Power					
Shoshone					
Teton					
Twin Falls					8/3/2016, 8/17 , 8/30
Valley					8/3/2016
Washington					
Totals: 15 Total counties with reported WNV activity	4 Humans reported with WN fever	2 Humans reported with WN neuroinvasive disease	7 Animals reported with WNV infections	1 Asymptomatic blood donors reported by the Red Cross	10 Counties where +mosquito pools were detected by mosquito abatement districts or PHDs

The data presented are (1) *provisional*, (2) *only* confirmed or probable symptomatic infections, (3) asymptomatic presumptive viremic blood donors identified by the American Red Cross and, (4) *only* Idaho residents.

† The American Red Cross routinely screens all donated blood for a variety of infectious agents, including WNV. All donated blood determined positive for WNV is discarded.

Every attempt is made to assure the accuracy of the information presented on the map and in the table. Numbers and dates presented here may change, based on completed investigations.

†Positive mosquito pools are noted by collection date; testing takes several days before results are available. Most mosquito abatement districts do not cover the entire county. To learn more, visit the link to 2016 Idaho Mosquito Abatement taxing districts:
