys, and pennies) within daily activities.</td>
<td>Have child divide objects equally among a group of people (each child gets three crackers or five different color crayons).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Develops understanding that when counting items they must be counted only once, and that none should be left out.</td>
<td>Pose math questions relevant to daily life (e.g., “How many days until your birthday? How many days until the field trip?”).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Begins recognizing that the last number counted represents the “total objects” (for quantities up to ten). Counting is cumulative.</td>
<td>Estimate how many objects you have or will see and then count out loud (e.g., How many children are here, and who is not?).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Applies numbers and counting concepts within daily routines (count numbers of children at the table).</td>
<td>Engage the child in activities and interactions that use numbers and counting (play grocery store, engage child in recording inventories of canned goods or fish).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Applies counting to new situations (counting objects, counting groups).</td>
<td>Play culturally-appropriate card and board games using counting and number concepts with children.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Demonstrates understanding that numbers represent quantity (gets three apples out of the box).</td>
<td>Make available daily puzzles and manipulative materials that link numerals to pictures to represent quantity.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Uses math concepts (more, less, some, many, all, a few, none, huge, tiny, small, smaller, large, larger) to compare quantities.</td>
<td>Post numerals and icons (simple pictures) in the room to indicate group size limits for each learning center.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>May count backwards from ten.</td>
<td>Describe and explain how printed numbers have different meanings (speed limits, temperature, clock, prices).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Differentiates numerals from letters.</td>
<td>Use pictures to represent real life situations involving mathematical concepts (such as simple addition used in cooking recipes).</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Recognizes and names some numerals (pointing to written numerals named by adult).</td>
<td>Provide a variety of objects for the child to collect, handle, and</td>

</table>
| 36 to 60 Months | Use geometric modeling and spatial reasoning according to different dimensions.      | ▪ Engages in activities that explore and develop vocabulary such as length and weight, or capacity.  
▪ Compares amongst several objects based on one or more attributes (length, size, weight) using words such as “shorter”, “bigger”, or “lighter”.  
▪ Understands positional terms such as “between”, “inside”, “over”, “under”, and “behind”.  
▪ Sorts and classifies objects based on one or more attributes.  
▪ Orders objects by size, volume, height, weight, and length; with assistance.  
▪ Measures objects using variable nonstandard units.  
▪ Begins to measure objects using standard unit (one-inch cubes, paper clips).  
▪ Uses measuring tools in play activities (measuring tape, measuring cups).  
▪ Measures sand or water using a variety of containers.  
▪ Uses picture cookbook to follow sequence and measures amounts for cooking projects, with assistance.  
▪ Uses some vocabulary in relationship to measurement tools (scale, cup, ruler). May not have accurate understanding of meaning.  
▪ Estimates size (e.g., “I’m as tall as the yellow bookshelf.”).  
▪ Demonstrate, explain, and engage child in activities that use nonstandard measurement (use handfuls to measure rice, use footsteps to measure distance).  
▪ Demonstrate, explain, and engage child in activities that measure with standard measuring units (measure a wooden block using paper clips – is this a standard measuring unit?  
▪ Provide a variety of measuring tools (tape measures, rulers, balance scales, measuring cups) for child to use in purposeful ways.  
▪ Model and engage use of conventional measuring tools and methods in every day situations (during cooking, art projects, grocery shopping).  
▪ Continue to model language involving comparisons according to size, volume, weight, and height (length) of people, toys, and objects.  
▪ Play measuring games with child (e.g., “Which is heavier? “Which is longer?).  
▪ Display information using measurement graphs to visually compare activities and experiences (such as a growth chart of all the children in the class).  
▪ Model language and use body and objects using positional terms (behind, inside, on top, under). |

| 6 to 18 Months | By observing, begins to describe new or unfamiliar toys, objects, people, and events. | - Demonstrates interest in surroundings by focusing on familiar and unfamiliar faces, objects in different environmental settings (including plants and animals), and events.  
- Notices and begins to express individual wants and needs.  
- After repeated exposure to the same toys and objects, begins to explore new ways of using these materials.  
- Begins to notice and label objects and events in the environment.  
- Enjoys outdoor play.  
- Observes, and may play with and describe water, sand, and mud.  
- Observes and describes sun and clouds (sun is bright, clouds are white).  
- Begins to integrate the simultaneous use of more than one sense (uses sight, touch, and hearing by examining and shaking a toy).  
- Uses senses to explore characteristics of certain living things (scent of flower, rough texture of tree bark).  
- Shows some understanding of object permanence; looking for people and objects that have disappeared, with assistance. | - Provide appropriate space, time, and materials for child to explore (place child on floor with multi-dimensional objects and open-ended toys like blocks, containers, pots and pans, sand, mud, and water).  
- Safeguard the environment; maximizing freedom for exploration indoors and outdoors.  
- Encourage child to label and describe observable natural events (falling leaves and butterflies landing on flowers).  
- Support and encourage child’s descriptions, discussions, and exploration by smiling, nodding, and asking questions.  
- Read a variety of picture books with real-life photos or drawn/painted illustrations of familiar and unfamiliar living and nonliving things, and encourage child to point to and describe.  
- Provide opportunities to play jointly with caregivers, other children, and objects such as participating in an indoor/outdoor obstacle course.  
- Respect child’s explorations without predetermined outcomes or expectations. |
## Domain 4: General Knowledge

</table>
| 36 to 60 Months | Call attention to, describe, discuss, and explain observable similarities and differences among objects or events. | ▪ Shows interest and curiosity in exploring, investigating, and words to describe living and nonliving things.  
▪ Uses senses to explore materials, objects, and natural phenomena (sand, pine cones, crawling ants).  
▪ Makes comparisons and calls attention to details; and with adult assistance, explores the ways in which things are alike and different (notices how shells are the same or different; notices objects that float or sink; listens to different sounds that animals make).  
▪ Notices, describes, and predicts changes in the environment (dark clouds mean possible rain).  
▪ Observes, compares, classifies, measures, and communicates observations of events and objects.  
▪ Explores earth science, physical science, and life science through observations and experimentation with concrete objects.  
▪ Begins to use simple tools (magnifiers, lenses, droppers) for exploration and investigation.  
▪ Predicts the outcome of an investigation based on observation or experience.  
▪ Demonstrates respect for living things (watering plants, trying to avoid stepping on anthills).  
▪ Explores answers to questions, and forms new questions or conclusions.  
▪ Provide opportunities to explore, describe, and classify materials, objects, and natural phenomena using various senses (touch snow and feel how cold it is; listen to the sounds that different machines make at a construction site).  
▪ Provide opportunities to make and describe nature collages.  
▪ Provide opportunities to observe and explore different physical characteristics of living and nonliving things using investigative tools (magnifiers, droppers), with assistance.  
▪ Provide opportunities to examine and create nature collections such as rocks, shells, and insects.  
▪ Play “I Spy” by describing living and nonliving items in the immediate surroundings for the child to figure out.  
▪ Provide opportunities for child to select items and place them in a sensory bag for others to explore, describe, and identify.  
▪ Discuss which food items come from plants during snack time.  
▪ Compare different seeds found in fruit during snack or cooking.  
▪ Compare and describe different flower and vegetable seeds to be planted in a garden or pots.  
▪ Provide child with bubble solution and a variety of wands and household items (ladles with holes, spatulas, funnels, strawberry baskets, straws), and encourage them to describe and predict the bubbles each item makes.  
▪ Use lighting and different objects and describe their different shadows.  
▪ Provide opportunities to compare |
and describe the similarities and differences of living and nonliving things with photos or illustrations in books.

- Provide opportunities for child to describe living and nonliving items during “show and tell.”
## Domain 4: General Knowledge

### Sub-Domain: Science

**Scientific Inquiry**

### Goal 42: Children observe, describe, and collect information by exploring the world around them.

<table>
<thead>

<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 60 Months through Kindergarten | Collect, organize, and display results of observations to construct relationships that help them organize and make sense of the natural world. | - Uses observations, descriptions, and predictions to examine the natural world around them.  
- Increases awareness and understanding of the physical world as the child collects, organizes, and displays results of observations and experimentations.  
- Makes comparisons based on observations and vocabulary that includes descriptive and comparative words.  
- Makes inferences, draws more meaning than from what is visible, and predicts future events.  
- By describing events, compares predictions with what was observed.  
- Uses scientific tools that are not limited to observations, but also includes locomotion devices (gears and pulleys), technological tools, and measurement devices. | - Continue to invite curiosity and interest through experiences that encourage the child to explore, describe, and classify living and nonliving items using various senses (sand and water as it runs through fingers; sounds of different animals; making different size bubbles with household items).  
- Provide opportunities to organize, discuss, and draw conclusions based on observations about living and nonliving things using investigative tools (looking at a caterpillar’s sections through magnifier; using different household items to make bubbles).  
- Provide child with bubble solution and challenge them to find items in the classroom that will make bubbles.  
- Encourage child to make own drawings, stories, or books about living and nonliving things.  
- Provide opportunities for child to describe living and nonliving items during “show and tell” for others to figure out.  
- Provide child with an assortment of investigative tools and devices to explore and describe, draw, and write about (magnifiers, binoculars, telescopes, and microscopes; weights and balancing scales; tubes and funnels; bicycle chain and gear sprockets; animal guide books).  
- Encourage child to discuss how we get food from plants, animals, farms, fields.  
- Encourage child to assemble the needed materials and describe the different flower and vegetable seeds and the soil mixture needed to plant seeds in a garden or pots. |
- Encourage child to observe patterns and make predictions (e.g., "What happens to the lima bean planted in soil if it does not get any water?").

- Help child organize needed materials (paper, markers, crayons, scissors) to draw or create collage life cycles of insects, animals, and plants.

- Continue to read life cycle books like, The Hungry Caterpillar.

- Provide child with the needed writing materials to document, visually organize (create charts, graphs, tables), and display observation results (measuring the height of a sprouted lima bean; daily temperature pattern for one week).
GOAL 43: CHILDREN FURTHER ENGAGE IN EXPLORING AND MAKING SENSE OF THE NATURAL WORLD BY ASKING QUESTIONS AND MAKING PREDICTIONS ABOUT CAUSE AND EFFECT RELATIONS THAT CAN LEAD TO GENERALIZATIONS.

</table>
| 36 to 60 Months | Investigate unfamiliar phenomena and both trial and error (sometimes systematic trials), with assistance. | - Uses senses and develops strategies (from trial and error) to solve problems.  
- Explores the use of investigative tools to extend the senses in a trial and error fashion.  
- Eagerly observes, describes, and predicts the world around them.  
- As child investigates new phenomena, makes progress from trial and error toward a more systematic approach to problem solving.  
- More apt to verbalize observations than ask meaningful questions.  
- Uses questioning as a way to engage conversation rather than as an intended means for gathering information.  
- Shows curiosity and interest about familiar/unfamiliar and living/nonliving things.  
- Begins to demonstrate respect for living things.  
- Eagerly observes, describes, and predicts the world around them.  
- Makes simple predictions and inferences about cause and effect relations based on observations, explorations, and experimentations with objects and events in the natural world.  
- Compares their predictions with actual observations.  
- Begins making predictions about changes in the environment that lead to generalizations based on understanding. | - Create an environment that inspires child to have ideas and figure out how to do something.  
- Encourage child to try out ideas, make mistakes, and develop contradictions.  
- Encourage child to actively explore, compare, and describe safe natural materials (leaves, shells, snow, and food items) according to observable similarities and differences.  
- Encourage child to observe patterns and offer possible predictions through questions (e.g., “What will happen if we put this flower in a vase without water?”).  
- Provide child with bubble solution and a variety of wands and household items (ladles with holes, spatulas, funnels, strawberry baskets, straws) and encourage them to question and predict what kind of bubbles different types of wands will make.  
- Provide child sand, water, mud, pebbles, and grain for pouring and help child question what will happen.  
- Provide child with simple machines to take apart and put back together (flashlight).  
- Provide different toys with wheels or differently shaped objects and slopes to observe and question how they might move.  
- Provide child opportunities to explore, observe, and describe the different properties of magnets with different materials (cloth, plastic toys, nuts and bolts, coins).  
- Provide a variety of natural experiences that encourage child
to explore, describe, and classify according to interests (e.g., “Which of these insects crawl and which ones fly?”).

- Encourage child to act on their own observations of patterns and make predictions (add more milk to pancake batter during cooking activity).

- Encourage child to compare their predictions with what they see (e.g., “Did the pancakes turn out the way you wanted when you added more milk?”).

- Provide opportunities for child to mix colors using paint, play dough, colored water).

GOAL 44:  CHILDREN DIFFERENTIATE BETWEEN PEOPLE, PLACES, ACTIVITIES, AND EVENTS IN THE PAST AND PRESENT THAT RELATE TO SELF, GROUP IDENTITY, AND A SENSE OF THEIR COMMUNITY.

Domain 4: General Knowledge
Sub-Domain: Social Studies

Birth through 8 Months
6 to 18 Months
16 to 38 Months
36 to 60 Months
60 Months through Kindergarten
**Domain 4: General Knowledge**

**Sub-Domain: Social Studies**

Social studies are defined as the integrated study of the social sciences. The social studies curriculum draws upon such disciplines as anthropology, archaeology, economics, geography, history, law, philosophy, political science, psychology, sociology, and world affairs. (Idaho State Department of Education Social Studies Position Statement, 2010-2016)

Children learn about government/civics through personal experiences as a family member, as a classroom member, and as a member of the community in which they live. Children start to learn about democracy by having many opportunities to live, work, and resolve problems with others. Preschool experiences help children understand and respect their own history, how people are similar and different from each other, and how people in communities help each other.

| 6 to 18 Months     | Engage and respond to familiar people, places, activities, and events within their family, program, community, and culture. | • Recognizes and responds to familiar people, places, activities, and events (runs to mother for comfort; reaches out for favorite toy).  
• Demonstrates awareness of self and body image (enjoys mirror image and movement).  
• Anticipates, demonstrates, and begins to express enjoyment in response to a familiar setting, group, or routines with trusted primary caregivers.  
• Demonstrates expectations for familiar sequence of events in daily routines.  
• Demonstrates awareness and responds to familiar activities (songs and stories) from the home culture.  
• Develops and maintains trusting relationships with primary caregivers and family members.  
• Begins to engage in cooperative pretend play with peers around familiar activities and routines (cooking, cleaning, yard work).  
• Increases awareness of where things are located in the environment. | • Find ways to build a sense of community through activities that respect and reflect each child’s home environment.  
• Talk to and listen respectfully to all children.  
• Model respect for diversity.  
• Continue to provide opportunities to begin exploring awareness of self and familiar others through touch, photographs, mirrors, and video and sound recordings.  
• Encourage child to point as an adult describes physical similarities and differences among familiar children and adults during daily activities and routines.  
• Show books and encourage child to point to photos and illustrations of children and adults from different regions, cultures, or countries.  
• Provide ongoing opportunities for child to observe and interact with other children and caregivers in familiar settings.  
• Arrange the room, space, and materials/toys so that two or more children (including those with special health concerns/needs) can play alongside each other. |
- Recognizes that people move in and out of their immediate environment.
- Begins to explore familiar environments (within home, child care, familiar spaces).
- Pays attention to adult use of common technological devices and begins to imitate the use of devices (computer, cell phone).
- May show interest in daily community routines (lawn mowers, road construction, garbage trucks, trains, plains).

and begin to interact and share the toys/materials.
- Provide space, time, and materials from the home culture for each child to use in imitating actions, simple roles, and in pretend play.
- Describe and encourage child to play pretend play (pretending to eat or drink).
- Provide labeled space with child’s printed name and current photo where child’s possessions are kept and demonstrate how child can retrieve and store personal items.
- Demonstrate and encourage child to participate in finger-plays and sing songs from the child’s home language or culture.
- Display child’s family photos and encourage child to point to and name family members.
Social studies are defined as the integrated study of the social sciences. The social studies curriculum draws upon such disciplines as anthropology, archaeology, economics, geography, history, law, philosophy, political science, psychology, sociology, and world affairs. (Idaho State Department of Education Social Studies Position Statement, 2010-2016)

Children learn about government/civics through personal experiences as a family member, as a classroom member, and as a member of the community in which they live. Children start to learn about democracy by having many opportunities to live, work, and resolve problems with others. Preschool experiences help children understand and respect their own history, how people are similar and different from each other, and how people in communities help each other.

</table>
INTRODUCTION

Communication, language, and literacy are recognized as essential for all individuals to function in all societies. The acquisition of language and literacy skills is a complex process during which, over the course of only a few years, children learn the meaning and structure of words, how to use words to convey meaning, and how to understand and use printed materials. Language plays a central role in the child’s ability to build relationships by sharing meaning with others. Skills for speaking and writing, and listening and reading are key components. In acquiring language, children gain the ability to articulate ideas and feelings, share them with others, and respond to the ideas and actions of other people.

RATIONALE

When language is acquired, an incredibly complex and powerful system is at the child’s fingertips. The ability to communicate effectively - through oral language, the written word, and alternate means (especially for children with speech, language, and hearing disabilities) - is essential for a broad range of activities that characterize daily living. To participate in a broad range of daily activities, children need the ability to communicate effectively through oral language, the written word, creative expression, and a variety of other means. Language is also a mediator of social competence. Children use language as a tool to express their thoughts, feelings, and ideas to others; and to receive, understand, and interpret communications from other people.

Children acquire language skills in the context of a culture. No matter which language is being learned (e.g. English, American Sign Language, Spanish); the vital role of children’s opportunities to practice the language cannot be neglected. Language is fundamentally embedded in children’s everyday relationships and experiences. Parents, primary caregivers, and teachers play a critical role in facilitating young children’s language and literacy development by providing exposure to language and print-rich environments, interactions, and opportunities.

GENERAL DEFINITION

The Idaho Early Learning eGuidelines define communication, language development, and literacy skills as separate components in order to highlight the essential aspects of each. However, the three components are inextricably interrelated. The development of oral language forms the foundation for early literacy development, just as the ability to communicate early in life impacts the development of vocabulary and speech.

COMMUNICATION

Communication is both making meaning of what is being communicated by others, and communicating ideas to others. Children communicate before mastering symbolic language. Their “communicative competence” is dependent upon a complex set of skills including, but not limited to, awareness of the social conventions of language usage; and the ability to listen, to understand, and to follow verbal conversation. Development of communication skills requires an understanding of the social context within which communication occurs, knowledge of the goals of the interaction, and the elements of emotion in communication. Children learn a variety of styles of communication and ways of expressing emotions, which are determined by the specific social setting; whether it is in the home, at preschool, on the playground, a cultural event, or at a store.

LANGUAGE DEVELOPMENT

Language is the acquisition of linguistic forms and procedures, social rules, and customs for expressing and interpreting thoughts, feelings, and ideas. This knowledge of language has three key aspects: content (vocabulary and meaning), form, (grammatical structure or syntax), and use (function). As children learn the sound system, the meaning of words, and the rules of form and grammar, they begin to use language constructively in social situations.

LITERACY

Literacy, as defined in the Idaho Early learning eGuidelines, involves the ability to use language, symbols, and images in a variety of forms to read, write, listen, speak, represent, observe, and think critically about ideas. Emergent literacy (acquired during the early years of life) refers to skills and behaviors that are precursors to conventional forms of reading and writing. These include visual expression, oral language, emergent reading, print awareness, and writing processes.
**Supporting Individual Differences, Language, and Cultural Diversity**

Children learn words and forms of language to express their thoughts, feelings, and ideas. They also learn language to meet personal and social objectives as determined by the community and culture within which they live and grow.

Several million young children in the United States speak a language other than English in their homes. Children benefit cognitively from learning two or more languages. The ability to communicate in more than one language supports children’s cognitive flexibility and an awareness of their own thinking about words as symbols.

Children learn second languages in two ways; either by acquiring two or more languages at the same time, or by learning a second language after mastering the “home language” (i.e., first language learned and primary language used at home). Children who follow the former path to dual language learning (i.e., simultaneous learning of more than one language) are said to be “bilingual,” as a first language. Children who learn two languages from birth operate with two separate language systems and it is typical that they may mix words from the two languages in the same sentence for a short time. For children who follow the latter path to dual language learning (i.e., sequential learning of more than one language), their competence in the home language can be supported while they are learning a second language. Rather than focusing on one language over another, the child can acquire both with support for achieving growth and fluency in both languages. Some children go through a “silent period” when learning a second or third language. Parents, educators, and caregivers can continue to talk to children and give them time to speak in the second language when they are ready. If their home language is actively supported and valued, children will learn English or another language faster. Given the growing number of young children in Idaho whose home language is not English, the eGuidelines provide indicators and strategies to support the development of children’s home language while helping children acquire beginning proficiency in English.

Children’s communication, language, and literacy may be impacted by visual, hearing, neurological, or motor disabilities. While it may take some children months to acquire aspects of language, it may take other children considerably longer. Delays in language development may indicate that a child has a hearing loss or developmental delay or disorder. Early diagnosis and intervention for language delays are critically important.

<td>▪ Responds to questions with appropriate answers.</td>
<td>▪ Provide opportunities for child to be heard.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>▪ Attends to an adult or peer who is speaking.</td>
<td>▪ Create times when children in groups come together to listen to information.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>▪ Follows multiple-step oral directions.</td>
<td>▪ Provide a listening center for child to listen to books, music, or other media.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>▪ Attends to complex stories.</td>
<td>▪ Provide clear instructions that help child move from simple directions to an increasingly complex sequence of actions.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>▪ Has a growing ability to discern fantasy from reality.</td>
<td>▪ Ask questions and give prompts about events in the past, present, and future.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>▪ Is working on understanding yesterday, today, and tomorrow.</td>
<td></td>
</tr>
</tbody>
</table>
## Domain 5: Communication, Language, and Literacy

### Sub-Domain: Communication

#### Listening

**Goal 48:** Children demonstrate the meaning of language by listening.

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 60 Months through Kindergarten | Interpret messages in conversations, directions, music, and stories with increased complexity. | - Attends to book reading/story telling for at least five minutes.  
- Listens to others and responds in group conversations and discussions.  
- Notices different tones and cadences (recognizes the difference between humorous and serious voice inflection).  
- Enjoys listening to stories from different sources (in person, on the radio). | - Provide opportunities for child to be heard, to promote listening skills during group conversations (child must listen when other children speak).  
- Create times when children in groups come together to listen to information (elder tells story during circle time; caregiver explains significance of totem pole characters).  
- Listen to an audio story, a story on the radio, or musical selection with child and help him/her to interpret the story (through words, art forms, dance, acting). |
GOAL 49: CHILDREN COMMUNICATE EFFECTIVELY.

| 36 to 60 Months | Use communication with purpose to convey a message. | ▪ Asks and answer simple questions (what, where, when).  
▪ Relays a simple message.  
▪ States opinions and preferences using words, signs, or picture boards.  
▪ Speaks clearly enough to be understood by most listeners.  
▪ Describes objects and events in detail.  
▪ Initiates conversation by making statements or asking questions (why, how, what, where).  
▪ Expresses an idea in more than one way.  
▪ Uses character voices when retelling a story or event.  
▪ Uses multiple-word sentences to communicate.  
▪ Responds meaningfully in conversation with adults and peers.  
▪ Adjusts communication style appropriately to a variety of settings.  
▪ Starts to dictate stories or messages for adult to write out.  
▪ Listens while engaged in conversation in order to extend or connect an idea expressed.  
▪ Makes comments related to the topic being discussed. | ▪ Practice songs, poems, and nursery rhymes.  
▪ Ask questions about familiar stories and events.  
▪ Speak clearly to child.  
▪ Encourage child to express opinions, feelings, and ideas.  
▪ Use puppets to retell stories.  
▪ Provide opportunities to make choices and plans.  
▪ Ask open-ended questions that can be answered by child in own way, to eliminate the need for right or wrong answers.  
▪ Accept child’s response to your open-ended questions.  
▪ Invent creative games like “message relay,” where child retells a message in a group.  
▪ Play mime games that use the body to tell a story or express an idea.  
▪ Engage child in conversation about a child-selected photograph or object.  
▪ Provide opportunities to speak or perform in front of a group and acknowledge the effort.  
▪ Provide opportunities for self-expression and creative representation (drawing materials, blocks, musical instruments for made up songs).  
▪ Recognize and encourage alternate forms of communication (dance, drumming, sign, storytelling).  
▪ Provide opportunities for socialization in home language. |

<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 36 to 60 Months | Actively seek and engage in social interactions. | - Attends to speaker during a conversation.  
- Seeks interaction with others (e.g., “Sing along with me,” “Read a story.”).  
- Interprets subtle, nonverbal cues.  
- Asks for help.  
- Initiates and takes turns in group conversations.  
- Recognizes appropriate time to enter conversation.  
- Recognizes rising and falling intonations and what they mean (difference between a “what” question and a statement).  
- Begins to demonstrate understanding of nonverbal cues (facial expressions for pride, displeasure, encouragement).  
- A bilingual child can adjust language and communication form according to the person with whom he/she is speaking.  
- Uses and interprets appropriate language depending on the purpose.  
- Communicates appropriately with peers during play.  
- Defines the expectations during play.  
- Relates personal experiences to others. | - Talk and play frequently.  
- Set up dramatic play opportunities.  
- Create some situations where child needs to ask for help.  
- Use props and role-play to encourage child to participate in group conversations.  
- Read or tell stories that involve children sharing ideas.  
- Make special time to sit down for leisurely conversations that are of interest to the child.  
- Provide opportunities for interaction within child’s own social conventions and also other languages and cultural groups.  
- Turn off a video or T.V. after 5-10 minutes and discuss the movie or show with the child.  
- Provide child with opportunities for problem solving.  
- Ask child to describe their play.  
- Use peer models especially for more reticent children. |
### Conventions of Social Communication

**Goal 50:** Children comprehend and use conventions of social communication.

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 60 Months through Kindergarten | Use appropriate social conventions in communication with adults and peers. | - Uses language appropriately with different audiences (uses different words with peers and adults), most of the time.  
- Uses language appropriately depending upon the purpose (to tell stories, get information, ask for help), most of the time.  
- Adjusts intonation and volume in a variety of settings (whispers when a baby is sleeping).  
- Engages appropriately in communication with peers during play (talking, listening, gesturing). | - Engage child in play and conversations that help him/her practice appropriate social conventions (pretend to go to the grocery store or post office).  
- Provide opportunities for child to engage in conversations in a variety of situations (at the playground with peers, at the post office with the postal worker, elders at family and community gatherings). |

| 36 to 60 Months | Use responses that demonstrate an increased knowledge of specific concepts. | ⚫ Identifies objects by category.  
⚫ Identifies objects by attribute.  
⚫ Responds to who, what, where, why, and when questions.  
⚫ Understands simple time concepts (tonight, tomorrow, yesterday).  
⚫ Understands relationships expressed by if then, or because sentences.  
⚫ Begins to identify shapes and colors.  
⚫ Understands number concepts (one, all, sets).  
⚫ Correctly answers yes and no questions.  
⚫ Responds appropriately to a request (e.g., “Bring me the green towel.”).  
⚫ Has a receptive vocabulary of several hundred words in home language.  
⚫ Distinguishes between real and made-up words.  
⚫ Recognizes and responds to some family and traditional stories and their meanings.  
⚫ Identifies parts of an object.  
⚫ Shows interest in why and how things work.  
⚫ Follows simple directions.  
⚫ Identifies verb tense in pictures.  
⚫ Understands full adult sentences.  
⚫ Responds to opposites, comparatives, and superlatives.  
⚫ Appreciates absurdities.  
⚫ Responds to how questions.  
⚫ Recognizes and follow routines.  
⚫ Follows a change in a routine that has been described. | ⚫ Talk, sign, sing, and read to child.  
⚫ Read colorful books with words to child.  
⚫ Play advanced word games (I Spy).  
⚫ Use the environment to encourage discussion of familiar objects, places, and people.  
⚫ Use adult-like language when conversing.  
⚫ Discuss abstract concepts listed above.  
⚫ Help the child better understand his/her world through the use of descriptive language.  
⚫ Use increasingly complex words, in context, and explain their meaning when talking with child.  
⚫ Provide opportunities for child to listen for new words in the environment and identify them when heard.  
⚫ Make photo “books” for child for identifying people, places, animals, of personal interest.  
⚫ Play “placement games” to show understanding of prepositions (e.g., “Put the ball under/on top of/next to the table.”).  
⚫ Converse naturally about what child is doing, listening to, and seeing.  
⚫ Facilitate and encourage peer language interactions in activities, pretend play, and outings.  
⚫ Provide opportunities for child to view art from their and other cultures, and explain the related stories (totem poles and/or masks).  
⚫ Invite family members and community leaders to tell traditional stories rich with cultural language and images. |
- Include child in family and community activities that include traditional songs, stories, and dances.
- Introduce a variety of new experiences to child (library, zoo, parks, shopping).
- Use expanded adult language when conversing.
- Discuss concepts from stories read.
- Establish routines in the child’s world.
- Compare and contrast objects and actions for the child.

**DOMAIN 5: COMMUNICATION, LANGUAGE, AND LITERACY**

**SUB-DOMAIN: LANGUAGE**

**VOCABULARY**

**GOAL 52: CHILDREN USE EXPRESSIVE VOCABULARY.**

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 16 to 38 Months | Use words and simple phrases with intent. | • Increasingly uses words and phrases.  
• May exhibit a period of silence when learning a second language.  
• Expands vocabulary rapidly (up to 1,000 words by 36 months).  
• Initiates gestures.  
• Initiates communication.  
• May ask “wh” questions (why and what).  
• Asks others to label unfamiliar objects.  
• Starts to use short sentences.  
• Uses personal pronouns (e.g., “Me do it.”).  
• Uses attributes (descriptive words - big boy, red ball). |
|                 |                      | • Expect child to use words to express needs and wants.  
• Talk, sign, sing, and read to young child.  
• Expand child’s sentences with descriptive responses (child says, “ball;” you respond, “here is the red ball.”).  
• Model simple sentences.  
• Encourage use of pronouns from child’s point of view (e.g., “I want milk,” rather than, “Susie wants milk.”).  
• Avoid baby talk.  
• When child is attempting to communicate, assume he or she has something important to say and listen carefully. Try to understand the meaning before you respond.  
• Engage in rich and meaningful conversation about child’s real life in child’s home language.  
• For an English Language Learner (ELL), learn and use key words in child’s home language including “signs,” if appropriate.  
• When replying to child’s attempts to communicate, confirm his or her intentions and then extend the topic.  
• Explain meanings of words to child during conversations.  
• Provide opportunities for child to distinguish between real and nonsense words in home language (sing songs that play on words). |

| Birth through 8 Months | Initiate and respond to change and variety in sounds. | ▪ Makes sounds to indicate pleasure, discomfort, wants, or pain.  
▪ Varies intonation, volume, and plays with sounds.  
▪ Strings together varied intonation patterns. | ▪ Respond to child’s vocalizations by giving attention, smiling, or talking back.  
▪ Use playful sounds in interactions with the child.  
▪ Use descriptive talk during daily routines (changing diaper, feeding).  
▪ Use animated expressions and language.  
▪ Describe feelings (hungry, tired, wet). |
**GOAL 53**: **CHILDREN DEMONSTRATE PROGRESSION IN GRAMMAR AND SYNTAX.**

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 6 to 18 Months | Begin to use intonation and single words to communicate. | - Strings together varied intonation patterns.  
- Uses no for negation.  
- Uses intonation to indicate meaning.  
- Uses single word speech (one word to communicate message; child says, "up" when wanting to be carried by adult) or beginning sign language and symbols ("more," nurse/bottle," all done).  
- Uses some pronouns (mine).  
- Says short telegraphic sentences (e.g., "Me go." or "There mama."). | - Respond to child’s vocalizations and gestures.  
- Verbally describe child's interactions with the environment (e.g., "You want the bottle." "You like your blanket.").  
- Describe feelings (hungry, tired, wet).  
- Give child wait time to encourage turn-taking.  
- Create opportunities for need to communicate.  
- Acknowledge child's efforts when he/she uses words and/or beginning baby sign language to communicate.  
- Speak in simple sentences using a combination of words and "baby signs" when communicating with child.  
- Use language in daily routines, talk with child, and associate words with actions (e.g., "First, we wash our hands; then we dry them; next, we open the refrigerator; then we take out the milk; next, we pour it in a glass.").  
- Make conversations enjoyable and fun for child.  
- Use finger plays, lullabies, and songs from both child's home and other languages.  
- Communicate with family to learn words, gestures, "signs," and "baby games" familiar to child that reflect his/her personal cultural experience. |
### Domain 5: Communication, Language, and Literacy

#### Sub-Domain: Language

#### Grammar and Syntax

**Goal 53:** Children demonstrate progression in grammar and syntax.

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 16 to 38 Months | Move from using simple words to more complex word order, word combinations, and word endings to convey meaning more fully. | - Uses words and phrases.  
- Uses primary pattern of noun plus verb.  
- Experiments with word endings (-ing, regular plural - s, past tense - ed, and possessives – ‘s).  
- Uses negation in phrase form (e.g., “No milk.” “Not open.”).  
- Includes adjectives with appropriate placement  
- Increases phrases from two words to three and four words.  
- Uses three to four-word sentences with noun and verb.  
- Describes a self-made drawing.  
- Uses simple questions in speech, but may not use correct grammar. | - Encourage child to use words to express needs and wants.  
- Talk, sign, sing, and read to child.  
- Expand child’s sentences with descriptive responses (e.g., child says, “ball,” respond, “here is the red ball.”).  
- Model simple sentences.  
- Encourage use of pronouns from child’s point of view (e.g., “I want milk” rather than, “Susie wants milk.”).  
- Speak with child in complete sentences using correct grammar.  
- Engage child in conversations that require more than a single word response.  
- Read books from child’s home language and in other languages, if possible.  
- When asking child questions, make sure to wait long enough for child to answer. Some children need more time to understand questions and put together words.  
- Recognize that English Language Learners (ELL) may mix words from different languages in the same sentence. Repeat what child said using all the words in the same language.  
- Provide play opportunities that encourage children to engage in conversation with one another and to tell family stories.  
- While sitting with child during meals and snacks facilitate and model conversation using complete sentences.  
- Engage child in a game using a small stuffed animal to demonstrate prepositions while saying, “The teddy bear is in the box” or “The teddy bear is next to the chair.” |
**Goal 53: Children demonstrate progression in grammar and syntax.**

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 36 to 60 Months | Use basic conventions of grammar and syntax. | ▪ Uses articles in sentences (the ball, a cat).  
▪ Uses complete sentences in conversations during play with peers.  
▪ Begins to use correct question forms.  
▪ Begins to use prepositions.  
▪ Talks in sentences with five to six words to describe people, places, and events.  
▪ Uses more complex grammar and parts of speech.  
▪ Describes a task, project, and/or event sequentially in three or more sentences.  
▪ Asks questions for information/clarification.  
▪ Uses sequence sentences in logical order.  
▪ Begins to correctly use subject and verb tense.  
▪ Strings multiple sentences together in logical order.  
▪ Uses complex grammar and parts of speech.  
▪ Combines more than one idea using complex sentences. | ▪ Engage child in conversation and give wait time for a response.  
▪ Provide multiple experiences in the community and discuss them.  
▪ Talk, sign, sing, and read to child.  
▪ Model adult sentences in conversation.  
▪ Ask open-ended questions (e.g., “What do you think?” “What do you think will happen if . . . ?” “What if . . . ?”) After child answers, repeat the answer in a complete sentence or sentences.  
▪ Engage child in meaningful conversations during daily routines.  
▪ Set aside a regular time during daily routine to engage child in meaningful conversation (if child is bilingual, in both languages separately, at different times of the day).  
▪ Let child know that you recognize all languages and means of expression as a valid means of communication.  
▪ When reading with child, point out how text progresses from word to sentence to paragraphs.  
▪ Model good grammar.  
▪ Ask questions that reference time concepts (e.g., “What did you have for breakfast yesterday?”).  
▪ Encourage adult sentence forms in conversation. |
### Goal 53: Children demonstrate progression in grammar and syntax.

<table>

| 60 Months through Kindergarten | Demonstrate increasing skills in print directionality and understand that print holds meaning. | ▪ Demonstrates how to follow text in proper order on a written page while reading or following along (for English: left to right and top to bottom).  
▪ Recognizes difference between letters and numbers.  
▪ Identifies letters in first name.  
▪ Points to the title of a book when asked.  
▪ Reads familiar sight words (names on cereal boxes).  
▪ Reads own first name and those of some peers.  
▪ Reads some environmental print (bus).  
▪ May recognize when something is written in his/her home language. | ▪ Demonstrate, explain, and provide opportunities for child to use books; introducing the parts of a book (title page, front and back covers).  
▪ When reading with child, use punctuation to create natural breaks (e.g., “Let me finish this sentence before I answer your question.” When the sentence is complete, point to the period to indicate the end of the sentence.).  
▪ Use child-made books to identify parts of the book.  
▪ Acknowledge child when he/she uses printed matter appropriately (looks at the picture on the cover page to find what the book is about).  
▪ Provide a variety of printed materials including books in play areas (cookbooks, catalogues, junk mail, magazines).  
▪ Provide opportunities and materials to create books; having child dictate story and then draw pictures.  
▪ Label shelves and toy containers with picture and printed word; progress to print only. |
GOAL 59: CHILDREN DEMONSTRATE COMPREHENSION OF PRINTED MATERIALS AND ORAL STORIES.

<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 6 to 18 Months  | Pick up objects with increasing control.  | § Uses palmer grasp (fist) to hold writing tools.  
 § Picks up small items using pincer grasp.  
 § Crosses midline with hands.  
 § Passes objects from one hand to the other. | § Allow child to finger feed small bits of food from a tray or flat surface (peas, cereal, raisins). Provide supervision.  
 § Encourage child to pick up thin books and papers from a flat surface.  
 § Hold the end part of child’s crayon as the child makes marks on a writing surface. Gently guide the crayon through the desired motion, pairing with an auditory cue (round and round).  
 § Offer large crayons and paint brushes to draw on paper while adult writes letters or pays bills. |
**Domain 5: Communication, Language, and Literacy**

**Sub-Domain: Literacy**

**Writing**

**Goal 62: Children use writing skills and demonstrate knowledge of writing conventions.**

</tr>
</thead>
</table>
| 16 to 38 Months | Begin to use tools to write and draw. | ▪ Adjusts body position to facilitate writing.  
▪ Holds paper with one hand while writing with the other hand.  
▪ Copies vertical and horizontal lines.  
▪ Makes circular motions with writing utensil.  
▪ Uses a variety of writing tools.  
▪ Begins to use fingers to hold writing tools instead of fist.  
▪ Uses whole arm to make writing movement.  
▪ Scribbles and make marks on paper purposefully.  
▪ Names scribbles (tells others what scribbles mean).  
▪ Pretends to write on paper, without regard to location or direction. | ▪ Provide opportunities for the child to draw.  
▪ Model appropriate grasp of writing and drawing tools.  
▪ Write and draw with a child exploring various mediums.  
▪ Discuss and identify figures that the child draws (e.g., “That’s a circle.” “That’s a straight line.”).  
▪ Write child’s comments at the bottom of drawings, collages, or photos.  
▪ Engage child in writing in a variety of play settings.  
▪ Provide opportunities for child to draw and paint in a variety of positions (while standing, outdoors on a hard surface, kneeling on floor). |
## DOMAIN 5: COMMUNICATION, LANGUAGE, AND LITERACY

### SUB-DOMAIN: LITERACY

### WRITING

**Goal 62:** Children use writing skills and demonstrate knowledge of writing conventions.

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Developmental Growth</th>
<th>Child Indicators</th>
<th>Caregiver Strategies</th>
</tr>
</thead>
</table>
| 36 to 60 Months | Use tools to write and draw with increasing coordination. | ▪ Uses tripod grasp to hold writing tools.  
▪ Begins to demonstrate hand preference for writing.  
▪ Uses whole arm and finger movements to write.  
▪ Intentionally scribbles to convey meaning; tells caregiver what it means.  
▪ Makes strings of letters or marks from left to right.  
▪ Begins to copy simple shapes.  
▪ Draws a basic six (plus)-part person with some detail and content.  
▪ Intentionally scribbles or writes to convey meaning.  
▪ Uses invented spelling with letters and marks to represent words.  
▪ Uses letter-like symbols to express an idea.  
▪ Writes some letters or numerals.  
▪ Prints or copies first name.  
▪ Attempts to copy words from print.  
▪ Draws basic geometric shapes (circle, triangle).  
▪ Uses pretend writing activities during play to show print conventions in home language.  
▪ Uses letters and symbols to label or convey directions (SV for Save sign on block building). | ▪ Model the process of drawing lines, circles, and stick figures.  
▪ Provide a variety of art mediums (finger paint, poster paint with easel, pudding to paint with).  
▪ Encourage appropriate grasp to hold writing and drawing tools.  
▪ Encourage preferred hand for writing and drawing.  
▪ Engage child in activities to develop fine motor control (clay, play dough, lacing boards, beads, stencils, lighted peg games, eye-droppers, tongs, and clothespins).  
▪ Cut child’s name into a puzzle, and have them put it back together in proper order.  
▪ Dictate child’s stories word for word and read it back.  
▪ Provide an accessible writing area for child with smooth writing surface, writing tools, and paper.  
▪ Provide paper and writing tools (and/or if you choose to use one, access to a computer) for child to use for specific purposes.  
▪ Positively acknowledge child’s attempt to write. Ask them to read you their words.  
▪ Provide a “sign-in book” for child to sign in each day.  
▪ Ask child to “sign” artwork, cards, and letters.  
▪ Point out the shapes of individual letters to help child learn letters.  
▪ Write down child’s dictations and read back exactly what he/she said (for English language learner, in both languages).  
▪ Provide opportunities to talk about what child notices about two different writing systems (especially appropriate for ELL students). |
Provide a variety of writing materials in dramatic play areas, art area, with blocks, cars, etc. Engage child in using materials (take orders for pizza using a notepad in the play kitchen, make tickets to see the art museum, write speeding tickets when playing with cars, draw and label a block structure when child is finished building it).

Explain to child the reason we are writing something down (e.g. "We will write a list so that we know what to buy at the grocery store." "Let’s write a thank you note.").

| 60 Months through  | Demonstrate varying competency in learning English depending on age, onset, and amount of language exposure. Uses appropriate forms of communication for a variety of purposes in home language; vocabulary continues to increase. | ▪ Recognizes the difference between words spoken in home language and words spoken in English.  
▪ Exhibits a gap between conversational language and instructional language.  
▪ Makes consistent grammatical errors (mans for men).  
▪ Begins to understand that non-family adults and peers may not understand home language.  
▪ Follows multi-step directions in home language and single-step directions in English.  
▪ Demonstrates understanding of words used in the home language that are different from English.  
▪ Re-tells a simple story told in the home language but may only be able to re-tell a few words from a story told in English. | ▪ Provide opportunities for child to acquire competency in home language and English.  
▪ Use books in English that have repetition and are predictable.  
▪ Use home language alongside English in activities (counting to 10, talking about the weather, reciting the alphabet, naming colors).  
▪ Provide opportunities for child to share words from home language with other children.  
▪ Provide an environment of acceptance that supports and respects the home language by bringing the home language to settings.  
▪ Provide opportunities for child to practice communicating in English through natural and meaningful conversation.  
▪ Develop a plan for child’s continued use of the home language and acquisition of English. |
BIRTH THROUGH 8 MONTHS: INFANTS

The Birth through 8 Months age range is a time of rapid growth when infants establish critical early attachments, relationships, and connections.

Following are some primary characteristics of the Birth through 8 Months age range:

- Regulating and smoothing body functions, and learning to be soothed.
- Attaching to individuals and building primary relationships.
- Developing in such a way that all development is working toward integration, and all development is interrelated.
- Experiencing a strong sensory foundation period within all areas of development.
Domain 1: Approaches to Learning and Cognitive Development

Sub-Domain: Cognition and Cognitive Processes

Goal 8: Children demonstrate awareness of cause and effect relationships.

Goal 9: Children use prior relationships, experiences, and knowledge to expand understanding.

Goal 10: Children show emerging ability to imitate behaviors that they have observed.

Goal 11: Children find multiple solutions to questions, tasks, problems, and challenges, including trial and error.

Goal 12: Children expand abilities for conjecture, hypothesizing, and guessing.

Goal 13: Children compare, contrast, and evaluate experiences, tasks, and events building on prior knowledge.

Goal 14: Children participate in exploratory play.

Goal 15: Children participate in pretend or symbolic play.

Goal 16: Children represent experiences and thought through symbolic representation such as movement, drawing, singing/vocalizing, and play.
DOMAIN 1: APPROACHES TO LEARNING AND COGNITIVE DEVELOPMENT

SUB-DOMAIN: LEARNING APPROACHES

Goal 1: Children show curiosity and interest in learning and experimenting.

Goal 2: Children are able to generate new ideas, approaches, and activities in daily routines.

Goal 3: Children are confident to initiate and complete activities using a variety of approaches.

Goal 4: Children sustain attention to tasks even when faced with challenges and frustration.

Goal 5: Children demonstrate an expanding ability to develop and carry out plans.

Goal 6: Children show ability to change or adapt thought processes, applying previously learned concepts and skills to new situations.

Goal 7: Mediated by individual temperament, children learn to understand and appreciate individual style in approaching and interacting with the world.
Goal 17: Children demonstrate strength and coordination of large motor muscles.

Goal 18: Children demonstrate strength and coordination of small motor muscles.

Goal 19: Children use their senses (sight, hearing, smell, taste, and touch) to guide and integrate their interactions.
Domain 2: Physical Well-being, Health, and Motor Development

Sub-Domain: Physical Development

Goal 20: Children demonstrate the stamina and energy to participate in daily activities.

Goal 21: Children engage in a variety of physical activities.
Goal 22: Children practice basic personal care routines.

Goal 23: Children demonstrate personal health and hygiene skills.
Goal 24: Children eat a variety of nutritious foods.
Goal 25: Children demonstrate knowledge about and avoid harmful objects and situations.

Goal 26: Children demonstrate awareness and understanding of safety rules.
DOMAIN 3: SOCIAL AND EMOTIONAL DEVELOPMENT

SUB-DOMAIN: SOCIAL DEVELOPMENT

Goal 27: Children trust, interact with, and seek assistance from adults.

Goal 28: Children develop friendships with peers.

Goal 29: Children demonstrate positive negotiation skills.

Goal 30: Children demonstrate awareness of behavior and its effects on others.

Goal 31: Children participate positively in group activities.

Goal 32: Children demonstrate sympathy and empathy.

Goal 33: Children develop a sense of humor.

Goal 34: Children adapt to diverse settings.

Goal 35: Children recognize, appreciate, and respect similarities and differences in people.
DOMAIN 3: SOCIAL AND EMOTIONAL DEVELOPMENT

SUB-DOMAIN: EMOTIONAL DEVELOPMENT

Goal 36: Children perceive themselves as unique individuals.

Goal 37: Children demonstrate belief in their abilities.

Goal 38: Children regulate their feelings and impulses.
DOMA IN 4: GENERAL KNOWLEDGE

SUB-DOMAIN: MATHEMATICS AND NUMERACY

Goal 39: Children demonstrate understanding of numbers, ways of representing numbers, relationships among numbers, and number systems.

Goal 40: Children demonstrate understanding of measurable attributes of objects and the units, systems, and processes of measurement (including size, volume, height, weight, length, area, and time).

Goal 41: Children demonstrate understanding of patterns, relations, and functions used to organize their world and facilitate problem solving.
Domain 4: General Knowledge

Sub-Domain: Science

Goal 42: Children observe, describe, and collect information by exploring the world around them.

Goal 43: Children further engage in exploring and making sense of the natural world by asking questions and making predictions about cause and effect relations that can lead to generalizations.
**DOMAINE 4: GENERAL KNOWLEDGE**

**SUB-DOMAIN: SOCIAL STUDIES**

- **Goal 44:** Children differentiate between people, places, activities, and events in the past and present that relate to self, group identity, and a sense of their community.

- **Goal 45:** Children demonstrate awareness and understanding of individual fairness, group rights, and responsibilities (democratic ideals) for membership and participation in group activities (successful citizenship).
Domain 4: General Knowledge

Sub-Domain: Creative Arts

Goal 46: Children use creative arts to express and represent what they know, think, believe, or feel.

Goal 47: Children demonstrate understanding and appreciation of creative arts.
Domain 5: Communication, Language, and Literacy

Sub-Domain: Communication

Goal 48: Children demonstrate the meaning of language by listening.

Goal 49: Children communicate effectively.

Goal 50: Children comprehend and use conventions of social communication.
Domain 5: Communication, Language, and Literacy

Sub-Domain: Language

Goal 51: Children use receptive vocabulary.

Goal 52: Children use expressive vocabulary.

Goal 53: Children demonstrate progression in grammar and syntax.

Goal 54: Children demonstrate comprehension and meaning in language.

Goal 55: Children use language for a variety of purposes.
Goal 56: Children develop phonological awareness.

Goal 57: Children demonstrate awareness of letters and symbols.

Goal 58: Children demonstrate awareness of print concepts.

Goal 59: Children demonstrate comprehension of printed materials and oral stories.

Goal 60: Children demonstrate awareness that written materials can be used for a variety of purposes.

Goal 61: Children demonstrate knowledge and use of letters and symbols.

Goal 62: Children use writing skills and demonstrate knowledge of writing conventions.

Goal 63: Children use writing for a variety of purposes.
Goal 64: Children demonstrate competency in home language while acquiring beginning proficiency in English.
The 6 to 18 Months age range is a time when babies and young toddlers experience busy exploration and activities.

Following are some primary characteristics of the 6 to 18 Months age range:

- Participating in lots of exploration and repetition.
- Sitting, crawling, toddling, and developing many forms of movement.
- Attached to family and caregivers, but exploring self as a separate person.
- Understanding much more than they are able to say.
DOMAIN 1: APPROACHES TO LEARNING AND COGNITIVE DEVELOPMENT

SUB-DOMAIN: LEARNING APPROACHES

**Goal 1:** Children show curiosity and interest in learning and experimenting.

**Goal 2:** Children are able to generate new ideas, approaches, and activities in daily routines.

**Goal 3:** Children are confident to initiate and complete activities using a variety of approaches.

**Goal 4:** Children sustain attention to tasks even when faced with challenges and frustration.

**Goal 5:** Children demonstrate an expanding ability to develop and carry out plans.

**Goal 6:** Children show ability to change or adapt thought processes, applying previously learned concepts and skills to new situations.

**Goal 7:** Mediated by individual temperament, children learn to understand and appreciate individual style in approaching and interacting with the world.
Goal 8: Children demonstrate awareness of cause and effect relationships.

Goal 9: Children use prior relationships, experiences, and knowledge to expand understanding.

Goal 10: Children show emerging ability to imitate behaviors that they have observed.

Goal 11: Children find multiple solutions to questions, tasks, problems, and challenges, including trial and error.

Goal 12: Children expand abilities for conjecture, hypothesizing, and guessing.

Goal 13: Children compare, contrast, and evaluate experiences, tasks, and events building on prior knowledge.

Goal 14: Children participate in exploratory play.

Goal 15: Children participate in pretend or symbolic play.

Goal 16: Children represent experiences and thought through symbolic representation such as movement, drawing, singing/vocalizing, and play.
Goal 17: Children demonstrate strength and coordination of large motor muscles.

Goal 18: Children demonstrate strength and coordination of small motor muscles.

Goal 19: Children use their senses (sight, hearing, smell, taste, and touch) to guide and integrate their interactions.
Domain 2: Physical Well-Being, Health, and Motor Development

Sub-Domain: Physical Development

Goal 20: Children demonstrate the stamina and energy to participate in daily activities.

Goal 21: Children engage in a variety of physical activities.
Domain 2: Physical Well-Being, Health, and Motor Development

Sub-Domain: Health and Personal Care

Goal 22: Children practice basic personal care routines.

Goal 23: Children demonstrate personal health and hygiene skills.
DOMAIN 2: PHYSICAL WELL-BEING, HEALTH, AND MOTOR DEVELOPMENT

SUB-DOMAIN: NUTRITION AND FEEDING

Goal 24: Children eat a variety of nutritious foods.
DOMAIN 2: PHYSICAL WELL-BEING, HEALTH, AND MOTOR DEVELOPMENT

SUB-DOMAIN: SAFETY

Goal 25: Children demonstrate knowledge about and avoid harmful objects and situations.

Goal 26: Children demonstrate awareness and understanding of safety rules.
Domain 3: Social and Emotional Development

Sub-Domain: Social Development

**Goal 27:** Children trust, interact with, and seek assistance from adults.

**Goal 28:** Children develop friendships with peers.

**Goal 29:** Children demonstrate positive negotiation skills.

**Goal 30:** Children demonstrate awareness of behavior and its effects on others.

**Goal 31:** Children participate positively in group activities.

**Goal 32:** Children demonstrate sympathy and empathy.

**Goal 33:** Children develop a sense of humor.

**Goal 34:** Children adapt to diverse settings.

**Goal 35:** Children recognize, appreciate, and respect similarities and differences in people.
Idaho Early Learning eGuidelines

Domain 3: Social and Emotional Development

Sub-Domain: Social Development

Goal 27: Children trust, interact with, and seek assistance from adults.

Goal 28: Children develop friendships with peers.

Goal 29: Children demonstrate positive negotiation skills.

Goal 30: Children demonstrate awareness of behavior and its effects on others.

Goal 31: Children participate positively in group activities.

Goal 32: Children demonstrate sympathy and empathy.

Goal 33: Children develop a sense of humor.

Goal 34: Children adapt to diverse settings.

Goal 35: Children recognize, appreciate, and respect similarities and differences in people.
Domain 3: Social and Emotional Development

Sub-Domain: Emotional Development

Goal 36: Children perceive themselves as unique individuals.

Goal 37: Children demonstrate belief in their abilities.

Goal 38: Children regulate their feelings and impulses.
Goal 39: Children demonstrate understanding of numbers, ways of representing numbers, relationships among numbers, and number systems.

Goal 40: Children demonstrate understanding of measurable attributes of objects and the units, systems, and processes of measurement (including size, volume, height, weight, length, area, and time).

Goal 41: Children demonstrate understanding of patterns, relations, and functions used to organize their world and facilitate problem solving.
DOMAIN 4: GENERAL KNOWLEDGE

SUB-DOMAIN: SCIENCE

Goal 42: Children observe, describe, and collect information by exploring the world around them.

Goal 43: Children further engage in exploring and making sense of the natural world by asking questions and making predictions about cause and effect relations that can lead to generalization.
Goal 44: Children differentiate between people, places, activities, and events in the past and present that relate to self, group identity, and a sense of their community.

Goal 45: Children demonstrate awareness and understanding of individual fairness, group rights, and responsibilities (democratic ideals) for membership and participation in group activities (successful citizenship).
Domain 4: General Knowledge

Sub-Domain: Creative Arts

Goal 46: Children use creative arts to express and represent what they know, think, believe, or feel.

Goal 47: Children demonstrate understanding and appreciation of creative arts.
Goal 48: Children demonstrate the meaning of language by listening.

Goal 49: Children communicate effectively.

Goal 50: Children comprehend and use conventions of social communication.
DOMAINE 4: GENERAL KNOWLEDGE

SUB-DOMAIN: CREATIVE ARTS

Goal 46: Children use creative arts to express and represent what they know, think, believe, or feel.

Goal 47: Children demonstrate understanding and appreciation of creative arts.
DOMA IN 5: COMMUNICATION, LANGUAGE, AND LITERACY

SUB-DOMAIN: LANGUAGE

Goal 51: Children use receptive vocabulary.

Goal 52: Children use expressive vocabulary.

Goal 53: Children demonstrate progression in grammar and syntax.

Goal 54: Children demonstrate comprehension and meaning in language.

Goal 55: Children use language for a variety of purposes.
DOMAIN 5: COMMUNICATION, LANGUAGE, AND LITERACY

SUB-DOMAIN: LITERACY

Goal 56: Children develop phonological awareness.

Goal 57: Children demonstrate awareness of letters and symbols.

Goal 58: Children demonstrate awareness of print concepts.

Goal 59: Children demonstrate comprehension of printed materials and oral stories.

Goal 60: Children demonstrate awareness that written materials can be used for a variety of purposes.

Goal 61: Children demonstrate knowledge and use of letters and symbols.

Goal 62: Children use writing skills and demonstrate knowledge of writing conventions.

Goal 63: Children use writing for a variety of purposes.
Goal 64: Children demonstrate competency in home language while acquiring beginning proficiency in English.
16 TO 38 MONTHS: OLDER TODDLERS

The 16 to 38 Months age range is a time when older toddlers are moving into wider experiences with people, objects, and spaces.

Following are some primary characteristics of the 16 to 38 Months age range:

- Testing caregivers, self, and the physical world.
- Displaying little self control and needs safety and reassuring support.
- Striving for autonomy; sees self as separate, but connected.
- Experiencing surges in language, cognitive, social, and physical development.
DOMAIN 1: APPROACHES TO LEARNING AND COGNITIVE DEVELOPMENT

SUB-DOMAIN: LEARNING APPROACHES

**Goal 1:** Children show curiosity and interest in learning and experimenting.

**Goal 2:** Children are able to generate new ideas, approaches, and activities in daily routines.

**Goal 3:** Children are confident to initiate and complete activities using a variety of approaches.

**Goal 4:** Children sustain attention to tasks even when faced with challenges and frustration.

**Goal 5:** Children demonstrate an expanding ability to develop and carry out plans.

**Goal 6:** Children show ability to change or adapt thought processes, applying previously learned concepts and skills to new situations.

**Goal 7:** Mediated by individual temperament, children learn to understand and appreciate individual style in approaching and interacting with the world.
**DOMAIN 1: APPROACHES TO LEARNING AND COGNITIVE DEVELOPMENT**

**Sub-Domain: Cognition and Cognitive Processes**

**Goal 8**: Children demonstrate awareness of cause and effect relationships.

**Goal 9**: Children use prior relationships, experiences, and knowledge to expand understanding.

**Goal 10**: Children show emerging ability to imitate behaviors that they have observed.

**Goal 11**: Children find multiple solutions to questions, tasks, problems, and challenges, including trial and error.

**Goal 12**: Children expand abilities for conjecture, hypothesizing, and guessing.

**Goal 13**: Children compare, contrast, and evaluate experiences, tasks, and events building on prior knowledge.

**Goal 14**: Children participate in exploratory play.

**Goal 15**: Children participate in pretend or symbolic play.

**Goal 16**: Children represent experiences and thought through symbolic representation such as movement, drawing, singing/vocalizing, and play.
 Domain 2: Physical Well-Being, Health, and Motor Development

Sub-Domain: Motor Development

Goal 17: Children demonstrate strength and coordination of large motor muscles.

Goal 18: Children demonstrate strength and coordination of small motor muscles.

Goal 19: Children use their senses (sight, hearing, smell, taste, and touch) to guide and integrate their interactions.
**IDaho Early Learning eGuidelines**

**Domain 2: Physical Well-Being, Health, and Motor Development**

**Sub-Domain: Physical Development**

- **Goal 20**: Children demonstrate the stamina and energy to participate in daily activities.
- **Goal 21**: Children engage in a variety of physical activities.
Goal 22: Children practice basic personal care routines.

Goal 23: Children demonstrate personal health and hygiene skills.
Goal 24: Children eat a variety of nutritious foods.
Goal 25: Children demonstrate knowledge about and avoid harmful objects and situations.

Goal 26: Children demonstrate awareness and understanding of safety rules.
Domain 3: Social and Emotional Development

Sub-Domain: Social Development

Goal 27: Children trust, interact with, and seek assistance from adults.

Goal 28: Children develop friendships with peers.

Goal 29: Children demonstrate positive negotiation skills.

Goal 30: Children demonstrate awareness of behavior and its effects on others.

Goal 31: Children participate positively in group activities.

Goal 32: Children demonstrate sympathy and empathy.

Goal 33: Children develop a sense of humor.

Goal 34: Children adapt to diverse settings.

Goal 35: Children recognize, appreciate, and respect similarities and differences in people.
Goal 36: Children perceive themselves as unique individuals.

Goal 37: Children demonstrate belief in their abilities.

Goal 38: Children regulate their feelings and impulses.
**Goal 39**: Children demonstrate understanding of numbers, ways of representing numbers, relationships among numbers, and number systems.

**Goal 40**: Children demonstrate understanding of measurable attributes of objects and the units, systems, and processes of measurement (including size, volume, height, weight, length, area, and time).

**Goal 41**: Children demonstrate understanding of patterns, relations, and functions used to organize their world and facilitate problem solving.
Domain 4: General Knowledge

Sub-Domain: Science

Goal 42: Children observe, describe, and collect information by exploring the world around them.

Goal 43: Children further engage in exploring and making sense of the natural world by asking questions and making predictions about cause and effect relations that can lead to generalizations.
Goal 44: Children differentiate between people, places, activities, and events in the past and present that relate to self, group identity, and a sense of their community.

Goal 45: Children demonstrate awareness and understanding of individual fairness, group rights, and responsibilities (democratic ideals) for membership and participation in group activities (successful citizenship).
Goal 46: Children use creative arts to express and represent what they know, think, believe, or feel.

Goal 47: Children demonstrate understanding and appreciation of creative arts.
Goal 48: Children demonstrate the meaning of language by listening.

Goal 49: Children communicate effectively.

Goal 50: Children comprehend and use conventions of social communication.
IDaho Early Learning eGuidelines

Domain 5: Communication, Language, and Literacy

Sub-Domain: Language

- **Goal 51**: Children use receptive vocabulary.
- **Goal 52**: Children use expressive vocabulary.
- **Goal 53**: Children demonstrate progression in grammar and syntax.
- **Goal 54**: Children demonstrate comprehension and meaning in language.
- **Goal 55**: Children use language for a variety of purposes.
Goal 56: Children develop phonological awareness.

Goal 57: Children demonstrate awareness of letters and symbols.

Goal 58: Children demonstrate awareness of print concepts.

Goal 59: Children demonstrate comprehension of printed materials and oral stories.

Goal 60: Children demonstrate awareness that written materials can be used for a variety of purposes.

Goal 61: Children demonstrate knowledge and use of letters and symbols.

Goal 62: Children use writing skills and demonstrate knowledge of writing conventions.

Goal 63: Children use writing for a variety of purposes.
SUB-DOMAIN: ENGLISH LANGUAGE LEARNERS

Goal 64: Children demonstrate competency in home language while acquiring beginning proficiency in English.
The 36 to 60 Months age range is a time when young children and preschoolers are actively figuring out their world and how things work.

Following are some primary characteristics of the 36 to 60 Months age range:

- Developing an awareness of reality vs. pretend.
- Experiencing new leaps of abstraction in thinking, language, and understanding.
- Building competence by being an active observer and “doer.”
- Developing friendships with other children and adults.
**DOMAIN 1: APPROACHES TO LEARNING AND COGNITIVE DEVELOPMENT**

**SUB-DOMAIN: LEARNING APPROACHES**

- **Goal 1:** Children show curiosity and interest in learning and experimenting.
- **Goal 2:** Children are able to generate new ideas, approaches, and activities in daily routines.
- **Goal 3:** Children are confident to initiate and complete activities using a variety of approaches.
- **Goal 4:** Children sustain attention to tasks even when faced with challenges and frustration.
- **Goal 5:** Children demonstrate an expanding ability to develop and carry out plans.
- **Goal 6:** Children show ability to change or adapt thought processes, applying previously learned concepts and skills to new situations.
- **Goal 7:** Mediated by individual temperament, children learn to understand and appreciate individual style in approaching and interacting with the world.
Goal 8: Children demonstrate awareness of cause and effect relationships.

Goal 9: Children use prior relationships, experiences, and knowledge to expand understanding.

Goal 10: Children show emerging ability to imitate behaviors that they have observed.

Goal 11: Children find multiple solutions to questions, tasks, problems, and challenges, including trial and error.

Goal 12: Children expand abilities for conjecture, hypothesizing, and guessing.

Goal 13: Children compare, contrast, and evaluate experiences, tasks, and events building on prior knowledge.

Goal 14: Children participate in exploratory play.

Goal 15: Children participate in pretend or symbolic play.

Goal 16: Children represent experiences and thought through symbolic representation such as movement, drawing, singing/vocalizing, and play.
DOMAIND 2: PHYSICAL WELL-BEING, HEALTH, AND MOTOR DEVELOPMENT

SUB-DOMAIN: MOTOR DEVELOPMENT

Goal 17: Children demonstrate strength and coordination of large motor muscles.

Goal 18: Children demonstrate strength and coordination of small motor muscles.

Goal 19: Children use their senses (sight, hearing, smell, taste, and touch) to guide and integrate their interactions.
Goal 20: Children demonstrate the stamina and energy to participate in daily activities.

Goal 21: Children engage in a variety of physical activities.
Domain 2: Physical Well-Being, Health, and Motor Development

Sub-Domain: Health and Personal Care

Goal 22: Children practice basic personal care routines.

Goal 23: Children demonstrate personal health and hygiene skills.
DOMAIN 2: PHYSICAL WELL-BEING, HEALTH, AND MOTOR DEVELOPMENT

SUB-DOMAIN: NUTRITION AND FEEDING

Goal 24: Children eat a variety of nutritious foods.
Domain 2: Physical Well-Being, Health, and Motor Development

Sub-Domain: Safety

Goal 25: Children demonstrate knowledge about and avoid harmful objects and situations.

Goal 26: Children demonstrate awareness and understanding of safety rules.
DOMAIN 3: SOCIAL AND EMOTIONAL DEVELOPMENT

Sub-Domain: Social Development

**Goal 27**: Children trust, interact with, and seek assistance from adults.
**Goal 28**: Children develop friendships with peers.
**Goal 29**: Children demonstrate positive negotiation skills.
**Goal 30**: Children demonstrate awareness of behavior and its effects on others.
**Goal 31**: Children participate positively in group activities.
**Goal 32**: Children demonstrate sympathy and empathy.
**Goal 33**: Children develop a sense of humor.
**Goal 34**: Children adapt to diverse settings.
**Goal 35**: Children recognize, appreciate, and respect similarities and differences in people.
Goal 36: Children perceive themselves as unique individuals.

Goal 37: Children demonstrate belief in their abilities.

Goal 38: Children regulate their feelings and impulses.
Goal 39: Children demonstrate understanding of numbers, ways of representing numbers, relationships among numbers, and number systems.

Goal 40: Children demonstrate understanding of measurable attributes of objects and the units, systems, and processes of measurement (including size, volume, height, weight, length, area, and time).

Goal 41: Children demonstrate understanding of patterns, relations, and functions used to organize their world and facilitate problem solving.
Goal 42: Children observe, describe, and collect information by exploring the world around them.

Goal 43: Children further engage in exploring and making sense of the natural world by asking questions and making predictions about cause and effect relations that can lead to generalizations.

**DOMAIN 4: GENERAL KNOWLEDGE**

**SUB-DOMAIN: SOCIAL STUDIES**

**Goal 44:** Children differentiate between people, places, activities, and events in the past and present that relate to self, group identity, and a sense of their community.

**Goal 45:** Children demonstrate awareness and understanding of individual fairness, group rights, and responsibilities (democratic ideals) for membership and participation in group activities (successful citizenship).
Domain 4: General Knowledge

Sub-Domain: Creative Arts

Goal 46: Children use creative arts to express and represent what they know, think, believe, or feel.

Goal 47: Children demonstrate understanding and appreciation of creative arts.
Goal 48: Children demonstrate the meaning of language by listening.

Goal 49: Children communicate effectively.

Goal 50: Children comprehend and use conventions of social communication.
Domain 5: Communication, Language, and Literacy

Sub-Domain: Language

Goal 51: Children use receptive vocabulary.

Goal 52: Children use expressive vocabulary.

Goal 53: Children demonstrate progression in grammar and syntax.

Goal 54: Children demonstrate comprehension and meaning in language.

Goal 55: Children use language for a variety of purposes.
DOMAIN 5: COMMUNICATION, LANGUAGE, AND LITERACY

Sub-Domain: Literacy

Goal 56: Children develop phonological awareness.

Goal 57: Children demonstrate awareness of letters and symbols.

Goal 58: Children demonstrate awareness of print concepts.

Goal 59: Children demonstrate comprehension of printed materials and oral stories.

Goal 60: Children demonstrate awareness that written materials can be used for a variety of purposes.

Goal 61: Children demonstrate knowledge and use of letters and symbols.

Goal 62: Children use writing skills and demonstrate knowledge of writing conventions.

Goal 63: Children use writing for a variety of purposes.
Goal 64: Children demonstrate competency in home language while acquiring beginning proficiency in English.
60 Months through Kindergarten: Five through Kindergarten - Children

The 60 Months through Kindergarten age range is a time when children build a sense of competence through active learning and social interactions.

Following are some primary characteristics of the 60 Months through Kindergarten age range:

- Experiencing a time of exploration and mastery.
- Developing an ability to think more abstractly and make some predictions.
- Experiencing more physical development including fine muscles for drawing and writing.
- Making the connections for sequences and concepts related to reading, writing, and number concepts.

Not every child is 5 years old by September 1, but development continues whether the child is in Kindergarten or not. In Domains 4 and 5, the Goals in this Age Range are linked to the Idaho Kindergarten Standards.
**Domain 1: Approaches to Learning and Cognitive Development**

**Sub-Domain: Learning Approaches**

- **Goal 1:** Children show curiosity and interest in learning and experimenting.
- **Goal 2:** Children are able to generate new ideas, approaches, and activities in daily routines.
- **Goal 3:** Children are confident to initiate and complete activities using a variety of approaches.
- **Goal 4:** Children sustain attention to tasks even when faced with challenges and frustration.
- **Goal 5:** Children demonstrate an expanding ability to develop and carry out plans.
- **Goal 6:** Children show ability to change or adapt thought processes, applying previously learned concepts and skills to new situations.
- **Goal 7:** Mediated by individual temperament, children learn to understand and appreciate individual style in approaching and interacting with the world.
Goal 8: Children demonstrate awareness of cause and effect relationships.

Goal 9: Children use prior relationships, experiences, and knowledge to expand understanding.

Goal 10: Children show emerging ability to imitate behaviors that they have observed.

Goal 11: Children find multiple solutions to questions, tasks, problems, and challenges, including trial and error.

Goal 12: Children expand abilities for conjecture, hypothesizing, and guessing.

Goal 13: Children compare, contrast, and evaluate experiences, tasks, and events building on prior knowledge.

Goal 14: Children participate in exploratory play.

Goal 15: Children participate in pretend or symbolic play.

Goal 16: Children represent experiences and thought through symbolic representation such as movement, drawing, singing/vocalizing, and play.
Goal 17: Children demonstrate strength and coordination of large motor muscles.

Goal 18: Children demonstrate strength and coordination of small motor muscles.

Goal 19: Children use their senses (sight, hearing, smell, taste, and touch) to guide and integrate their interactions.
**Domain 2: Physical Well-Being, Health, and Motor Development**

**Sub-Domain: Physical Development**

- **Goal 20:** Children demonstrate the stamina and energy to participate in daily activities.
- **Goal 21:** Children engage in a variety of physical activities.
Domain 2: Physical Well-Being, Health, and Motor Development

Sub-Domain: Health and Personal Care

Goal 22: Children practice basic personal care routines.

Goal 23: Children demonstrate personal health and hygiene skills.
**Goal 24**: Children eat a variety of nutritious foods.
Goal 25: Children demonstrate knowledge about and avoid harmful objects and situations.

Goal 26: Children demonstrate awareness and understanding of safety rules.
**Domain 3: Social and Emotional Development**

**Sub-Domain: Social Development**

- **Goal 27**: Children trust, interact with, and seek assistance from adults.
- **Goal 28**: Children develop friendships with peers.
- **Goal 29**: Children demonstrate positive negotiation skills.
- **Goal 30**: Children demonstrate awareness of behavior and its effects on others.
- **Goal 31**: Children participate positively in group activities.
- **Goal 32**: Children demonstrate sympathy and empathy.
- **Goal 33**: Children develop a sense of humor.
- **Goal 34**: Children adapt to diverse settings.
- **Goal 35**: Children recognize, appreciate, and respect similarities and differences in people.
DOMAIN 3: SOCIAL AND EMOTIONAL DEVELOPMENT

SUB-DOMAIN: EMOTIONAL DEVELOPMENT

**Goal 36:** Children perceive themselves as unique individuals.

**Goal 37:** Children demonstrate belief in their abilities.

**Goal 38:** Children regulate their feelings and impulses.
Domain 4: General Knowledge

Sub-Domain: Mathematics and Numeracy

Goal 39: Children demonstrate understanding of numbers, ways of representing numbers, relationships among numbers, and number systems.

Goal 40: Children demonstrate understanding of measurable attributes of objects and the units, systems, and processes of measurement (including size, volume, height, weight, length, area, and time).

Goal 41: Children demonstrate understanding of patterns, relations, and functions used to organize their world and facilitate problem solving.
DOMAINE 4: GENERAL KNOWLEDGE

SUB-DOMAIN: SCIENCE

Goal 42: Children observe, describe, and collect information by exploring the world around them.

Goal 43: Children further engage in exploring and making sense of the natural world by asking questions and making predictions about cause and effect relations that can lead to generalizations.
**Domain 4: General Knowledge**

**Sub-Domain: Social Studies**

- **Goal 44**: Children differentiate between people, places, activities, and events in the past and present that relate to self, group identity, and a sense of their community.

- **Goal 45**: Children demonstrate awareness and understanding of individual fairness, group rights, and responsibilities (democratic ideals) for membership and participation in group activities (successful citizenship).
Domain 4: General Knowledge

Sub-Domain: Creative Arts

Goal 46: Children use creative arts to express and represent what they know, think, believe, or feel.

Goal 47: Children demonstrate understanding and appreciation of creative arts.
Goal 48: Children demonstrate the meaning of language by listening.

Goal 49: Children communicate effectively.

Goal 50: Children comprehend and use conventions of social communication.
DOMAIN 5: COMMUNICATION, LANGUAGE, AND LITERACY

SUB-DOMAIN: LANGUAGE

Goal 51: Children use receptive vocabulary.

Goal 52: Children use expressive vocabulary.

Goal 53: Children demonstrate progression in grammar and syntax.

Goal 54: Children demonstrate comprehension and meaning in language.

Goal 55: Children use language for a variety of purposes.
DOMAIN 5: COMMUNICATION, LANGUAGE, AND LITERACY

SUB-DOMAIN: LITERACY

Goal 56: Children develop phonological awareness.

Goal 57: Children demonstrate awareness of letters and symbols.

Goal 58: Children demonstrate awareness of print concepts.

Goal 59: Children demonstrate comprehension of printed materials and oral stories.

Goal 60: Children demonstrate awareness that written materials can be used for a variety of purposes.

Goal 61: Children demonstrate knowledge and use of letters and symbols.

Goal 62: Children use writing skills and demonstrate knowledge of writing conventions.

Goal 63: Children use writing for a variety of purposes.
Goal 64: Children demonstrate competency in home language while acquiring beginning proficiency in English.
**First, Second, and Third Grades: “Big” Little Kids**

The *First, Second, and Third Grades* age range is a time when the “big” little kid is aware of the cultural prestige of being in elementary school and is ready for more complex, but still active learning.

Following are some primary characteristics of the *First, Second, and Third Grades* age range:

- Feels like a “big kid” when they begin school.
- Sometimes have more developed language and physical skills and size, than social and emotional skills.
- Social skills, for working with adults and peers, are important for school success.
- Feelings of competence and self in relation to others are important aspects of self motivation and success.
- All aspects of development are still interrelated.

Domains 1 and 3 include critical areas of development to expand and enhance the K-12 Standards. At about age 8, the brain and all domains of development make a significant leap from “early” childhood into the stage of “middle” childhood.
DOMAIN 1: APPROACHES TO LEARNING AND COGNITIVE DEVELOPMENT

SUB-DOMAIN: LEARNING APPROACHES

**Goal 1:** Children show curiosity and interest in learning and experimenting.

**Goal 2:** Children are able to generate new ideas, approaches, and activities in daily routines.

**Goal 3:** Children are confident to initiate and complete activities using a variety of approaches.

**Goal 4:** Children sustain attention to tasks even when faced with challenges and frustration.

**Goal 5:** Children demonstrate an expanding ability to develop and carry out plans.

**Goal 6:** Children show ability to change or adapt thought processes, applying previously learned concepts and skills to new situations.

**Goal 7:** Mediated by individual temperament, children learn to understand and appreciate individual style in approaching and interacting with the world.
Goal 8: Children demonstrate awareness of cause and effect relationships.

Goal 9: Children use prior relationships, experiences, and knowledge to expand understanding.

Goal 10: Children show emerging ability to imitate behaviors that they have observed.

Goal 11: Children find multiple solutions to questions, tasks, problems, and challenges, including trial and error.

Goal 12: Children expand abilities for conjecture, hypothesizing, and guessing.

Goal 13: Children compare, contrast, and evaluate experiences, tasks, and events building on prior knowledge.

Goal 14: Children participate in exploratory play.

Goal 15: Children participate in pretend or symbolic play.

Goal 16: Children represent experiences and thought through symbolic representation such as movement, drawing, singing/vocalizing, and play.
DOMAIN 3: SOCIAL AND EMOTIONAL DEVELOPMENT

SUB-DOMAIN: SOCIAL DEVELOPMENT
