

# Health Screen Practice Activity:

## OBJECTIVE:

Provide the opportunity for staff to test the Health Screen function and familiarize staff with the Care Plan enhancements.

## DESCRIPTION:

As a group or in pairs, staff will test the new Health Screen function. Staff will access the WISPr training environment UAT and practice completing the steps of the Health Screen on available participants.

## MATERIALS:

- Computer Access
- WISPr UAT Access
- Health Screen Practice Activity Sheet
- List of Available WISPr Participants

## GUIDANCE:

1. Introduce activity.
2. Logon to WISPr UAT and ensure staff has access.
3. Review list of available participants to test.
4. Group staff. Staff may work as one large group, small groups or in pair of 2. Grouping may vary based on the availability of participants to test in WISPr.
5. Disperse list of available participants if applicable.
6. Allow time for staff to complete the steps for the Health screen.
7. If time allows, meet as a group to discuss before closing the session.

## CONSIDERATIONS:

- Consider testing a variety of categories and ages.
- Don't forget to practice entering a care plan with the new features.
- Time may vary to complete this activity based on the agency.

## QUESTIONS FOR DISCUSSION:

- What questions do you have about the new Health Screen implementation?
- What do you like about the new Health Screen function?
