

2016 WNV SURVEILLANCE SUMMARY

- Total reported symptomatic WNV cases: **1**
- West Nile virus-related deaths: **0**
- Asymptomatic presumptive viremic blood donors†: **0**
- Total reported positive horses: **1**
- Other species: **0**
- Counties reporting positive mosquitoes: **9**
- Total reported positive counties: **10**

WNV- Positive Surveillance Findings, by County of Residence (or Collection), and Event Date—Idaho, 2016

Counties	Humans: Fever (Onset Date)	Humans: Neuroinvasive (Onset Date)	Horses/other mammals (Diagnosis Date)	Asymptomatic Blood Donors†	Positive Mosquito Pools, by first positive collection date †, additional positive collection dates listed	Positive birds
Ada					7/26/2016, 8/4/2016	
Adams						
Bannock					7/29/2016, 8/3/2016, 8/4/2016

Totals: 10 Total counties with reported WNV activity	1 Humans reported with WN fever	0 Humans reported with WN neuroinvasive disease	1 Animals reported with WNV infections	0 Asymptomatic blood donors reported by the Red Cross	9 Counties where +mosquito pools were detected by mosquito abatement districts or PHDs	0 Positive birds

The data presented are (1) *provisional*, (2) *only* confirmed or probable symptomatic infections, (3) asymptomatic presumptive viremic blood donors identified by the American Red Cross and, (4) *only* Idaho residents.

† The American Red Cross routinely screens all donated blood for a variety of infectious agents, including WNV. All donated blood determined positive for WNV is discarded.

Every attempt is made to assure the accuracy of the information presented on the map and in the table. Numbers and dates presented here may change, based on completed investigations.

†Positive mosquito pools are noted by collection date; testing takes several days before results are available. Most mosquito abatement districts do not cover the entire county. To learn more, visit the link to 2016 Idaho Mosquito Abatement taxing districts:
