Influenza-Related Deaths Occurring in Idaho¹ Number of Deaths by Age Group, Gender, and District of Residence Deaths Occurring During the 2010-2011 Flu Season²

		Age			Gender	
Residence	Total	<18	18-49	50+	Female	Male
District 1	1	-	-	1	1	-
District 2	1	-	-	1	-	1
District 3	4	1	-	3	1	3
District 4	9	1	-	8	6	3
District 5	4	-	-	4	4	-
District 6	-	-	-	-	-	-
District 7	2	-	2	-	1	1
Non-resident	-	-	-	-	-	-
Total	21	2	2	17	13	8

Notes:

- 1. Influenza-related deaths are based on ICD coding for Influenza in Part I and Part II on the Death Certificate. Influenza may have been the underlying cause of death or contributed to death.
- 2. Flu season is October 1, 2010 May 1, 2011.

Only deaths occurring in Idaho are reported in this table. This excludes deaths to Idaho residents occurring in other states and includes deaths to non-residents occurring in Idaho. Data shown in this table will differ from statistics based on Idaho resident records, data based on underlying cause of death only, and data based on calendar year.

Data are based on records filed with the State as of October 2011. Data differ from previous published data due to updates in the data base.
