Preface

Why Is There a Food Code?

Foodborne illness in the United States is a major cause of personal distress, preventable death, and avoidable economic burden. It has been estimated that foodborne diseases cause approximately 76 million illnesses, 325,000 hospitalizations, and 5,000 deaths each year.

Epidemiological outbreak data repeatedly identify five major risk factors related to employee behaviors and preparation practices in retail and food service establishments as contributing to foodborne illness:

- Improper holding temperatures,
- Inadequate cooking of foods, such as undercooking eggs,
- Contaminated equipment,
- Food from unsafe sources, and
- Poor personal hygiene.

The Food Code addresses controls for risk factors and further establishes five key public health interventions to protect consumer health. Specifically, these interventions are: demonstration of knowledge, employee health controls, controlling hands as a vehicle of contamination, time and temperature parameters for controlling pathogens, and the consumer advisory. The first two interventions are found in Chapter 2 and the last three in Chapter 3.

Who Is Responsible for Food Safety?

It is a shared responsibility of the food industry and the government to ensure that food provided to the consumer is safe and does not become a vehicle in a disease outbreak or in the transmission of communicable disease. This shared responsibility extends to ensuring that consumer expectations are met and that food is unadulterated, prepared in a clean environment, and honestly presented.

Accordingly, the provisions of the Food Code provide a system of prevention and overlapping safeguards designed to minimize foodborne illness, as well as ensure employee health, industry manager knowledge, safe food, nontoxic and cleanable equipment, and acceptable levels of sanitation on food establishment premises; and promote fair dealings with the consumer.

What are Uniform Standards?

The Food Code provides well-written, scientifically sound, and up-to-date standards that are recognized as an advantage by industry and governmental officials. Industry conformance with acceptable procedures is much more likely where regulatory officials “speak with one voice” about what is required to protect the public health, why it is important, and which alternatives for compliance may be accepted. It is useful to business in that it provides accepted standards that can be applied in training and quality assurance programs.
Information to Assist the User

Chapter through Subparagraph:

Food Code provisions address essentially four areas: personnel (Chapter 2), food (Chapter 3), equipment/facilities/supplies (Chapters 4, 5, 6, 7), and compliance and enforcement (Chapter 8). The structural nomenclature of the document is as follows:

Information in Italics:

Portions of some sections are written in *italics*. These provisions are not requirements, but are provided to convey relevant information about specific exceptions and alternative means for compliance.

Critical, Noncritical and Swing Categories:

Requirements contained in the Food Code are presented as being in one of three categories of importance: critical; “swing” (i.e., those that may or may not be critical depending on the circumstances); and noncritical. An asterisk* after a tagline (which is the language immediately following a section number that introduces the subject of the section) indicates that all of the provisions within that section are critical unless otherwise indicated, as follows:

Any provisions that are “swing” items are followed by the bold, superscripted letter $^S$ and any provisions that are noncritical are followed by the bold, superscripted letter $^N$.

Any unmarked provisions within a section that has an asterisked tagline are critical. All provisions following a tagline that is not marked with an asterisk are noncritical.

Defined Words in Caps:

Defined words and terms are capitalized in the text of the Food Code chapters to alert the reader to the fact that there is a specific meaning assigned to those words and terms and that the meaning of a provision is to be interpreted in the defined context. A concerted effort was also made to capitalize all forms and combinations of those defined words and terms that were intended to carry the weight of the definition.

Idaho Changes to the Food Code:

Additions, modifications and deletions added by the State of Idaho are preceded by the letters IDAPA and the section numbers from the Idaho administrative rules.

000. LEGAL AUTHORITY.
The State of Idaho Board of Health and Welfare is authorized under Sections 37-121 and 39-1603, Idaho Code, to adopt rules for the regulation of food establishments to protect public health.

001. TITLE, SCOPE AND APPLICABILITY.

01. Title. The title of this chapter is IDAPA 16.02.19 "Food Safety and Sanitation Standards for Food Establishments" and may also be known as the Idaho Food Code.

02. Scope. The purpose of these rules is to establish standards for the provision of safe, unadulterated and honestly presented food for consumption by the public. These rules provide requirements for licensing, inspections, review of plans, employee restriction, and license suspensions for food establishments and food processing plants. Also included are definitions and standards for management, personnel, food operations, equipment and facilities.

03. These Rules Apply To Food Establishments. Food establishments as defined in Section 39-1602, Idaho Code, must follow these rules. Those facilities include but are not limited to the following:

a. Restaurants, catering facilities, taverns, kiosks, vending facilities, commissaries, cafeterias, mobile food facilities, temporary food facilities; and

b. Schools, senior centers, hospitals, residential care and treatment facilities, nursing homes, correctional facilities, camps, food banks, and church facilities; and

c. Retail markets, meat, fish, delicatessens, bakery and supermarkets, convenience stores, health food stores, and neighborhood markets; and

d. Food, water and beverage processing and bottling facilities that manufacture, process and distribute food, water and beverages within the state of Idaho, and are not inspected for food safety by a federal agency.

04. These Rules Do Not Apply To These Establishments. These rules do not apply to the following establishments as exempted in Idaho Code.

b. Bed-and-breakfast operations that prepare and offer food for breakfast only to guests. The number of guest beds must not exceed ten (10) beds as defined in Section 39-1602, Idaho Code.

d. Licensed outfitters and guides regulated by Sections 36-2101 through 36-2119, Idaho Code.

e. Low-risk food establishments, as exempted in Section 39-1602, Idaho Code, which offer only non-potentially hazardous foods.

f. Non-profit charitable, fraternal, or benevolent organizations that do not prepare or serve food on a regular basis as exempted in Section 39-1602, Idaho Code. Food is not considered to be served on a regular basis if it is not served for more than five (5) consecutive days on no more than three (3) occasions per year for foods which are not potentially hazardous. For all other food, it must not be served more than one (1) meal per week.

g. Private homes where food is prepared or served for family consumption or receives catered or home-delivered food as exempted by Section 39-1602, Idaho Code.

05. How To Use This Chapter of Rules. The rules in this chapter are modifications, additions or deletions made to the federal publication incorporated by reference in Section 004 of these rules. In order to follow these rules, that publication is required. (Note: that publication is incorporated in this document). Changes to those standards are listed in this chapter of rules by listing which section of the publication is being modified at the beginning of each section of rule.
