September 17, 2018

Benjamin Roedel, Administrator
Shaw Mountain of Cascadia
909 Reserve Street
Boise, ID 83712-6508

Provider #: 135090

RE: FACILITY FIRE SAFETY & CONSTRUCTION SURVEY REPORT COVER LETTER

Dear Mr. Roedel:

On September 4, 2018, a Facility Fire Safety and Construction survey was conducted at Shaw Mountain of Cascadia by the Department of Health & Welfare, Bureau of Facility Standards to determine if your facility was in compliance with State Licensure and Federal participation requirements for nursing homes participating in the Medicare and/or Medicaid programs. This survey found that your facility was not in substantial compliance with Medicare and Medicaid program participation requirements. This survey found the most serious deficiency to be a widespread deficiency that constitutes no actual harm with potential for more than minimal harm that is not immediate jeopardy, as documented on the enclosed CMS-2567, whereby significant corrections are required.

Enclosed is a Statement of Deficiencies and Plan of Correction, Form CMS-2567, listing Medicare and/or Medicaid deficiencies. If applicable, a similar State Form will be provided listing licensure health deficiencies. In the spaces provided on the right side of each sheet, answer each deficiency and state the date when each will be completed. Please provide ONLY ONE completion date for each federal and state tag in column (X5) Completion Date to signify when
you allege that each tag will be back in compliance. NOTE: The alleged compliance date must be after the "Date Survey Completed" (located in field X3) and on or before the "Opportunity to Correct" (listed on page 2). After each deficiency has been answered and dated, the administrator should sign the Statement of Deficiencies and Plan of Correction, CMS-2567 Form in the spaces provided and return the originals to this office. If a State Form with deficiencies was issued, it should be signed, dated and returned along with the CMS-2567 Form.

Your Plan of Correction (PoC) for the deficiencies must be submitted by October 1, 2018. Failure to submit an acceptable PoC by October 1, 2018, may result in the imposition of civil monetary penalties by October 22, 2018.

Your PoC must contain the following:

- What corrective action(s) will be accomplished for those residents found to have been affected by the deficient practice;

- How you will identify other residents having the potential to be affected by the same deficient practice and what corrective action(s) will be taken;

- What measures will be put into place or what systemic changes you will make to ensure that the deficient practice does not recur;

- How the corrective action(s) will be monitored to ensure the deficient practice will not recur, i.e., what quality assurance program will be put into place; and,

- Include dates when corrective action will be completed.

- The administrator must sign and date the first page of both the federal survey report, Form CMS-2567. If a State Form was issued as well, it should also be signed, dated and returned.

All references to federal regulatory requirements contained in this letter are found in Title 42, Code of Federal Regulations.

Remedies may be recommended for imposition by the Centers for Medicare and Medicaid Services (CMS) if your facility has failed to achieve substantial compliance by October 9, 2018, (Opportunity to Correct). Informal dispute resolution of the cited deficiencies will not delay the imposition of the enforcement actions recommended (or revised, as appropriate) on October 9, 2018. A change in the seriousness of the deficiencies on October 9, 2018, may result in a change in the remedy.
The remedy, which will be recommended if substantial compliance has not been achieved by **October 9, 2018**, includes the following:

**Denial of payment for new admissions effective December 4, 2018.**

42 CFR §488.417(a)

If you do not achieve substantial compliance within three (3) months after the last day of the survey identifying noncompliance, the CMS Regional Office and/or State Medicaid Agency must deny payments for new admissions.

We must recommend to the CMS Regional Office and/or State Medicaid Agency that your provider agreement be terminated on **March 4, 2019**, if substantial compliance is not achieved by that time.

Please note that this notice does not constitute formal notice of imposition of alternative remedies or termination of your provider agreement. Should the Centers for Medicare & Medicaid Services determine that termination or any other remedy is warranted, it will provide you with a separate formal notification of that determination.

If you believe these deficiencies have been corrected, you may contact Nate Elkins, Supervisor, Facility Fire Safety and Construction, Bureau of Facility Standards, 3232 Elder Street, PO Box 83720, Boise, ID 83720-0009, Phone #: (208) 334-6626, option 3; Fax #: (208) 364-1888, with your written credible allegation of compliance. If you choose and so indicate, the PoC may constitute your allegation of compliance. We may accept the written allegation of compliance and presume compliance until substantiated by a revisit or other means. In such a case, neither the CMS Regional Office nor the State Medicaid Agency will impose the previously recommended remedy, if appropriate.

If, upon the subsequent revisit, your facility has not achieved substantial compliance, we will recommend that the remedies previously mentioned in this letter be imposed by the CMS Regional Office or the State Medicaid Agency beginning on **September 4, 2018**, and continue until substantial compliance is achieved. Additionally, the CMS Regional Office or State Medicaid Agency may impose a revised remedy(ies), based on changes in the seriousness of the non-compliance at the time of the revisit, if appropriate.

In accordance with 42 CFR §488.331, you have one opportunity to question cited deficiencies through an informal dispute resolution process. To be given such an opportunity, you are required to send your written request and all required information as directed in Informational Letter #2001-10. Informational Letter #2001-10 can also be found on the Internet at:

Go to the middle of the page to Information Letters section and click on State and select the following:

BFS Letters (06/30/11)
2001-10 Long Term Care Informal Dispute Resolution Process
2001-10 IDR Request Form

This request must be received by October 1, 2018. If your request for informal dispute resolution is received after October 1, 2018, the request will not be granted. An incomplete informal dispute resolution process will not delay the effective date of any enforcement action.

Thank you for the courtesies extended to us during the survey. If you have any questions, please contact us at (208) 334-6626, option 3.

Sincerely,

Nate Elkins, Supervisor
Facility Fire Safety and Construction

NE/lj
Enclosures
The facility is a Type V(111) single story building originally constructed in 1963, with an addition completed in 1971. The east portion of the building was further re-modeled in 2007 with a special care unit set-up in that portion of the facility. The building is fully sprinklered with an interconnected fire alarm/smoke detection system installed that includes corridors, open spaces and resident rooms. The facility is equipped with an on-site, diesel-fired Emergency Power Supply System generator and exit corridors are supplied with battery-powered emergency backup lighting. The facility is currently licensed for 98 SNF/NF beds with a census of 82 on the date of the survey.

The following deficiencies were cited during the annual fire safety survey conducted on September 4, 2018. The facility was surveyed under the LIFE SAFETY CODE, 2012 Edition, Existing Health Care Occupancy, in accordance with 42 CFR 483.70.

The survey was conducted by:

Sam Burbank
Health Facility Surveyor
Facility Fire Safety and Construction

This plan of correction is submitted as required under Federal and State regulations and statutes applicable to long-term care providers. The plan of correction does not constitute agreement by the facility that the surveyor's findings constitute a deficiency and/or that the scope and severity of the deficiencies cited are correctly applied.

Sprinklered stories must be sprinklered throughout by an approved, supervised automatic system in accordance with section 9.7. (See 19.3.5). Give a brief description, in REMARKS, of the construction, the number of stories, including basements, floors on which patients are located, location of smoke or fire barriers and dates of approval. Complete sketch or attach small floor plan of the building as appropriate. This REQUIREMENT is not met as evidenced by: Based on observation and interview, the facility failed to ensure the fire and smoke resistive properties of the structure were maintained. Failure to maintain rated construction assemblies, has the potential to allow fire, smoke and dangerous gases to pass into unprotected concealed spaces and between compartments.

This deficient practice potentially affected residents, staff, and visitors in 1 of 5 smoke compartments on the date of the survey.

Findings include:

During the facility tour conducted on 9/4/18 from approximately 1:00 - 3:00 PM, observation of the interior wall of the Treatment Supplies storage revealed a 67 inch by 20 inch hole in the wall that separated the storage room from the Activities Director office. When asked about the open hole, the Environmental Services Director stated there was a leak in the wall and the repair of the drywall had not yet been completed.

Actual NFPA standard:

NFPA 101

19.1.6 Minimum Construction Requirements.

19.1.6.1 Health care occupancies shall be limited to the building construction types specified in Table 19.1.6.1, unless otherwise permitted by 19.1.6.2 through 19.1.6.7. (See 8.2.1.)

8.2 Construction and Compartmentation.

8.2.1 Construction.

8.2.1.1 Buildings or structures occupied or used in accordance with the individual occupancy chapters, Chapters 11 through 43, shall meet the minimum construction requirements of those chapters.

8.2.2.2 Fire compartments shall be formed with fire barriers that comply with Section 8.3.

8.3.5.6 Membrane Penetrations.

8.3.5.6.1 Membrane penetrations for cables, cable trays, conduits, pipes, tubes, combustion

Compliance and Fire smoke compartments.

1. Corrective Action:

The interior wall of the treatment room that revealed a hole was corrected by adding new drywall / patched.

2. Identification of others affected:

Residents' staff and visitors in 1 of 5 smoke compartments on the date of the survey.

3. Systemic Changes to ensure deficient practice does not recur:

Staff educated on or before 10/5/2018 by Executive Director or designee regarding facilities requirement / fire safety / smoke and fire compartments. Staff directed to report any areas of concern for fire safety.

4. Monitor of Corrective Action:

Facility Environmental Service Director and Administrator or designee to walk facility monthly to ensure all smoke compartments are working properly and report to QAPI committee. QAPI will follow fire / smoke compartment issues until they are no longer a concern to the IDT.

<tr>
<td></td>
<td></td>
<td></td>
<td>3. Systemic Changes to ensure deficient practice does not recur: Kitchen Staff educated on or before 10/5/2018 by Executive Director or designee regarding kitchen hood system and prevention of grease fires. Also, facility vendor that completes the hood inspection was notified and made aware of findings. Vendor to ensure the hood is in proper working order, with Environmental Service Director to monitor the work of the vendor.</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>4. Monitor of Corrective Action: QAPI will follow hood lifter maintenance issues until they are no longer a concern to the IDT.</td>
<td></td>
</tr>
</tbody>
</table>
K 324 Continued From page 4

Kitchen hood systems were maintained in accordance with NFPA 96. Failure to ensure grease laden vapors do not bypass hood filters could allow grease build-up inside the exhaust system, increasing the risk of grease fires. This deficient practice affected staff and visitors of the main kitchen on the date of the survey.

Findings include:

During the facility tour conducted on 9/4/18 from approximately 1:00 - 4:00 PM, observation of the main kitchen hood system revealed a gap of approximately 3/4 inch between the filler on the left hand side and the stationary panel when facing the hood, allowing exhaust air to bypass the filters.

Actual NFPA standard:

NFPA 96

6.2.3 Grease Filters.
6.2.3.3 Grease filters shall be arranged so that all exhaust air passes through the grease filters.

K 363 Corridor - Doors

Corridor - Doors

1. Corrective Action:
   Facility Environmental Service Director has ordered 4 clear oak fire rated doors on 9/28/18 as needed. Vendor to install doors upon arrival.

2. Identification of others affected:
   All residents and staff are potentially affected by deficient practice.

**STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION**

**K 511**

**ID/Prefix Tag**: Continued From page 7

**Summary Statement of Deficiencies**

Installations can continue in service provided no hazard to life.

18.5.1.1, 19.5.1.1, 9.1.1, 9.1.2

This REQUIREMENT is not met as evidenced by:

Based on observation, the facility failed to ensure safe electrical equipment installations in accordance with NFPA 70. Failure to enclose live electrical installations with a protective cover, has the potential of exposing residents to electrical shock and/or arc fires. This deficient practice affected residents using the social center, staff and visitors, on the date of the survey.

**Findings include:**

During the facility tour conducted on 9/4/18 from approximately 1:30 - 3:00 PM, observation of the installed electrical installations, revealed the following:

1) A light switch on the west wall of the Activities storage room was missing a protective cover, allowing possible physical contact with energized parts.
2) Observation of the med room off the 200 hall, revealed an outlet located behind the refrigerator was missing the protective cover, allowing possible physical contact to the energized parts.
3) Observation of the Social Center revealed a three to one, multiple plug extension cord used to supply power to the audio visual equipment. Further observation of this cord revealed the cord ran under an area rug from the wall to the energized equipment.
4) Observation of the Kitchen storage room

**Corrective Action:**

1. Cover on light switch in the activity’s storage room was replaced with new cover.
2. Med room outlet cover replaced with new cover.
3. Multiple plug extension cord in the Social Center was removed from facility.
4. Kitchen storage room, both outlets that were charred were replaced with new outlets by a certified electrician.

2. Identification of others affected:

All staff that utilize those specific areas are potentially affected by deficient practice.

3. Systemic Changes to ensure deficient practice does not recur:

Staff educated on or before 10/5/2018 by Executive Director or designee regarding safe electrical equipment and importance of enclosing live electrical outlets. Staff educated to report these items if seen to the Environmental Service Director and/or Administrator.

4. Monitor of Corrective Action:

Facility Environmental Service Director and Administrator or designee to walk facility monthly to ensure all electrical enclosures are in place and are working properly. Findings to be reported back to QAPI committee. QAPI will follow safe electrical equipment issues until they are no longer a concern to the IDT.

**HVAC**

Heating, ventilation, and air conditioning shall comply with 9.2 and shall be installed in accordance with the manufacturer's specifications.

19.5.2.1

**This REQUIREMENT is not met as evidenced by:**

Based on record review, observation and interview, the facility failed to ensure installed fire dampers were maintained in accordance with NFPA 60. Failure to ensure fire dampers installed in fuel-fired Heating Ventilation and Air Conditioning (HVAC) equipment are maintained, has the potential to allow smoke, fire and dangerous gases to pass between compartments.
## Summary Statement of Deficiencies and Provider's Plan of Correction

### Facility Environmental Service

1. **Corrective Action:** Facility Environmental Service Director notified Western Heating and Cooling (HVAC vendor) and vendor completed inspection on all fire dampers on 9/25/2018.

2. **Identification of others affected:** All residents and staff are potentially affected by deficient practice.

3. **Systemic Changes to ensure deficient practice does not recur:** HVAC vendor to perform inspections on all fire dampers in accordance with NFPA 80. Vendor to communicate with Environmental Service Director and/or Administrator to ensure inspections are completed timely in accordance with NFPA 80.

4. **Monitor of Corrective Action:** Environmental Service Director on or before 10/5/2018 to add to his calendar to ensure inspection occurs at minimum every 4 years.

### Findings Include:

1. During review of facility maintenance records conducted on 9/4/18 from 8:30 to 10:30 AM, no records were available indicating the date of the last fire damper inspection. When asked if he knew of the last time the dampers had been inspected, the Environmental Services Director stated he was not aware of that inspection having been completed.

2. During the facility tour conducted on 9/4/18 from 1:00 to 4:00 PM, inspection of the fuel-fired equipment installed in the mechanical space on the southeast side of the facility, revealed one (1) fire damper installed on the return air side of the system.

</tbody>
</table>

**Findings Include:**

1. **During review of provided facility maintenance records conducted on 9/4/18 from 8:30 to 10:30 AM, no records were provided demonstrating fire drills were performed on the following shifts:**
   - PM (three o'clock pm to eleven o'clock pm) shift during the second quarter of 2018
   - NOC (eleven o'clock pm to seven o'clock am) shift during the third quarter of 2017
   - AM (seven o'clock am to three o'clock pm)

2. **Interview of the Environmental Services Manager revealed he was not aware of the missing fire drills.**

**Actual NFPA Standard:**

19.7* Operating Features.

19.7.1 Evacuation and Relocation Plan and Fire Drills.

19.7.1.6 Drills shall be conducted quarterly on each shift to familiarize facility personnel (nurses, interns, maintenance engineers, and administrative staff) with the signals and emergency action required under varied conditions.

**Correction Action:**

1. Facility Environmental Service Director completed 3 separate fire drills. One fire drill per shift (Day, Evening, and NOC) before 10/5/2018.

2. Identification of others affected:
   - All residents and staff are potentially affected by deficient practice.

3. Systemic Changes to ensure deficient practice does not recur:
   - All Staff educated on or before 10/5/2018 by Executive Director or designee regarding fire drills and the policy and procedure for the facility.

4. Monitor of Corrective Action:
   - Facility Administrator to ensure with the Environmental Service Director that all drills are completed. A minimum of 1 fire drill per shift per quarter. All drills reported to QAPI, and committee will follow safe fire drills issues until they are no longer a concern to the IDT.

**K 916 Electrical Systems - Essential Electric System**

**CFR(s):** NFPA 101

**Systemic Changes to ensure deficient practice does not recur:**

**K926**

**Summary Statement of Deficiencies:**

Include periodic review of safety guidelines and usage requirements for medical gases and their cylinders.

**K927**

**Gas Equipment - Transfilling Cylinders**

- Transfilling of oxygen from one cylinder to another is in accordance with CGA P-2.5.
- Transfilling of High Pressure Gaseous Oxygen Used for Respiration. Transfilling of any gas from one cylinder to another is prohibited in patient care rooms. Transfilling to liquid oxygen containers or to portable containers over 50 psi comply with conditions under 11.5.2.3.1 (NFPA 99).
- Transfilling to liquid oxygen containers or to portable containers under 50 psi comply with conditions under 11.5.2.3.2 (NFPA 99).

This **Requirement** is not met as evidenced by:

- Based on observation, the facility failed to ensure that transfilling procedures and the storage of cryogenic medical gas cylinders, was in accordance with NFPA 99. Failure to transfill or transfer liquid oxygen (LOX) over the appropriate substrate and secure cylinders containing LOX, has the potential to expose residents to explosions and accelerated fire conditions. This deficient practice affected staff and visitors on the day of the survey.

**Findings include:**

- During the facility tour conducted on 9/4/18 from 1:00 - 3:00 PM, observation of the oxygen storage and transfill room located in main Laundry corridor, revealed the flooring of the transfill area was vinyl composite tile (VCT) glued down over concrete. Further observation revealed

---

**1. Corrective Action:**

- Environmental Service Director secured all 5 LOX cylinders by chaining them to the wall and placing them on rollers. Facility Oxygen Storage room VCT flooring was removed. Ceramic tile will be installed on or before 10/5/2018.

**2. Identification of others affected:**

- All staff working with O2 are potentially affected by deficient practice.

**3. Systemic Changes to ensure deficient practice does not recur:**

- Facility staff educated by Administrator or designee on or before 10/5/2018 to ensure understanding that oxygen cylinders need to be secured per NFPA regulations.

**4. Monitor of Corrective Action:**

- Executive Director or designee will audit designated oxygen holding areas weekly. Results of audit will be reported to QAPI committee. QAPI will follow oxygen training issues until they are no longer a concern to the IDT.
K927 Continued From page 17
five (5) unsecured LOX cylinders.

NFPA 99

11.5.2.3 Transfilling Liquid Oxygen. Transfilling of liquid oxygen shall comply with 11.5.2.3.1 or 11.5.2.3.2, as applicable.

11.5.2.3.1 Transfilling to liquid oxygen base reservoir containers or to liquid oxygen portable containers over 344.74 kPa (50 psi) shall include the following:
(1) A designated area separated from any portion of a facility wherein patients are housed, examined, or treated by a fire barrier of 1 hour fire-resistive construction.
(2) The area is mechanically ventilated, is sprinklered, and has ceramic or concrete flooring.
(3) The area is posted with signs indicating that transfilling is occurring and that smoking in the immediate area is not permitted.
(4) The individual transfilling the container(s) has been properly trained in the transfilling procedures.

11.7.3.3* Liquid oxygen base reservoir containers shall be secured by one of the following methods while in storage or use to prevent tipping over caused by contact, vibration, or seismic activity:
(1) Securing to a fixed object with one or more restraints
(2) Securing within a framework, stand, or assembly designed to resist container movement
(3) Restraining by placing the container against two points of contact
September 17, 2018

Benjamin Roedel, Administrator
Shaw Mountain of Cascadia
909 Reserve Street
Boise, ID 83712-6508

Provider #: 135090

RE: EMERGENCY PREPAREDNESS SURVEY REPORT COVER LETTER

Dear Mr. Roedel:

On September 4, 2018, an Emergency Preparedness survey was conducted at Shaw Mountain of Cascadia by the Department of Health & Welfare, Bureau of Facility Standards to determine if your facility was in compliance with Federal participation requirements for nursing homes participating in the Medicare and/or Medicaid programs. This survey found that your facility was not in substantial compliance with Medicare and Medicaid program participation requirements. This survey found the most serious deficiency to be a widespread deficiency that constitutes no actual harm with potential for more than minimal harm that is not immediate jeopardy, as documented on the enclosed CMS-2567, whereby significant corrections are required.

Enclosed is a Statement of Deficiencies and Plan of Correction, Form CMS-2567, listing Medicare and/or Medicaid deficiencies. In the spaces provided on the right side of each sheet, answer each deficiency and state the date when each will be completed. Please provide ONLY ONE completion date for each federal and state tag in column (X5) Completion Date to signify when you allege that each tag will be back in compliance. NOTE: The alleged compliance date must be after the "Date Survey Completed" (located in field X3) and on or before the "Opportunity to Correct" (listed on page 2). After each deficiency has been answered and dated, the administrator should sign the Statement of Deficiencies and Plan of Correction, CMS-2567 Form in the spaces provided and return the originals to this office.
Your Plan of Correction (PoC) for the deficiencies must be submitted by **October 1, 2018**. Failure to submit an acceptable PoC by **October 1, 2018**, may result in the imposition of civil monetary penalties by **October 22, 2018**.

Your PoC must contain the following:

- What corrective action(s) will be accomplished for those residents found to have been affected by the deficient practice;
- How you will identify other residents having the potential to be affected by the same deficient practice and what corrective action(s) will be taken;
- What measures will be put into place or what systemic changes you will make to ensure that the deficient practice does not recur;
- How the corrective action(s) will be monitored to ensure the deficient practice will not recur, i.e., what quality assurance program will be put into place; and,
- Include dates when corrective action will be completed.
- The administrator must sign and date the first page of both the federal survey report, Form CMS-2567. If a State Form was issued as well, it should also be signed, dated and returned.

All references to federal regulatory requirements contained in this letter are found in Title 42, Code of Federal Regulations.

Remedies may be recommended for imposition by the Centers for Medicare and Medicaid Services (CMS) if your facility has failed to achieve substantial compliance by **October 9, 2018**, (Opportunity to Correct). Informal dispute resolution of the cited deficiencies will not delay the imposition of the enforcement actions recommended (or revised, as appropriate) on **October 9, 2018**. A change in the seriousness of the deficiencies on **October 9, 2018**, may result in a change in the remedy.

The remedy, which will be recommended if substantial compliance has not been achieved by **October 9, 2018**, includes the following:

Denial of payment for new admissions effective **December 4, 2018**.

42 CFR §488.417(a)

If you do not achieve substantial compliance within three (3) months after the last day of the survey identifying noncompliance, the CMS Regional Office and/or State Medicaid Agency must deny payments for new admissions.
We must recommend to the CMS Regional Office and/or State Medicaid Agency that your provider agreement be terminated on March 4, 2019, if substantial compliance is not achieved by that time.

Please note that this notice does not constitute formal notice of imposition of alternative remedies or termination of your provider agreement. Should the Centers for Medicare & Medicaid Services determine that termination or any other remedy is warranted, it will provide you with a separate formal notification of that determination.

If you believe these deficiencies have been corrected, you may contact Nate Elkins, Supervisor, Facility Fire Safety and Construction, Bureau of Facility Standards, 3232 Elder Street, PO Box 83720, Boise, ID 83720-0009, Phone #: (208) 334-6626, option 3; Fax #: (208) 364-1888, with your written credible allegation of compliance. If you choose and so indicate, the PoC may constitute your allegation of compliance. We may accept the written allegation of compliance and presume compliance until substantiated by a revisit or other means. In such a case, neither the CMS Regional Office nor the State Medicaid Agency will impose the previously recommended remedy, if appropriate.

If, upon the subsequent revisit, your facility has not achieved substantial compliance, we will recommend that the remedies previously mentioned in this letter be imposed by the CMS Regional Office or the State Medicaid Agency beginning on September 4, 2018, and continue until substantial compliance is achieved. Additionally, the CMS Regional Office or State Medicaid Agency may impose a revised remedy(ies), based on changes in the seriousness of the non-compliance at the time of the revisit, if appropriate.

In accordance with 42 CFR §488.331, you have one opportunity to question cited deficiencies through an informal dispute resolution process. To be given such an opportunity, you are required to send your written request and all required information as directed in Informational Letter #2001-10. Informational Letter #2001-10 can also be found on the Internet at:

Go to the middle of the page to Information Letters section and click on State and select the following:

BFS Letters (06/30/11)

2001-10 Long Term Care Informal Dispute Resolution Process
2001-10 IDR Request Form
This request must be received by **October 1, 2018**. If your request for informal dispute resolution is received after **October 1, 2018**, the request will not be granted. An incomplete informal dispute resolution process will not delay the effective date of any enforcement action.

Thank you for the courtesies extended to us during the survey. If you have any questions, please contact us at (208) 334-6626, option 3.

Sincerely,

Nate Elkins, Supervisor
Facility Fire Safety and Construction

Enclosures
The facility is a Type V(111) single story building originally constructed in 1963, with an addition completed in 1971. The east portion of the building was further re-modeled in 2007 with a special care unit set-up in that portion of the facility. The facility is located in a municipal fire district with support from county and state EMS services.

The building is fully sprinklered with an interconnected fire alarm/smoke detection system installed that includes corridors, open spaces and resident rooms. The facility is equipped with an on-site, diesel-fired Emergency Power Supply System generator and exit corridors are supplied with battery-powered, emergency backup lighting. The facility is currently licensed for 99 SNF/NF beds with a census of 82 on the date of the survey.

The following deficiencies were cited during the annual Emergency Preparedness survey conducted on September 4, 2018. The facility was surveyed under the Emergency Preparedness Rule established by CMS, in accordance with 42 CFR 483.73.

The Survey was conducted by:

Sam Burbank
Health Facility Surveyor
Facility Fire Safety and Construction

This plan of correction is submitted as required under Federal and State regulations and statutes applicable to long-term care providers. The plan of correction does not constitute agreement by the facility that the surveyor’s findings constitute a deficiency and/or that the scope and severity of the deficiencies cited are correctly applied.

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

| *For ESRD facilities only at §494.62(a)(4): (4) Include a process for cooperation and collaboration with local, tribal, regional, State, and Federal emergency preparedness officials' efforts to maintain an integrated response during a disaster or emergency situation, including documentation of the dialysis facility's efforts to contact such officials and, when applicable, of its participation in collaborative and cooperative planning efforts. The dialysis facility must contact the local emergency preparedness agency at least annually to confirm that the agency is aware of the dialysis facility's needs in the event of an emergency. This REQUIREMENT is not met as evidenced by:
Based on record review, it was determined the facility failed to document collaboration with local, tribal, regional, State and Federal EP officials and integrated emergency response efforts. Failure to develop a collaborative planning effort with multi-jurisdictional entities, has the potential to limit the facilities options during a disaster. This deficient practice affected 82 residents, staff and visitors on the date of the survey. Findings include:
On 9/4/18 from 8:30 - 3:00 PM, review of... | 1. Corrective Action:
Shaw Mountain of Cascadia's Emergency Management Plan was reviewed and updated on or before Oct 5, 2018 by facility QAPI committed to include comprehensive collaboration with local emergency planning authorities. Facility administrator or designee to attend and participate in community / regional healthcare coalition meetings.

2. Identification of others affected:
All residents are potentially affected by deficient practice.

3. Systemic Changes to ensure deficient practice does not recur:
Staff educated on or before 10/5/2018 by Executive Director or designee regarding facilities updated emergency plan and policy and procedures specific to community partners and collaboration with local emergency authorities. Facility Administrator or designee to be attend next coalition meeting held October 4th.

4. Monitor of Corrective Action:
QAPI will follow emergency preparedness issues until they are no longer a concern to the IDT.

5. Corrective Action Completed: 10/5/2018
E 009 Continued From page 2

Provided policies, procedures and the emergency plan, failed to establish documentation indicating collaborative involvement with local, tribal, regional State and Federal EP officials, including such involvement as participation in county EMS or regional healthcare coalition meetings.

5. Corrective Action Completed:
   10/5/2018
### Summary Statement of Deficiencies

E 030 Continued From page 3

- (1) Names and contact information for the following:
  - (i) Staff.
  - (ii) Entities providing services under arrangement.
  - (iii) Patients' physicians.
- (iv) Volunteers.

*For Hospices at §418.113(c):* The communication plan must include all of the following:
- (1) Names and contact information for the following:
  - (i) Hospice employees.
  - (ii) Entities providing services under arrangement.
  - (iii) Patients' physicians.
  - (iv) Other hospices.

*For OPOs at §486.360(c):* The communication plan must include all of the following:
- (1) Names and contact information for the following:
  - (i) Staff.
  - (ii) Entities providing services under arrangement.
  - (iii) Volunteers.
  - (iv) Other OPOs.
  - (v) Transplant and donor hospitals in the OPO's Donation Service Area (DSA).

This REQUIREMENT is not met as evidenced by:

- Based on record review, it was determined the facility failed to document a communication plan which included contact information for volunteers or volunteer organizations. Failure to have a communication plan which includes contact information for those parties assisting in the facility's response and recovery during a disaster, has the potential to hinder both internal and external emergency response efforts. This deficient practice affected 82 residents, staff and
E030 Continued From page 4
visitors on the date of the survey.

Findings include:

On 9/4/18 from 8:30 AM - 3:00 PM, review of
provided emergency plan, policies and
procedures, failed to reveal a communication
plan that included contact information for resident
volunteers

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION

PROVIDER/SUPPLIER/CLA IDENTIFICATION NUMBER: 135090

A. BUILDING __________ B. WING __________

DATE SURVEY COMPLETED: 09/04/2018

NAME OF PROVIDER OR SUPPLIER: SHAW MOUNTAIN OF CASCADEIA
STREET ADDRESS, CITY, STATE, ZIP CODE: 909 RESERVE STREET, BOISE, ID 83712

ID PREFIX TAG: E 036 E 036

SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)

1. Corrective Action:
   Shaw Mountain of Cascadia's Emergency Management Plan was reviewed and updated on or before Oct 5, 2018 by facility QAPI committee. Plan to include updated and site-specific policy regarding training and testing of employees for Emergency Management plan upon orientation and annually. Plan will include documentation and staff competency completion. See also E 037.

2. Identification of others affected:
   All residents are potentially affected by deficient practice.

3. Systemic Changes to ensure deficient practice does not recur:
   Staff educated on or before 10/5/2018 by Executive Director or designee regarding current emergency preparedness plan, and the policies and procedures. Additional education to be provided as directed. Staff Development Coordinator educated on or before 10/5/2018 by Executive Director to validate training and testing program is available and offered upon orientation and annually to employees (annual training calendar to include updates).

10/5/18

- Policies and procedures to all new and existing staff, individuals providing on-site services under arrangement, and volunteers, consistent with their expected roles.
  - (i) Provide emergency preparedness training at least annually.
  - (ii) Maintain documentation of the training.
  - (iii) Demonstrate staff knowledge of emergency procedures.

**For Hospices at §418.113(d):**

- (1) Training. The hospice must do all of the following:
  - (i) Initial training in emergency preparedness policies and procedures to all new and existing hospice employees, and individuals providing services under arrangement, consistent with their expected roles.
  - (ii) Demonstrate staff knowledge of emergency procedures.
  - (iii) Provide emergency preparedness training at least annually.
  - (iv) Periodically review and rehearse its emergency preparedness plan with hospice employees (including nonemployee staff), with special emphasis placed on carrying out the procedures necessary to protect patients and others.

**For PRTFs at §441.184(d):**

- (1) Training program. The PRTF must do all of the following:
  - (i) Initial training in emergency preparedness policies and procedures to all new and existing staff, individuals providing services under arrangement, and volunteers, consistent with their expected roles.
  - (ii) After initial training, provide emergency preparedness training at least annually.
  - (iii) Demonstrate staff knowledge of emergency procedures.
  - (iv) Maintain documentation of all emergency

### Corrective Action

- **Systemic Changes to ensure deficient practice does not recur:**
  - Staff educated on or before 10/5/2018 by Executive Director or designee regarding current emergency preparedness plan, and the policies and procedures.
  - Periodic random interviews and education to be provided as directed to ensure staff understanding on the current emergency plan. Staff Development Coordinator educated on or before 10/5/2018 by Executive Director to validate training and testing program is available and offered upon orientation and annually to employees (annual training calendar to include updates).

- **Monitor of Corrective Action:**
  - Staff interviews will be conducted randomly to ensure the effectiveness of the training and areas that need to be a focus for training. Results of interviews to be reported to the QAPI committee. QAPI will follow emergency preparedness issues until they are no longer a concern to the IDT.

preparation training.

*For PACE at §480.84(d): (1) The PACE organization must do all of the following:
(i) Initial training in emergency preparedness policies and procedures to all new and existing staff, individuals providing on-site services under arrangement, contractors, participants, and volunteers, consistent with their expected roles.
(ii) Provide emergency preparedness training at least annually.
(iii) Demonstrate staff knowledge of emergency procedures, including informing participants of what to do, where to go, and whom to contact in case of an emergency.
(iv) Maintain documentation of all training.

*For CORFs at §485.68(d): (1) Training. The CORF must do all of the following:
(i) Provide initial training in emergency preparedness policies and procedures to all new and existing staff, individuals providing services under arrangement, and volunteers, consistent with their expected roles.
(ii) Provide emergency preparedness training at least annually.
(iii) Maintain documentation of the training.
(iv) Demonstrate staff knowledge of emergency procedures. All new personnel must be oriented and assigned specific responsibilities regarding the CORF's emergency plan within 2 weeks of their first workday. The training program must include instruction in the location and use of alarm systems and signals and firefighting equipment.

*For CAHs at §485.625(d): (1) Training program. The CAH must do all of the following:
(i) Initial training in emergency preparedness policies and procedures, including prompt

Reporting and extinguishing of fires, protection, and where necessary, evacuation of patients, personnel, and guests, fire prevention, and cooperation with firefighting and disaster authorities, to all new and existing staff, individuals providing services under arrangement, and volunteers, consistent with their expected roles.

(ii) Provide emergency preparedness training at least annually.

(iii) Maintain documentation of the training.

(iv) Demonstrate staff knowledge of emergency procedures.

*For CMHCs at §485.920(d):* (1) Training. The CMHC must provide initial training in emergency preparedness policies and procedures to all new and existing staff, individuals providing services under arrangement, and volunteers, consistent with their expected roles, and maintain documentation of the training. The CMHC must demonstrate staff knowledge of emergency procedures. Thereafter, the CMHC must provide emergency preparedness training at least annually.

This REQUIREMENT is not met as evidenced by:

Based on record review and interview, it was determined the facility failed to provide an emergency prep training program. Lack of a training program on the emergency preparedness plan and policies for the facility, has the potential to hinder staff response during a disaster. This deficient practice affected 82 residents, staff and visitors on the date of the survey.

**Findings include:**

On 9/4/18 from 8:30 AM - 3:30 PM, review of provided emergency plan, policy and procedures,
