

## ***Idaho Viral Hepatitis - News***

***Date: 4/22/2014***

Boise, Idaho – The Idaho Viral Hepatitis Prevention Program has redesigned their website pages to include enhanced information on all aspects of the program. For years the Viral Hepatitis Prevention Program operated with one single webpage that limited the ability of staff to provide comprehensive information and links to important resources. The new website features sections/webpages involving the following hepatitis topics:

- Hepatitis A disease information
- Hepatitis B disease information
- Hepatitis C disease information
- Idaho's Latest viral hepatitis news
- The Idaho Hepatitis Advisory Council
- Hepatitis vaccination information
- Hepatitis statistics
- Provider education
- Idaho Rapid HCV Screening Project

In addition to the topics above, an interactive hepatitis resource map application is currently under development and should be added to the website within a few weeks. To access the new webpages go to [www.healthandwelfare.idaho.gov/Health/FamilyPlanning,STDHIV/ViralHepatitisPrevention/tabid/392/Default.aspx](http://www.healthandwelfare.idaho.gov/Health/FamilyPlanning,STDHIV/ViralHepatitisPrevention/tabid/392/Default.aspx)
