

Idaho Viral Hepatitis - News

Date: 1/1/2014

Coeur d'Alene, Idaho – The North Idaho AIDS Coalition (NIAC) recently signed a Memorandum of Understanding (MOU) with the Idaho Viral Hepatitis Prevention Program to initiate the program's Rapid Hepatitis C Virus (HCV) Screening Project in the Coeur d'Alene area. Through the MOU, high risk clients are offered a free HCV test and provided counseling and referral services. The HCV test kits utilized during the project are provided to NIAC through federal funding that the Idaho Viral Hepatitis Prevention Program manages. The Idaho Viral Hepatitis Prevention Program is thrilled to have NIAC as a project partner and looks forward to working with them throughout the next two years to test high risk individuals and inform them of their HCV status.
