Preventive Behaviors

Percentage of Idaho adults ...	Total	Sex		Age		
		Male	Female	18-34	35-54	55+
... who did not have their cholesterol checked within the last five years.	33.3	35.6	31.0	61.3	28.1	10.6
... who had not visited the dentist in the past 12 months.	32.3	32.8	31.9	35.2	30.8	31.2
... who did not always wear a seat belt.	24.6	32.2	17.0	29.5	24.9	19.3

Idaho Department of Health & Welfare
Behavioral Risk Factor Surveillance System

What is it?

The Behavioral Risk Factor Surveillance System (BRFSS) is a method to help identify emerging health problems, establish and track health objectives, and develop and evaluate public health policies and programs.

The BRFSS uses a standardized telephone survey of adults aged 18 and older. The survey is conducted by all state health departments, the District of Columbia, Puerto Rico, the Virgin Islands, and Guam with assistance from the Centers for Disease Control and Prevention (CDC). The BRFSS began in 1984 and is the largest continuously conducted telephone survey in the world, monitoring preventable chronic diseases, injuries, and infectious diseases.

Acknowledgements

The Idaho Department of Health and Welfare would like to thank the citizens of Idaho who have participated in the Behavioral Risk Factor Surveillance System.

This project was funded in part by a grant from the Centers for Disease Control and Prevention, number U58/CCU022801, and administered via a cooperative agreement with the Idaho Bureau of Vital Records and Health Statistics.

For more details on this project or any of the survey results, please contact the Bureau of Vital Records and Health Statistics at (208) 332-7326.
