Remick "Micky" Clark, Administrator
Good Samaritan Society - Idaho Falls Village
840 East Elva Street
Idaho Falls, ID 83401-2899

Provider #: 135092

RE: FACILITY FIRE SAFETY & CONSTRUCTION SURVEY REPORT COVER LETTER

Dear Mr. Clark:

On February 1, 2018, a Facility Fire Safety and Construction survey was conducted at Good Samaritan Society - Idaho Falls Village by the Department of Health & Welfare, Bureau of Facility Standards to determine if your facility was in compliance with State Licensure and Federal participation requirements for nursing homes participating in the Medicare and/or Medicaid programs. This survey found that your facility was not in substantial compliance with Medicare and Medicaid program participation requirements.

Enclosed is a Statement of Deficiencies and Plan of Correction, Form CMS-2567, listing Medicare and/or Medicaid deficiencies. If applicable, a similar State Form will be provided listing licensure health deficiencies. In the spaces provided on the right side of each sheet, answer each deficiency and state the date when each will be completed. Please provide ONLY ONE completion date for each federal and state tag in column (X5) Completion Date to signify when you allege that each tag will be back in compliance. NOTE: The alleged compliance date must be after the "Date Survey Completed" (located in field X3) and on or before the "Opportunity to Correct" (listed on page 2). After each deficiency has been answered and dated, the administrator
should sign the Statement of Deficiencies and Plan of Correction, CMS-2567 Form in the spaces provided and return the originals to this office. If a State Form with deficiencies was issued, it should be signed, dated and returned along with the CMS-2567 Form.

Your Plan of Correction (PoC) for the deficiencies must be submitted by **February 26, 2018**. Failure to submit an acceptable PoC by **February 26, 2018**, may result in the imposition of civil monetary penalties by **March 17, 2018**.

Your PoC must contain the following:

- What corrective action(s) will be accomplished for those residents found to have been affected by the deficient practice;

- How you will identify other residents having the potential to be affected by the same deficient practice and what corrective action(s) will be taken;

- What measures will be put into place or what systemic changes you will make to ensure that the deficient practice does not recur;

- How the corrective action(s) will be monitored to ensure the deficient practice will not recur, i.e., what quality assurance program will be put into place; and,

- Include dates when corrective action will be completed.

- The administrator must sign and date the first page of both the federal survey report, Form CMS-2567. If a State Form was issued as well, it should also be signed, dated and returned.

All references to federal regulatory requirements contained in this letter are found in Title 42, Code of Federal Regulations.

Remedies may be recommended for imposition by the Centers for Medicare and Medicaid Services (CMS) if your facility has failed to achieve substantial compliance by **March 8, 2018**, (Opportunity to Correct). Informal dispute resolution of the cited deficiencies will not delay the imposition of the enforcement actions recommended (or revised, as appropriate) on **March 8, 2018**. A change in the seriousness of the deficiencies on **March 8, 2018**, may result in a change in the remedy.

The remedy, which will be recommended if substantial compliance has not been achieved by **March 8, 2018**, includes the following:
Denial of payment for new admissions effective May 1, 2018.

42 CFR §488.417(a)

If you do not achieve substantial compliance within three (3) months after the last day of the survey identifying noncompliance, the CMS Regional Office and/or State Medicaid Agency must deny payments for new admissions.

We must recommend to the CMS Regional Office and/or State Medicaid Agency that your provider agreement be terminated on August 1, 2018, if substantial compliance is not achieved by that time.

Please note that this notice does not constitute formal notice of imposition of alternative remedies or termination of your provider agreement. Should the Centers for Medicare & Medicaid Services determine that termination or any other remedy is warranted, it will provide you with a separate formal notification of that determination.

If you believe these deficiencies have been corrected, you may contact Nate Elkins, Supervisor, Facility Fire Safety and Construction, Bureau of Facility Standards, 3232 Elder Street, PO Box 83720, Boise, ID 83720-0009, Phone #: (208) 334-6626, option 3; Fax #: (208) 364-1888, with your written credible allegation of compliance. If you choose and so indicate, the PoC may constitute your allegation of compliance. We may accept the written allegation of compliance and presume compliance until substantiated by a revisit or other means. In such a case, neither the CMS Regional Office nor the State Medicaid Agency will impose the previously recommended remedy, if appropriate.

If, upon the subsequent revisit, your facility has not achieved substantial compliance, we will recommend that the remedies previously mentioned in this letter be imposed by the CMS Regional Office or the State Medicaid Agency beginning on February 1, 2018, and continue until substantial compliance is achieved. Additionally, the CMS Regional Office or State Medicaid Agency may impose a revised remedy(ies), based on changes in the seriousness of the non-compliance at the time of the revisit, if appropriate.

In accordance with 42 CFR §488.331, you have one opportunity to question cited deficiencies through an informal dispute resolution process. To be given such an opportunity, you are required to send your written request and all required information as directed in Informational Letter #2001-10. Informational Letter #2001-10 can also be found on the Internet at:

Go to the middle of the page to Information Letters section and click on State and select the following:

BFS Letters (06/30/11)

2001-10 Long Term Care Informal Dispute Resolution Process
2001-10 IDR Request Form

This request must be received by **February 26, 2018**. If your request for informal dispute resolution is received after **February 26, 2018**, the request will not be granted. An incomplete informal dispute resolution process will not delay the effective date of any enforcement action.

Thank you for the courtesies extended to us during the survey. If you have any questions, please contact us at (208) 334-6626, option 3.

Sincerely,

Nate Elkins, Supervisor
Facility Fire Safety and Construction

NE/lj
Enclosures
The facility is a single story, Type V (111) sprinklered building with a partial basement. The facility was constructed in 1964, with an addition completed in 1985 and further renovation in 1995. The building is sprinklered throughout and a new fire alarm/smoke detection system was installed in November 2009. Currently the facility is licensed for 113 SNF/NF beds and had a census of 41 on the date of the survey.

The following deficiencies were cited during the annual fire/life safety survey conducted on January 31, 2018 and February 1, 2018. The facility was surveyed under the LIFE SAFETY CODE, 2012 Edition, Existing Health Care Occupancy, in accordance with 42 CFR 483.70.

The Survey was conducted by:

Sam Burbank
Health Facility Surveyor
Facility Fire Safety & Construction

K 100 General Requirements - Other

1. The facility has a contract with NALCO, a division of ECOLAB, to create a site specific water management plan complete with facility based risk assessment. Facility is expected to receive the water management plan on or before 2/23/18.

2. All residents have the potential to be affected by this practice.

#### Findings include:
During review of provided maintenance and inspection records conducted on 1/31/18 from approximately 10:30 AM - 12:00 PM, records provided for the facility's water management plan, failed to demonstrate it had completed the facility based risk assessment that demonstrated what facility specific areas were identified as potential risks and what level of risks those areas presented.

CFR standard:
42 CFR 483.80

§ 483.80 Infection control.
The facility must establish and maintain an infection control program designed to provide a safe, sanitary, and comfortable environment and to help prevent the development and transmission of disease and infection.

|-------|-----------|---------|--------------------------------------|
| K 161 |           |         | Continued From page 3
Failure to seal penetrations in rated construction assemblies has the potential to allow fire, smoke and dangerous gases to pass between compartments. This deficient practice affected staff and visitors on the date of the survey.

Findings include:

During the facility tour conducted on 1/31/18 from approximately 12:30 - 1:30 PM, observation of the ceiling in the IT closet outside the nurse's station at the 100/200 hall intersection revealed a two inch by three inch hole cut in the ceiling, exposing the space above.

When asked, the Environmental Services Director stated he was not aware of this hole prior to the date of the survey.

**Actual NFPA Standard:**

19.1.6 Minimum Construction Requirements
19.1.6.1 Health care occupancies shall be limited to the building construction types specified in Table 19.1.6.1, unless otherwise permitted by 19.1.6.2 through 19.1.6.7. (See 8.2.1.)

8.2 Construction and Compartmentation
8.2.1 Construction.
8.2.1.1 Buildings or structures occupied or used in accordance with the individual occupancy chapters, Chapters 11 through 43, shall meet the minimum construction requirements of these chapters.

8.2.2.2 Fire compartments shall be formed with fire barriers that comply with Section 8.3.

8.3.5.6 Membrane Penetrations.
8.3.5.6.1 Membrane penetrations for cables,
### Summary Statement of Deficiencies

Continued From page 4:

- Cable trays, conduits, pipes, tubes, combustion vents and exhaust vents, wires, and similar items to accommodate electrical, mechanical, plumbing, and communications systems that pass through a membrane of a wall, floor, or floor/ceiling assembly constructed as a fire barrier shall be protected by a firestop system or device and shall comply with 8.3.5.1 through 8.3.5.5.2.

### Alcohol Based Hand Rub Dispenser (ABHR)

- **K 325**
  - SS=F CFR(s): NFPA 101
  - Alcohol Based Hand Rub Dispenser (ABHR) ABHRs are protected in accordance with 8.7.3.1, unless all conditions are met:
    - Maximum individual dispenser capacity is 0.32 gallons (0.53 gallons in suites) of fluid and 18 ounces of Level 1 aerosols
    - Dispensers shall have a minimum of 4-foot horizontal spacing
    - Not more than an aggregate of 10 gallons of fluid or 135 ounces aerosol are used in a single smoke compartment outside a storage cabinet, excluding one individual dispenser per room
    - Storage in a single smoke compartment greater than 5 gallons complies with NFPA 30
    - Dispensers are not installed within 1 inch of an ignition source
    - Dispensers over carpeted floors are in sprinklered smoke compartments
    - ABHR does not exceed 95 percent alcohol
    - Operation of the dispenser shall comply with Section 18.3.2.6(11) or 19.3.2.6(11)
    - ABHR is protected against inappropriate access 18.3.2.6, 19.3.2.6, 42 CFR Parts 403, 418, 460, 482, 483, and 485
    - This REQUIREMENT is not met as evidenced by:
      - Based on record review, observation and inspection.

<td>Continued From page 5 interview, the facility failed to ensure manually operated Alcohol Based Hand Rub Dispensers (ABHR), were maintained in accordance with NFPA 101. Failure to install, test and document operation of ABHR dispensers under manufacturer’s recommendations and in accordance with the standard, has the potential of increasing the risk of fires from flammable liquids. This deficient practice affected 41 residents, staff and visitors on the date of the survey. Findings include: 1) During review of facility maintenance and inspection records conducted on 1/31/18 from approximately 11:00 AM - 12:30 PM, no records were available indicating procedures performed for installed ABHR dispensers when refilling. Asked what documentation was done during this process, the Environmental Services Director stated the facility was not documenting the refill process and he was not aware of the requirement to test ABHR dispensers each time a refill was installed. 2) During the facility tour conducted on 1/31/18 from 1:00 PM to 4:30 PM, observation of installed ABHR dispensers revealed manually activated dispensers had been installed in 9 of 9 smoke compartment corridors. Actual NFPA standard: NFPA 101 19.3.2.6 Alcohol-Based Hand-Rub Dispensers. Alcohol-based hand-rub dispensers shall be protected in accordance with 8.7.3.1, unless all of the following conditions are met:</td>
<td>K 325</td>

c) Water system supply source

Provide in REMARKS information on coverage for any non-required or partial automatic sprinkler system. 9.7.5, 9.7.7, 9.7.8, and NFPA 25

This REQUIREMENT is not met as evidenced by:

Based on record review and interview, the facility failed to ensure that fire suppression systems were maintained in accordance with NFPA 25. Failure to maintain sprinkler system control valves and inspect gauges has the potential to hinder system performance during a fire event. This deficient practice affected 41 residents, staff and visitors on the date of the survey.

Findings include:

During review of provided facility inspection and testing records conducted on 1/31/18 from 11:30 AM - 12:30 PM, no records were available indicating a weekly inspection of dry system gauges had been conducted. Interview of the Environmental Services Director revealed he was not aware of the weekly inspection requirement for dry system gauges.

Actual NFPA standard:

2. All residents have the potential to be affected by this practice.

3. The weekly inspection of the dry system gauges has been added to the facility’s TELs program as a weekly task to be completed.

4. Compliance will be monitored by Director of Environmental Services or designee performing an audit of the completion and documentation of the inspection of the dry system gauges weekly x4, monthly x2, quarterly x2. Audit results will reported to the QAPI committee and the committee will determine if further auditing is needed.

K 374 Subdivision of Building Spaces - Smoke Barrier Doors
SS=D CFR(s): NFPA 101

Subdivision of Building Spaces - Smoke Barrier Doors
2012 EXISTING
Doors in smoke barriers are 1-3/4-inch thick solid bonded wood-core doors or of construction that resists fire for 20 minutes. Nonrated protective plates of unlimited height are permitted. Doors are permitted to have fixed fire window assemblies per 8.5. Doors are self-closing or automatic-closing, do not require latching, and are not required to swing in the direction of

1. The annual inspection of the four automatic roll-down fire doors equipped with fusible links will be inspected by a contractor on or before 3/7/18.

2. All residents have the potential to be affected by this practice.
K 374
Continued From page 10

egress travel. Door opening provides a minimum clear width of 32 inches for swinging or horizontal doors.
19.3.7.6, 19.3.7.8, 19.3.7.9
This REQUIREMENT is not met as evidenced by:
Based on record review, observation and interview, the facility failed to ensure smoke and fire barriers were maintained to limit the transfer of smoke, fire and dangerous gases between compartments. Failure to maintain installed fire rated assemblies that limit transfer of combustion products, has the potential to hinder egress and the ability to shelter in place. This deficient practice affected staff and visitors on the date of the survey.

Findings include:

1) During review of facility maintenance and inspection records conducted on 1/31/18 from approximately 11:00 AM - 12:30 PM, no records were provided indicating automatic roll-down fire doors equipped with fusible links were inspected and tested annually in accordance with NFPA 80 guidelines.

2) During the facility tour conducted on 1/31/18 from 2:00 - 3:30 PM, the following locations were observed to have automatic roll-down fire doors equipped with fusible links:

Two (2) roll-up steel fire doors were installed at the pass-thru windows of the Business Office.
One (1) roll-up steel fire door was installed at the pass-thru window of the main Kitchen.
One (1) roll-up steel fire door was installed at the pass-thru window of the identified "Reception" office adjacent to "Family Lounge".

3. The annual inspection of all automatic roll-down fire doors to be completed by a contractor has been added to the facility TELs program.

4. Compliance will be monitored by Director of Environmental Services or designee performing audits of the documentation that the annual inspection is completed quarterly x4. Audit results will be reported to the QAPI committee and the committee will determine if further auditing is needed.

**SUMMARY STATEMENT OF DEFICIENCIES**

(Each deficiency must be preceded by full regulatory or LSC identifying information)

K 374 Continued From page 11

Further observation of these doors demonstrated each was equipped with a fusible link control, automatic operation interconnected to the fire alarm system and labels requiring annual testing in accordance with NFPA 80 standards. When asked if these doors had been tested annually, the Environmental Services Director stated they had not been tested and he was unaware of the annual testing requirement.

Actual NFPA standard:

19.3.7.7 Reserved.
19.3.7.8* Doors in smoke barriers shall comply with 8.5.4 and all of the following:
(1) The doors shall be self-closing or automatic-closing in accordance with 19.2.2.2.7.
(2) Latching hardware shall not be required
(3) The doors shall not be required to swing in the direction of egress travel.

8.5.4.4* Doors in smoke barriers shall be self-closing or automatic-closing in accordance with 7.2.1.8 and shall comply with the provisions of 7.2.1.

7.2.1.15.2 Fire-rated door assemblies shall be inspected and tested in accordance with NFPA 80, Standard for Fire Doors and Other Opening Protectives. Smoke door assemblies shall be inspected and tested in accordance with NFPA 105, Standard for Smoke Door Assemblies and Other Opening Protectives.

NFPA 80

5.2* Inspections.
5.2.1* Fire door assemblies shall be inspected and tested not less than annually, and a written record of the inspection shall be signed and kept

<td>Electrical Systems - Other List in the REMARKS section any NFPA 99 Chapter 6 Electrical Systems requirements that are not addressed by the provided K-Tags, but are deficient. This information, along with the applicable Life Safety Code or NFPA standard citation, should be included on Form CMS-2567. Chapter 6 (NFPA 99) This REQUIREMENT is not met as evidenced by: Based on observation and interview, the facility failed to ensure the Essential Electrical System (EES) generator was equipped with a remote manual stop station in accordance with NFPA 110. Failure to provide a remote stop located outside of the room housing the prime mover, potentially hinders staff ability to shut down the generator if required during an emergency. This deficient practice affected 41 residents, staff and visitors on the date of the survey. Findings include: During the facility tour conducted on 1/31/18 from approximately 1:30 - 2:30 PM, a remote manual stop station for the EES generator was observed mounted to the side of the generator housed inside a room in the partial basement. When asked about the location of this stop switch, the Environmental Services Director stated this was the location where the facility had mounted the remote stop and he was not aware it was required to be outside the room housing the prime mover. Actual NFPA standard:</td>
<td>3/8/18</td>
<td>3. The placement of the generator emergency stop switch is a permanent correction. All staff will be educated on the new location of the generator emergency stop switch for the generator on 3/5/18 by the Director of Environmental Services. 4. No auditing of the stop switch location is required as this was a permanent one-time correction. This correction will be reported to the QAPI Committee and the committee will determine if any auditing is needed.</td>
</tr>
</tbody>
</table>
K 911 Continued From page 13

NFPA 110

5.6.5.6* All installations shall have a remote manual stop station of a type to prevent inadvertent or unintentional operation located outside the room housing the prime mover, where so installed, or elsewhere on the premises where the prime mover is located outside the building.

5.6.5.6.1 The remote manual stop station shall be labeled.

K 918 Electrical Systems - Essential Electric System Maintenance and Testing

The generator or other alternate power source and associated equipment is capable of supplying service within 10 seconds. If the 10-second criterion is not met during the monthly test, a process shall be provided to annually confirm this capability for the life safety and critical branches. Maintenance and testing of the generator and transfer switches are performed in accordance with NFPA 110.

Generator sets are inspected weekly, exercised under load 30 minutes 12 times a year in 20-40 day intervals, and exercised once every 36 months for 4 continuous hours. Scheduled test under load conditions include a complete simulated cold start and automatic or manual transfer of all EES loads, and are conducted by competent personnel. Maintenance and testing of stored energy power sources (Type 3 EES) are in accordance with NFPA 111. Main and feeder circuit breakers are inspected annually, and a program for periodically exercising the components is established according to manufacturer requirements. Written records of maintenance and testing are maintained and

1. The generator inspection/repair contractor used by the facility performed a fuel sample test. This was completed on 2/6/18.

2. All residents have the potential to be affected by this practice.

3. The testing of the generator fuel has been added to the facility TELs program as an annual task.

4. Compliance will be monitored by the Director of Environmental Services or designee performing an audit of the generator documentation for annual fuel testing to have been completed quarterly x4. Audit results will be reported to the QAPI committee and the committee will determine if further auditing is needed.

readily available. EES electrical panels and
circuits are marked, readily identifiable, and
separate from normal power circuits. Minimizing
the possibility of damage of the emergency power
source is a design consideration for new
installations. 6.4.4, 6.5.4, 6.6.4 (NFPA 99), NFPA 110, NFPA
111, 700.10 (NFPA 70)
This REQUIREMENT is not met as evidenced
by:
Based on record review and interview, the facility
failed to ensure the EES (Essential Electrical
System) generator was maintained in accordance
with NFPA 110. Failure to annually test the fuel for
diesel powered generators has the potential of
hindering system performance during a power
loss or other emergency. This deficient practice
affected 41 residents, staff and visitors on the
date of the survey.

Findings include:
During review of annual inspection and
maintenance records conducted on 1/31/18 from
approximately 11:30 AM to 12:30 PM, records
provided for the annual generator inspection did
not indicate any testing was completed for the
fuel supply. When asked, the Environmental
Services Director stated he was not aware of the
fuel testing requirement for diesel-fired systems.

Actual NFPA standard:
NFPA 110
8.3.8 A fuel quality test shall be performed at
least annually using tests approved by ASTM
standards.

(EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATOR OR LSC IDENTIFYING INFORMATION)

K 923 Continued From page 15

Gas Equipment - Cylinder and Container Storage
Greater than or equal to 3,000 cubic feet
Storage locations are designed, constructed, and ventilated in accordance with 5.1.3.3.2 and 5.1.3.3.3.

>300 but <3,000 cubic feet
Storage locations are outdoors in an enclosure or within an enclosed interior space of non- or limited-combustible construction, with door (or gates outdoors) that can be secured. Oxidizing gases are not stored with flammables, and are separated from combustibles by 20 feet (5 feet if sprinklered) or enclosed in a cabinet of noncombustible construction having a minimum 1/2 hr. fire protection rating.

Less than or equal to 300 cubic feet
In a single smoke compartment, individual cylinders available for immediate use in patient care areas with an aggregate volume of less than or equal to 300 cubic feet are not required to be stored in an enclosure. Cylinders must be handled with precautions as specified in 11.6.2. A precautionary sign readable from 5 feet is on each door or gate of a cylinder storage room, where the sign includes the wording as a minimum "CAUTION: OXIDIZING GAS(ES) STORED WITHIN NO SMOKING."

Storage is planned so cylinders are used in order of which they are received from the supplier. Empty cylinders are segregated from full cylinders. When facility employs cylinders with integral pressure gauge, a threshold pressure considered empty is established. Empty cylinders are marked to avoid confusion. Cylinders stored in the open are protected from weather.
11.3.1, 11.3.2, 11.3.3, 11.3.4, 11.6.5 (NFPA 99)
This REQUIREMENT is not met as evidenced by:
Based on observation and interview, the facility failed to ensure medical gases were stored in storage racks labeled full and empty to segregate the cylinders. This was completed on 2/6/18.

2. All residents have the potential to be affected by this practice.

3. Inspection of oxygen cylinders to be properly stored in racks and are segregated empty or full has been added to the facility's TELs program as a weekly task.

4. Compliance will be monitored by Director of Environmental Services or designee performing audits on the proper storage of oxygen cylinders weekly x4, monthly x2, quarterly x2. Audit results will be reported to the QAPI committee and the committee will determine if further auditing is needed.
### Summary Statement of Deficiencies

**K 923 Continued From page 16**

accordance with NFPA 99. Failure to secure oxygen cylinders and segregate empty from full has the potential of using incorrect cylinders during an emergency requiring supplemental oxygen. This deficient practice affected 12 residents, staff and visitors on the date of the survey.

Findings include:

During the facility tour conducted on 1/31/18 from approximately 11:30 AM - 3:30 PM, observation of the oxygen storage area in the 100 east hall of the facility, revealed one (1) unsecured cylinder on the outside of the transfill/storage room. Further observation of the interior of this space revealed approximately twenty-four (24) "E" size oxygen cylinders in storage racks. This area did not contain signs or indications as to whether the stored cylinders were empty or full.

When asked how staff differentiates empty and full oxygen cylinders, the Environmental Services Director stated that staff might look at the gauges if one was installed, but there was not specific method he was aware of.

Actual NFPA standard:

NFPA 99

11.6.5 Special Precautions - Storage of Cylinders and Containers.
11.6.5.1 Storage shall be planned so that cylinders can be used in the order in which they are received from the supplier.
11.6.5.2 If empty and full cylinders are stored within the same enclosure, empty cylinders shall be segregated from full cylinders.
11.6.5.3 Empty cylinders shall be marked to avoid...

11.5.2 Gases in Cylinders and Liquefied Gases in Containers.
11.5.2.1 Qualification and Training of Personnel.
11.5.2.1.1* Personnel concerned with the application and maintenance of medical gases and others who handle medical gases and the cylinders that contain the medical gases shall be trained on the risks associated with their handling and use.
11.5.2.1.2 Health care facilities shall provide programs of continuing education for their personnel.
11.5.2.1.3 Continuing education programs shall include periodic review of safety guidelines and usage requirements for medical gases and their cylinders.
### Statement of Deficiencies and Plan of Correction

**Provider/Supplier/CUA Identification Number:** 135092

**Date Survey Completed:** 02/01/2018

**Name of Provider or Supplier:** Good Samaritan Society - Idaho Falls

**Street Address, City, State, Zip Code:** 840 East Elva Street, Idaho Falls, ID 83401

### Facility Standards

#### E 000 Initial Comments

The facility is a single story, Type V (111) building with a partial basement. Original construction was June 1964 with an addition in 1985 and a major renovation in 1995. A new fire alarm/smoke detection system was installed in November 2009. The facility is situated in a municipal fire district and is currently licensed for 113 SNF/NF beds with a census of 41 on the day of the survey.

The following deficiencies were cited during the Emergency Preparedness survey conducted on January 31 and February 1, 2018. The facility was surveyed under the Emergency Preparedness Rule established by CMS, in accordance with 42 CFR 483.73.

The Survey was conducted by:

- Sam Burbank
- Health Facility Surveyor
- Facility Fire Safety and Construction

#### E 006 Plan Based on All Hazards Risk Assessment

**SS=F CFR(s): 483.73(a)(1)-(2)**

- [(a) Emergency Plan. The [facility] must develop and maintain an emergency preparedness plan that must be reviewed, and updated at least annually. The plan must do the following:]
  - (1) Be based on and include a documented, facility-based and community-based risk assessment, utilizing an all-hazards approach.*

  *[For LTC facilities at §483.73(a)(1):] (1) Be based on and include a documented, facility-based and community-based risk assessment, utilizing an all-hazards approach, including missing residents.

#### E 000 Preparation and Execution of this response and plan of correction does not constitute an admission or agreement by the provider of the truth of the facts alleged or conclusions set forth in the statement of deficiencies. The plan of correction is prepared and/or executed solely because it is required by the provisions of Federal and State Law. For the purposes of any allegation that the facility is not in substantial compliance with Federal requirements of participation, this response and plan of correction constitutes the facility's allegation of compliance in accordance with section 7305 of the State Operations manual.

1. The facility Emergency Management Plan (EMP) Interdisciplinary Team (IDT) reviewed the Hazard Vulnerability Assessment (HVA) and updated it on 2/19/18. The IDT referenced the Community HVA created by the Eastern Idaho Healthcare Coalition when considering any changes to the facility HVA.

2. All residents have the potential to be affected by this practice.

---

**Laboratory Director's or Provider/Supplier Representative's Signature:**

---

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
E 006 Continued From page 1

* [For ICF/IIDs at §483.475(a)(1):] (1) Be based on and include a documented, facility-based and community-based risk assessment, utilizing an all-hazards approach, including missing clients.

(2) Include strategies for addressing emergency events identified by the risk assessment.

* [For Hospices at §418.113(a)(2):] (2) Include strategies for addressing emergency events identified by the risk assessment, including the management of the consequences of power failures, natural disasters, and other emergencies that would affect the hospice’s ability to provide care.

This REQUIREMENT is not met as evidenced by:

Based on record review and interview, it was determined the facility failed to conduct a facility-based and community-based risk assessment which includes identified strategies for response. Failure to conduct a risk assessment which includes a community based component, potentially hinders facility response to localized disasters and emergencies. This deficient practice affected 41 residents, staff and visitors on the date of the survey.

Findings include:

On 1/31/18 from 11:30 AM - 12:30 PM, review of provided emergency plan, policies and procedures, did not reveal the risk assessment included input from local or regional emergency management officials that included a community based component. Interview of the Environmental Services Director on 1/31/18 from 1:30 - 2:00 PM found the facility risk assessment was done by him through information he considered relevant to

3. The facility EMP IDT will meet quarterly to review the HVA and update EMP to reflect changes as needed. All staff will be educated on the changes to the EMP on 3/5/18.

4. Audits to be completed by the Director of Environmental Services or designee quarterly x4 to ensure IDT reviewed the EMP on a quarterly basis. Audit results will be reported to the QAPI committee and the committee will determine if further auditing is needed.
The facility Emergency Management Plan (EMP) Interdisciplinary Team (IDT) reviewed the Hazard Vulnerability Assessment (HVA) and updated it on 2/19/18. The IDT referenced the Community HVA created by the Eastern Idaho Healthcare Coalition when considering any changes to the facility HVA.

2. All residents have the potential to be affected by this practice.

3. The facility EMP IDT will meet quarterly to review the HVA and update EMP to reflect changes as needed. All staff will be educated on the changes to the EMP on 3/5/18.

4. Audits to be completed by the Director of Environmental Services or designee quarterly x4 to ensure IDT reviewed the EMP on a quarterly basis. Audit results will be reported to the QAPI committee and the committee will determine if further auditing is needed.
E 013 Continued From page 3

procedures. The dialysis facility must develop and implement emergency preparedness policies and procedures, based on the emergency plan set forth in paragraph (a) of this section, risk assessment at paragraph (a)(1) of this section, and the communication plan at paragraph (c) of this section. The policies and procedures must be reviewed and updated at least annually. These emergencies include, but are not limited to, fire, equipment or power failures, care-related emergencies, water supply interruption, and natural disasters likely to occur in the facility's geographic area.

This REQUIREMENT is not met as evidenced by:

Based on record review and interview, it was determined the facility failed to conduct a facility-based and community-based risk assessment in the policies and procedures that includes identified strategies in the development of the emergency plan. Failure to conduct a risk assessment that incorporates both a facility based and a community based component, potentially hinders facility response to localized disasters and emergencies. This deficient practice affected 41 residents, staff and visitors on the date of the survey.

Findings include:

On 1/31/18 from 11:30 AM - 12:30 PM, review of provided policies and procedures as addressed in the emergency plan on page 2, indicated the importance of addressing "all potential hazards", however review of the included HVA (Hazard Vulnerability Analysis), did not reveal inclusion of input from local or regional emergency management officials, or a community based component. Interview of the Environmental Services Director on 1/31/18 from 1:30 - 2:00 PM

2. All residents have the potential to be affected by this practice.

3. All staff will be educated by the Director of Environmental Services or designee on sewage and waste disposal procedure as well as all other EMP updates on 3/5/18. Staff will also receive annual training and during orientation on the EMP.

4. Compliance will be monitored by Director of Environmental Services or designee performing audits of the EMP to include sewage and waste procedure and the staff have knowledge of the procedure weekly x4, monthly x2 and quarterly x2.

Audit results will be reported to the QAPI committee and the committee will determine if further auditing is needed.

VFBR21
hospice-operated inpatient care facilities only. The policies and procedures must address the following:

(iii) The provision of subsistence needs for hospice employees and patients, whether they evacuate or shelter in place, include, but are not limited to the following:

(A) Food, water, medical, and pharmaceutical supplies.

(B) Alternate sources of energy to maintain the following:

(1) Temperatures to protect patient health and safety and for the safe and sanitary storage of provisions.

(2) Emergency lighting.

(3) Fire detection, extinguishing, and alarm systems.

(C) Sewage and waste disposal.

This REQUIREMENT is not met as evidenced by:

Based on record review, the facility failed to provide an emergency plan, policy and procedure of subsistence to ensure sewage and waste disposal was provided in the event of sheltering in place or evacuation. Failure to provide sewage and waste disposal in the event of a disaster has the potential to limit the facility's ability of providing safe and sanitary continuity of care in an emergency. This deficient practice affected 41 residents, staff and visitors on the date of the survey.

Findings include:

On 1/31/18 from 11:30 AM - 12:30 PM, review of provided emergency plan, policies and procedures for the facility did not indicate the ability of the facility to provide sewage and waste disposal for residents and staff in the event of evacuation or while sheltering in place during a

E 018 Procedures for Tracking of Staff and Patients
SS=F CFR(s): 483.73(b)(2)

[(b) Policies and procedures. The [facilities] must
develop and implement emergency preparedness
policies and procedures, based on the
emergency plan set forth in paragraph (a) of this
section, risk assessment at paragraph (a)(1) of
this section, and the communication plan at
paragraph (c) of this section. The policies and
procedures must be reviewed and updated at
least annually.] At a minimum, the policies and
procedures must address the following:

(2) A system to track the location of on-duty staff
and sheltered patients in the [facility's] care
during an emergency. If on-duty staff and
sheltered patients are relocated during the
emergency, the [facility] must document the
specific name and location of the receiving facility
or other location.

*-[For PRTF's at §441.184(b), LTC at §483.73(b),
ICF/IID's at §483.475(b), PACE at §480.84(b):]
Policies and procedures. (2) A system to track the
location of on-duty staff and sheltered residents in
the [PRTF's, LTC, ICF/IID or PACE] care during
and after an emergency. If on-duty staff and
sheltered residents are relocated during the
emergency, the [PRTF's, LTC, ICF/IID or PACE]
must document the specific name and location of
the receiving facility or other location.

*-[For Inpatient Hospice at §418.113(b)(6):]
Policies and procedures.
(ii) Safe evacuation from the hospice, which

procedures must be reviewed and updated at least annually. At a minimum, the policies and procedures must address the following:

(4) A means to shelter in place for patients, staff, and volunteers who remain in the [facility].

(4) or (2),(3),(5),(6)] A means to shelter in place for patients, staff, and volunteers who remain in the [facility].

*[For Inpatient Hospices at §418.113(b):] Policies and procedures.

(6) The following are additional requirements for hospice-operated inpatient care facilities only.
The policies and procedures must address the following:

(i) A means to shelter in place for patients, hospice employees who remain in the hospice.

This REQUIREMENT is not met as evidenced by:

Based on record review and interview, it was determined the facility failed to provide a policy procedure or plan for sheltering in place. Failure to provide a plan for sheltering in place has the potential to leave residents and staff without resources to continue care during an emergency. This deficient practice affected 41 residents, staff and visitors on the date of the survey.

Findings include:

On 1/31/18 from 11:30 AM - 12:30 PM, review of provided policies, procedures and emergency plan, found the section identified as relevant to sheltering on page(s) 8 of 11 and 9 of 11, section F, item numbers 1-9, had the following generic, canned response: “Facility is not equipped or have any current agreements with other facilities to receive any other residents at this time. Facility is actively attempting to partner with other

3. All staff will be educated by the Director of Environmental Services or designee on the updates made to the section titled “Sheltering” in the EMP on 3/5/18. Staff will also receive training in new hire orientation and annually.

4. Compliance will be monitored by the Director of Environmental Services or designee performing audits that all sections of the EMP are completed quarterly x4. Audit results will be reported to the QAPI committee and the committee will determine if additional auditing is needed.

organizations in emergency preparedness."
  When asked about these sections, the  
Environmental Services Director stated he was  
unsure at the time of development of the plan as  
to what this section needed for completion.  

Reference:  
42 CFR 483.73 (b) (4)

E 026 Roles Under a Waiver Declared by Secretary  
CFR(s): 483.73(b)(8)  
[(b) Policies and procedures. The [facilities] must  
develop and implement emergency preparedness  
policies and procedures, based on the  
emergency plan set forth in paragraph (a) of this  
section, risk assessment at paragraph (a)(1) of  
this section, and the communication plan at  
paragraph (c) of this section. The policies and  
procedures must be reviewed and updated at  
least annually. At a minimum, the policies and  
procedures must address the following:]  

(8) [(6), (6)(C)(iv), (7), or (9)] The role of the  
[facility] under a waiver declared by the Secretary,  
in accordance with section 1135 of the Act, in the  
provision of care and treatment at an alternate  
care site identified by emergency management  
officials.

*For RNHCl's at §403.748(b):] Policies and  
procedures. (8) The role of the RNHCl under a  
waiver declared by the Secretary, in accordance  
with section 1135 of Act, in the provision of care  
at an alternative care site identified by emergency  
management officials.  
This REQUIREMENT is not met as evidenced by:  
Based on record review, it was determined the  
facility failed to document their role under an 1135  
waiver as declared by the Secretary and the  

1. The facility EMP IDT review the  
EMP on 2/19/18. During review the  
IDT completed the section of the  
EMP related to seeking a waiver  
(1135 waiver) from the Agency for  
Healthcare Administration to allow  
for the sheltering of evacuees if the  
number exceeds the operating  
capacity of the host location.

2. All residents have the potential to  
be affected by this practice.

3. All staff will be educated by the  
Director of Environmental Services  
or designee on the updates made to  
the section identifying when the  
location will seek a waiver from the  
Agency for Health Care  
Administration.

4. Compliance will be monitored by  
the Director of Environmental  
Services or designee performing  
audits that all sections of the EMP  
are completed quarterly x4. Audit
provisions of care at an alternate site if identified by emergency management officials. Failure to plan for alternate means of care and the role under an 1135 waiver has the potential to limit facility options during an emergency. This deficient practice potentially affects reimbursement and continuity of care for the 41 residents, staff and visitors housed on the date of the survey.

Findings include:

On 1/31/18 from 11:30 AM - 12:30 PM, review of the provided emergency plan, policies and procedures, revealed a section on page 9 of 11, item number 7, defining what action would be taken under waiver from "the Agency for Health Care Administration" was contained in the plan, but no references for plan, policies and procedure for the facility role under declaration of an 1135 waiver by the Secretary.

**E 036 Continued From page 16**

Plan, policies and procedures, has the potential to hinder staff response during a disaster. This deficient practice affected 41 residents, staff and visitors on the date of the survey.

Findings include:

On 1/31/18 from 11:30 AM - 12:30 PM, review of provided emergency plan, policies and procedures, found no documentation demonstrating the facility had a current testing program for staff based on the training's conducted on the emergency plan.

Interview of 6 of 6 staff conducted on 2/1/18 from 9:00 AM - 12:30 PM, established staff had not participated in any specific testing program on the emergency plan contents, only an all-staff inservice of the initial overview of the emergency plan.

Additional interview of the SDC on 2/1/18 from 9:30 - 10:00 AM, established the emergency plan was recently updated and staff had not yet undergone testing over the contents of the plan.

**PROVIDER'S PLAN OF CORRECTION**

(EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)

**COMPLETION DATE:**

3/8/18

1. The Administrator and Director of Environmental Services met with the Administrator and Maintenance Director of Promontory Point Rehabilitation on 2/20/18 to plan and schedule a full scale exercise to challenge the effectiveness of the EMP on 3/2/18.
Continued From page 17

unannounced staff drills using the emergency procedures. The LTC facility must do all of the following:

(i) Participate in a full-scale exercise that is community-based or when a community-based exercise is not accessible, an individual, facility-based. If the [facility] experiences an actual natural or man-made emergency that requires activation of the emergency plan, the [facility] is exempt from engaging in a community-based or individual, facility-based full-scale exercise for 1 year following the onset of the actual event.

(ii) Conduct an additional exercise that may include, but is not limited to the following:
(A) A second full-scale exercise that is community-based or individual, facility-based.
(B) A tabletop exercise that includes a group discussion led by a facilitator, using a narrated, clinically-relevant emergency scenario, and a set of problem statements, directed messages, or prepared questions designed to challenge an emergency plan.

(iii) Analyze the [facility's] response to and maintain documentation of all drills, tabletop exercises, and emergency events, and revise the [facility's] emergency plan, as needed.

*For RNHCls at §403.748 and OPOs at §486.360 (d)(2) Testing. The [RNHCI and OPO] must conduct exercises to test the emergency plan. The [RNHCI and OPO] must do the following:
(i) Conduct a paper-based, tabletop exercise at least annually. A tabletop exercise is a group discussion led by a facilitator, using a narrated, clinically relevant emergency scenario, and a set of problem statements, directed messages, or prepared questions designed to challenge an
E 039 Continued From page 18

(ii) Analyze the [RNHCI's and OPO’s] response to and maintain documentation of all tabletop exercises, and emergency events, and revise the [RNHCI's and OPO’s] emergency plan, as needed.

This REQUIREMENT is not met as evidenced by:

Based on record review and interview, it was determined the facility failed to participate in two exercises which tested the emergency preparedness readiness of the facility. Failure to participate in full-scale, actual, or tabletop events has the potential to reduce the facility's effectiveness to provide continuation of care to residents during an emergency. This deficient practice affected 41 residents, staff and visitors on the date of the survey.

Findings include:

On 1/31/18 from 11:30 AM - 12:30 PM, review of provided emergency plan, policies and procedures, revealed no documentation demonstrating the facility had participated in any full scale exercise challenging the effectiveness of the emergency plan.

Interview of the Environmental Services Director on 1/31/18 from 1:30 - 2:00 PM, substantiated the facility had not participated in any full-scale events.
