November 27, 2018

Randal Barnes, Administrator
Valley View Nursing & Rehabilitation
1140 North Allumbaugh Street
Boise, ID 83704-8700

Provider #: 135098

RE: FACILITY FIRE SAFETY & CONSTRUCTION SURVEY REPORT COVER LETTER

Dear Mr. Barnes:

On November 14, 2018, a Facility Fire Safety and Construction survey was conducted at Valley View Nursing & Rehabilitation by the Department of Health & Welfare, Bureau of Facility Standards to determine if your facility was in compliance with State Licensure and Federal participation requirements for nursing homes participating in the Medicare and/or Medicaid programs. This survey found that your facility was not in substantial compliance with Medicare and Medicaid program participation requirements. This survey found the most serious deficiency to be a widespread deficiency that constitutes no actual harm with potential for more than minimal harm that is not immediate jeopardy, as documented on the enclosed CMS-2567, whereby significant corrections are required.

Enclosed is a Statement of Deficiencies and Plan of Correction, Form CMS-2567, listing Medicare and/or Medicaid deficiencies. If applicable, a similar State Form will be provided listing licensure health deficiencies. In the spaces provided on the right side of each sheet, answer each deficiency and state the date when each will be completed. Please provide ONLY ONE completion date for each federal and state tag in column (XS) Completion Date to signify when
you allege that each tag will be back in compliance. **NOTE:** The alleged compliance date must be after the "Date Survey Completed" (located in field X3) and on or before the "Opportunity to Correct" (listed on page 2). After each deficiency has been answered and dated, the administrator should sign the Statement of Deficiencies and Plan of Correction, CMS-2567 Form in the spaces provided and return the originals to this office. If a State Form with deficiencies was issued, it should be signed, dated and returned along with the CMS-2567 Form.

Your Plan of Correction (PoC) for the deficiencies must be submitted by **December 10, 2018.** Failure to submit an acceptable PoC by **December 10, 2018,** may result in the imposition of civil monetary penalties by **January 1, 2019.**

Your PoC must contain the following:

- What corrective action(s) will be accomplished for those residents found to have been affected by the deficient practice;

- How you will identify other residents having the potential to be affected by the same deficient practice and what corrective action(s) will be taken;

- What measures will be put into place or what systemic changes you will make to ensure that the deficient practice does not recur;

- How the corrective action(s) will be monitored to ensure the deficient practice will not recur, i.e., what quality assurance program will be put into place; and,

- Include dates when corrective action will be completed.

- The administrator must sign and date the first page of both the federal survey report, Form CMS-2567. If a State Form was issued as well, it should also be signed, dated and returned.

All references to federal regulatory requirements contained in this letter are found in Title 42, Code of Federal Regulations.

Remedies may be recommended for imposition by the Centers for Medicare and Medicaid Services (CMS) if your facility has failed to achieve substantial compliance by **December 19, 2018,** (Opportunity to Correct). Informal dispute resolution of the cited deficiencies will not delay the imposition of the enforcement actions recommended (or revised, as appropriate) on **February 12, 2019.** A change in the seriousness of the deficiencies on **December 29, 2018,** may result in a change in the remedy.
The remedy, which will be recommended if substantial compliance has not been achieved by December 19, 2018, includes the following:

Denial of payment for new admissions effective February 14, 2019.
42 CFR §488.417(a)

If you do not achieve substantial compliance within three (3) months after the last day of the survey identifying noncompliance, the CMS Regional Office and/or State Medicaid Agency must deny payments for new admissions.

We must recommend to the CMS Regional Office and/or State Medicaid Agency that your provider agreement be terminated on May 14, 2019, if substantial compliance is not achieved by that time.

Please note that this notice does not constitute formal notice of imposition of alternative remedies or termination of your provider agreement. Should the Centers for Medicare & Medicaid Services determine that termination or any other remedy is warranted, it will provide you with a separate formal notification of that determination.

If you believe these deficiencies have been corrected, you may contact Nate Elkins, Supervisor, Facility Fire Safety and Construction, Bureau of Facility Standards, 3232 Elder Street, PO Box 83720, Boise, ID 83720-0009, Phone #: (208) 334-6626, option 3; Fax #: (208) 364-1888, with your written credible allegation of compliance. If you choose and so indicate, the PoC may constitute your allegation of compliance. We may accept the written allegation of compliance and presume compliance until substantiated by a revisit or other means. In such a case, neither the CMS Regional Office nor the State Medicaid Agency will impose the previously recommended remedy, if appropriate.

If, upon the subsequent revisit, your facility has not achieved substantial compliance, we will recommend that the remedies previously mentioned in this letter be imposed by the CMS Regional Office or the State Medicaid Agency beginning on November 14, 2018, and continue until substantial compliance is achieved. Additionally, the CMS Regional Office or State Medicaid Agency may impose a revised remedy(ies), based on changes in the seriousness of the non-compliance at the time of the revisit, if appropriate.

In accordance with 42 CFR §488.331, you have one opportunity to question cited deficiencies through an informal dispute resolution process. To be given such an opportunity, you are required to send your written request and all required information as directed in Informational Letter #2001-10. Informational Letter #2001-10 can also be found on the Internet at:
Go to the middle of the page to Information Letters section and click on State and select the following:

BFS Letters (06/30/11)

2001-10 Long Term Care Informal Dispute Resolution Process
2001-10 IDR Request Form

This request must be received by **December 10, 2018**. If your request for informal dispute resolution is received after **December 10, 2018**, the request will not be granted. An incomplete informal dispute resolution process will not delay the effective date of any enforcement action.

Thank you for the courtesies extended to us during the survey. If you have any questions, please contact us at (208) 334-6626, option 3.

Sincerely,

Nate Elkins, Supervisor
Facility Fire Safety and Construction

Enclosures
STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION

(IDENTIFICATION NUMBER: 135098)

NAME OF PROVIDER OR SUPPLIER: VALLEY VIEW NURSING & REHABILITATION

STREET ADDRESS, CITY, STATE, ZIP CODE: 1140 NORTH ALLUMBAUGH STREET, BOISE, ID 83704

INITIAL COMMENTS:

The facility is a two story Type II (111) completed in 1985. It underwent a complete renovation in 2009. There is a two-hour fire separation between the nursing facility and the retirement center apartments. The fire alarm system was upgraded in 2009 with addressable smoke detection throughout the building. The fire sprinkler system was upgraded in 2009 with quick response heads throughout the facility. The facility is currently licensed for 120 SNF/NF beds with a census of 85 on the date of the survey.

The following deficiencies were cited during the annual fire/life safety survey conducted on November 13 and 14, 2018. The facility was surveyed under the LIFE SAFETY CODE, 2012 Edition, Existing Health Care Occupancy, in accordance with 42 CFR 483.70.

The survey was conducted by:

Sam Burbank
Health Facility Surveyor
Facility Fire Safety and Construction

K 000

This Plan of Correction is submitted as required under State and Federal regulations and statutes applicable to long-term providers. The Plan of Correction does not constitute an admission of liability on the part of the facility, and such liability is specifically denied. The submission of this plan of Correction does not constitute agreement by the facility that the surveyors findings and/or conclusions constitute a deficiency, or that the scope and severity of the deficiencies cited are correctly applied.

Residents:
The water management plan did contain control measures. The control measures will be documented to attain compliance for our residents.

**Other Residents:**

The water management plan was present and contained the control measures. The control measures will be documented to attain compliance for our residents.

**Measures:**

The control measures will be documented to follow procedures set out in water management plan.

**Corrective Actions:**

The control measures documentation will be reviewed each month in a facility monthly QAPI meeting to ensure its compliance.

**Residents:**

The chairs were removed from the hallway upon notification of issue.
### Summary Statement of Deficiencies

K 232 Continued From page 2

Unobstructed serving as exit access shall be at least 4 feet and maintained to provide the convenient removal of nonambulatory patients on stretchers, except as modified by 19.2.3.4, exceptions 1-5.

19.2.3.4, 19.2.3.5

This REQUIREMENT is not met as evidenced by:

- Based on observation, the facility failed to ensure that the means of egress was unobstructed.
- Providing furniture in a means of egress which is not fixed to the wall or floor impedes corridors and hinders egress of residents during a fire or other emergency. This deficient practice affected 19 residents, staff and visitors on the date of the survey.

**Findings include:**

During the tour of the facility conducted on 11/13/18 from 10:30 AM - 4:00 PM, non-fixed furniture consisting of two (2) chairs, was observed to be placed in the corridor outside room 211. Further observation revealed the corridors to be eight (8) feet width and the section of chairs measured approximately 24-1/2 inches from the wall.

**Actual NFPA standard:**

19.2.3.4* Any required aisle, corridor, or ramp shall be not less than 48 in. (1220 mm) in clear width where serving as means of egress from patient sleeping rooms, unless otherwise permitted by one of the following:

1. Aisles, corridors, and ramps in adjacent areas not intended for the housing, treatment, or use of

**Corrective Measures:**

- Area was cleared on 11-14-18.
- Maintenance and environmental staff trained on requirement.

**Measures:**

- Maintenance Supervisor will report results monthly at the facility QAPI meeting.

**Other Residents:**

Other chairs in hallways and common areas were removed to ensure compliance.

K 232 inpatients shall be not less than 44 in. (1120 mm) in clear and unobstructed width.

(2)*Where corridor width is at least 6 ft (1830 mm), noncontinuous projections not more than 6 in. (150 mm) from the corridor wall, above the handrail height, shall be permitted.

(3) Exit access within a room or suite of rooms complying with the requirements of 19.2.5 shall be permitted.

(4) Projections into the required width shall be permitted for wheeled equipment, provided that all of the following conditions are met:
   - (a) The wheeled equipment does not reduce the clear unobstructed corridor width to less than 60 in. (1525 mm).
   - (b) The health care occupancy fire safety plan and training program address the relocation of the wheeled equipment during a fire or similar emergency.
   - (c)*The wheeled equipment is limited to the following:
     i. Equipment in use and carts in use
     ii. Medical emergency equipment not in use
     iii. Patient lift and transport equipment

(5)*Where the corridor width is at least 8 ft (2440 mm), projections into the required width shall be permitted for fixed furniture, provided that all of the following conditions are met:
   - (a) The fixed furniture is securely attached to the floor or to the wall.
   - (b) The fixed furniture does not reduce the clear unobstructed corridor width to less than 6 ft (1830 mm), except as permitted by 19.2.3.4(2).
   - (c) The fixed furniture is located only on one side of the corridor.
   - (d) The fixed furniture is grouped such that each grouping does not exceed an area of 50 ft² (4.6 m²).
   - (e) The fixed furniture groupings addressed in

**K291** Continued From page 5

from approximately 10:30 AM - 4:00 PM, observation of the exit doors revealed all primary exits on both floors were equipped with magnetic locking arrangements, which included a delayed egress component. However, these doors were not provided with battery powered emergency lighting. Due to the number of locations the locking arrangement was observed, this was found to be systemic throughout the facility and no further documentation was deemed necessary.

Asked about this arrangement, the Maintenance Director stated he was not aware these doors were required to be equipped with emergency lighting.

Actual NFPA standard:

19.2.9 Emergency Lighting.
19.2.9.1 Emergency lighting shall be provided in accordance with Section 7.9.

7.9 Emergency Lighting.
7.9.1 General.
7.9.1.1* Emergency lighting facilities for means of egress shall be provided in accordance with Section 7.9 for the following:
(1) Buildings or structures where required in Chapters 11 through 43
(2) Underground and limited access structures as addressed in Section 11.7
(3) High-rise buildings as required by other sections of this Code
(4) Doors equipped with delayed-egress locks
(5) Stair shafts and vestibules of smokeproof enclosures, for which the following also apply:
(a) The stair shaft and vestibule shall be permitted to include a standby generator that is

<td>Hazard - see K322) This REQUIREMENT is not met as evidenced by: Based on observation and interview, the facility failed to ensure doors to hazardous areas were maintained to the proper rating. Failure to ensure doors to boiler rooms are not equipped with transfer grilles and are maintained as a one-hour containment, has the potential to affect the means of egress and transfer of fires beyond the compartment of origin. This deficient practice affected the exit off the northeast side of the service corridor. Findings include: During the facility tour conducted on 11/13/18 from 10:30 AM - 4:00 PM, observation of the door to the riser room and boiler room revealed a transfer grille, approximately fourteen inches by twenty inches in size had been installed into the door leading into the space. Further observation of the rating of the assembly revealed the frame was tagged as a 3-hour rated assembly. When asked about the modification to the door, the Maintenance Director stated he had installed the vent to help alleviate the heat build-up in the space. Actual NFPA standard: 19.3.2 Protection from Hazards. 19.3.2.1 Hazardous Areas. Any hazardous areas shall be safeguarded by a fire barrier having a 1-hour fire resistance rating or shall be provided with an automatic extinguishing system in accordance with 8.7.1.</td>

Continued From page 8

19.3.2.1.5 Hazardous areas shall include, but shall not be restricted to, the following:

1. Boiler and fuel-fired heater rooms
2. Central/bulk laundries larger than 100 ft² (9.3 m²)
3. Paint shops
4. Repair shops
5. Rooms with soiled linen in volume exceeding 64 gal (242 L)
6. Rooms with collected trash in volume exceeding 64 gal (242 L)
7. Rooms or spaces larger than 50 ft² (4.6 m²), including repair shops, used for storage of combustible supplies and equipment in quantities deemed hazardous by the authority having jurisdiction
8. Laboratories employing flammable or combustible materials in quantities less than those that would be considered a severe hazard

### K 353
Sprinkler System - Maintenance and Testing

**CFR(s):** NFPA 101

Sprinkler System - Maintenance and Testing
Automatic sprinkler and standpipe systems are inspected, tested, and maintained in accordance with NFPA 25, Standard for the Inspection, Testing, and Maintaining of Water-based Fire Protection Systems. Records of system design, maintenance, inspection and testing are maintained in a secure location and readily available.

- **a.** Date sprinkler system last checked
- **b.** Who provided system test
- **c.** Water system supply source

---

**K353**

**Residents:**
Quarterly waterflow testing will be completed.

**Other residents:**
Residents residing in the facility had the potential to be affected by this issue.

**Measures:**
Waterflow testing to be added to quarterly preventative maintenance checklist.
K 353 Continued From page 9
Provide in REMARKS information on coverage for any non-required or partial automatic sprinkler system.

9.7.5, 9.7.7, 9.7.8, and NFPA 25
This REQUIREMENT is not met as evidenced by:
Based on record review, the facility failed to ensure fire suppression systems were maintained properly. Failure to inspect system components has the potential to hinder system performance during a fire event and/or render the facility not fully sprinklered after an activation or repair. This deficient practice affected 85 residents, staff and visitors on the date of the survey.

Findings include:

During review of provided facility inspection and testing records conducted on 11/13/18 from 8:45 - 10:30 AM, records were not available for the third quarter of 2018 waterflow alarm flow test.

Actual NFPA standard:

NFPA 25

5.3.3 Waterflow Alarm Devices.
5.3.3.1 Mechanical waterflow alarm devices including, but not limited to, water motor gongs, shall be tested quarterly.

K 355 Portable Fire Extinguishers

Corrective Actions:
Maintenance will report compliance at the monthly QAPI meetings.

K 355
Residents:
The K style extinguisher was moved and properly signed prior to 7:30am on 11/14/18.
The extinguisher at the reception desk was mounted prior to 7:30am on 11/14/18.
The other two extinguishers were remounted at appropriate heights prior to 730am on 11/14/18.

Other residents:
Residents residing in the facility had the potential to be affected by this issue.

The K style extinguisher was moved and properly signed prior to 730am on 11/14/18.

The extinguisher at reception desk was mounted prior to 730am on 11/14/18.

The other two extinguishers were remounted at appropriate heights prior to 730am on 11/14/18.

Measures:
Maintenance to monitor fire extinguisher heights and mounting through daily rounds.

Corrective Actions:
Maintenance will report compliance at the monthly QAPI meetings.

### Summary Statement of Deficiencies

**K 511 Continued From page 13**

Informational Note: See 90.7, Examination of Equipment for Safety, and 110.3, Examination, Identification, Installation, and Use of Equipment. See definitions of Approved, Identified, Labeled, and Listed.

110.3 Examination, Identification, Installation, and Use of Equipment.

(A) Examination. In judging equipment, considerations such as the following shall be evaluated:

1. Suitability for installation and use in conformity with the provisions of this Code Informational Note: Suitability of equipment use may be identified by a description marked on or provided with a product to identify the suitability of the product for a specific purpose, environment, or application. Special conditions of use or other limitations and other pertinent information. Suitability of equipment may be evidenced by listing or labeling.
2. Mechanical strength and durability, including, for parts designed to enclose and protect other equipment, the adequacy of the protection thus provided
3. Wire-bending and connection space
4. Electrical insulation
5. Heating effects under normal conditions of use and also under abnormal conditions likely to arise in service
6. Arcing effects
7. Classification by type, size, voltage, current capacity, and specific use
8. Other factors that contribute to the practical safeguarding of persons using or likely to come in contact with the equipment

(B) Installation and Use. Listed or labeled equipment shall be installed and used in

manufacturer requirements. Written records of maintenance and testing are maintained and readily available. EES electrical panels and circuits are marked, readily identifiable, and separate from normal power circuits. Minimizing the possibility of damage of the emergency power source is a design consideration for new installations.

6.4.4, 6.5.4, 6.6.4 (NFPA 99), NFPA 110, NFPA 111, 700.10 (NFPA 70)

This REQUIREMENT is not met as evidenced by:

Based on record review and interview, the facility failed to ensure the EES (Essential Electrical System) generator was maintained properly. Failure to test for load monthly has the potential of hindering system performance during a power loss or other emergency. This deficient practice affected 85 residents, staff and visitors on the date of the survey.

Findings include:

During review of annual inspection and maintenance records conducted on 11/13/18 from approximately 8:45 - 10:30 AM, records provided for the monthly generator testing revealed monthly testing conducted for the prior year to date had only documented the load placed on the system during one test, as only one report indicated the amp draw placed on the EES generator.

When asked, the Maintenance Engineer stated he was not aware the documentation for monthly load testing was missing the recording of the amp load.

Actual NFPA standard:

Corrective Actions:
Maintenance will report compliance at the monthly QAPI meetings.
### Statement of Deficiencies and Plan of Correction

**Provider/Supplier/CUA Identification Number:** A. Building 02 - Entire Building

**State:** ID

**Street Address:** 1140 North Allumbaugh Street, Boise, ID 83704

#### NFPA 110

**Requirement:** 8.4 Operational Inspection and Testing.

**Requirement Details:**
- 8.4.1* EPSSs, including all appurtenant components, shall be inspected weekly and exercised under load at least monthly.

**Actual NFPA Standard:**
- NFPA 101

**Summary Statement of Deficiencies:**
- Based on observation the facility failed to ensure medical gases were stored properly. Failure to secure oxygen cylinders has the potential increasing the risks of injury and explosions due to falling cylinders. This deficient practice affected staff and visitors on the date of the survey.

**Findings Include:**
- During the facility tour conducted on 11/13/18 from 1:00 - 3:15 PM, observation of the oxygen storage area at the rear service area of the facility, revealed nine (9) LOX (Liquid oxygen) cylinders that were not secured in a rack or with a restraint.

**Corrective Actions:**
- Residents: The 9 LOX cylinders have now been secured to attain compliance.
- Other Residents: Residents residing in the facility had the potential to be affected by this issue. The 9 LOX cylinders have now been secured to attain compliance.
- Measures: Maintenance to monitor for continued compliance through daily rounds.

**Corrective Actions:**
- Maintenance will report compliance at the monthly QAPI meetings.
### Summary Statement of Deficiencies

**11.7 Liquid Oxygen Equipment.**

11.7.3.3* Liquid oxygen base reservoir containers shall be secured by one of the following methods while in storage or use to prevent tipping over caused by contact, vibration, or seismic activity:

1. Securing to a fixed object with one or more restraints
2. Securing within a framework, stand, or assembly designed to resist container movement
3. Restraining by placing the container against two points of contact

Randal Barnes, Administrator
Valley View Nursing & Rehabilitation
1140 North Allumbaugh Street
Boise, ID 83704-8700

Provider #: 135098

RE: EMERGENCY PREPAREDNESS SURVEY REPORT COVER LETTER

Dear Mr. Barnes:

On November 14, 2018, an Emergency Preparedness survey was conducted at Valley View Nursing & Rehabilitation by the Department of Health & Welfare, Bureau of Facility Standards to determine if your facility was in compliance with Federal participation requirements for nursing homes participating in the Medicare and/or Medicaid programs. This survey found that your facility was not in substantial compliance with Medicare and Medicaid program participation requirements. This survey found the most serious deficiency to be a widespread deficiency that constitutes no actual harm with potential for more than minimal harm that is not immediate jeopardy, as documented on the enclosed CMS-2567, whereby significant corrections are required.

Enclosed is a Statement of Deficiencies and Plan of Correction, Form CMS-2567, listing Medicare and/or Medicaid deficiencies. In the spaces provided on the right side of each sheet, answer each deficiency and state the date when each will be completed. Please provide ONLY ONE completion date for each federal and state tag in column (X5) Completion Date to signify when you allege that each tag will be back in compliance. NOTE: The alleged compliance date must be after the "Date Survey Completed" (located in field X3) and on or before the "Opportunity to Correct" (listed on page 2). After each deficiency has been answered and dated, the administrator should sign the Statement of Deficiencies and Plan of Correction, CMS-2567 Form in the spaces provided and return the originals to this office.
Your Plan of Correction (PoC) for the deficiencies must be submitted by **December 10, 2018**. Failure to submit an acceptable PoC by **December 10, 2018**, may result in the imposition of civil monetary penalties by **January 1, 2019**.

Your PoC must contain the following:

- What corrective action(s) will be accomplished for those residents found to have been affected by the deficient practice;
- How you will identify other residents having the potential to be affected by the same deficient practice and what corrective action(s) will be taken;
- What measures will be put into place or what systemic changes you will make to ensure that the deficient practice does not recur;
- How the corrective action(s) will be monitored to ensure the deficient practice will not recur, i.e., what quality assurance program will be put into place; and,
- Include dates when corrective action will be completed.
- The administrator must sign and date the first page of both the federal survey report, Form CMS-2567. If a State Form was issued as well, it should also be signed, dated and returned.

All references to federal regulatory requirements contained in this letter are found in Title 42, Code of Federal Regulations.

Remedies may be recommended for imposition by the Centers for Medicare and Medicaid Services (CMS) if your facility has failed to achieve substantial compliance by **December 19, 2018**, (Opportunity to Correct). Informal dispute resolution of the cited deficiencies will not delay the imposition of the enforcement actions recommended (or revised, as appropriate) on . A change in the seriousness of the deficiencies on **January 11, 2019**, may result in a change in the remedy.

The remedy, which will be recommended if substantial compliance has not been achieved by **December 19, 2018**, includes the following:

- Denial of payment for new admissions effective **February 14, 2019**.
  
  42 CFR §488.417(a)

If you do not achieve substantial compliance within three (3) months after the last day of the survey identifying noncompliance, the CMS Regional Office and/or State Medicaid Agency must deny payments for new admissions.
We must recommend to the CMS Regional Office and/or State Medicaid Agency that your provider agreement be terminated on **May 14, 2019**, if substantial compliance is not achieved by that time.

**Please note that this notice does not constitute formal notice of imposition of alternative remedies or termination of your provider agreement. Should the Centers for Medicare & Medicaid Services determine that termination or any other remedy is warranted, it will provide you with a separate formal notification of that determination.**

If you believe these deficiencies have been corrected, you may contact Nate Elkins, Supervisor, Facility Fire Safety and Construction, Bureau of Facility Standards, 3232 Elder Street, PO Box 83720, Boise, ID 83720-0009, Phone #: (208) 334-6626, option 3; Fax #: (208) 364-1888, with your written credible allegation of compliance. If you choose and so indicate, the PoC may constitute your allegation of compliance. We may accept the written allegation of compliance and presume compliance until substantiated by a revisit or other means. In such a case, neither the CMS Regional Office nor the State Medicaid Agency will impose the previously recommended remedy, if appropriate.

If, upon the subsequent revisit, your facility has not achieved substantial compliance, we will recommend that the remedies previously mentioned in this letter be imposed by the CMS Regional Office or the State Medicaid Agency beginning on **November 14, 2018**, and continue until substantial compliance is achieved. Additionally, the CMS Regional Office or State Medicaid Agency may impose a revised remedy(ies), based on changes in the seriousness of the non-compliance at the time of the revisit, if appropriate.

In accordance with 42 CFR §488.331, you have one opportunity to question cited deficiencies through an informal dispute resolution process. To be given such an opportunity, you are required to send your written request and all required information as directed in Informational Letter #2001-10. Informational Letter #2001-10 can also be found on the Internet at:

Go to the middle of the page to Information Letters section and click on State and select the following:

BFS Letters (06/30/11)

2001-10 Long Term Care Informal Dispute Resolution Process
2001-10 IDR Request Form
This request must be received by **December 10, 2018**. If your request for informal dispute resolution is received after **December 10, 2018**, the request will not be granted. An incomplete informal dispute resolution process will not delay the effective date of any enforcement action.

Thank you for the courtesies extended to us during the survey. If you have any questions, please contact us at (208) 334-6626, option 3.

Sincerely,

Nate Elkins, Supervisor
Facility Fire Safety and Construction

<td>The facility is a two story Type II (111) completed in 1985. It underwent a complete renovation in 2009. The facility is equipped with an emergency backup diesel-fired generator and is located in a municipal fire district, with additional county and state EMS services available. There is a two-hour fire separation between the nursing facility and the retirement center apartments. The fire alarm system was upgraded in 2009 with addressable smoke detection throughout the building. The fire sprinkler system was upgraded in 2009 with quick response heads throughout the facility. The facility is currently licensed for 120 SNF/NF beds with a census of 85 on the date of the survey. The following deficiencies were cited during the initial Emergency Preparedness Survey conducted on November 13 and 14, 2018. The facility was surveyed under the Emergency Preparedness Rule established by CMS, in accordance with 42 CFR 483.73. The Survey was conducted by: Sam Burbank Health Facility Surveyor Facility Fire Safety and Construction</td>

This Plan of Correction is submitted as required under State and Federal regulations and statutes applicable to long-term providers. The Plan of Correction does not constitute an admission of liability on the part of the facility, and such liability is specifically denied. The submission of this plan of Correction does not constitute agreement by the facility that the surveyors findings and/or conclusions constitute a deficiency or that the scope and severity of the deficiencies cited are correctly applied.

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

**Street Address, City, State, Zip Code:** 1140 North Allumbaugh Street, Boise, ID 83704

### Summary Statement of Deficiencies

**E 006** Continued from page 1

### Measures:

- The facility program will include all elements in the requirement.
- This includes the relevant Geographic and community identified risks.

### Corrective Action:

- Maintenance supervisor or designee will continue to attend community Emergency Preparedness meetings and report at the monthly QAPI meeting.

---

*For LTC facilities at §483.73(a)(1):* (1) Be based on and include a documented, facility-based and community-based risk assessment, utilizing an all-hazards approach, including missing residents.

*For ICF/IIDs at §483.475(a)(1):* (1) Be based on and include a documented, facility-based and community-based risk assessment, utilizing an all-hazards approach, including missing clients.

(2) Include strategies for addressing emergency events identified by the risk assessment.

* For Hospices at §418.113(a)(2):* (2) Include strategies for addressing emergency events identified by the risk assessment, including the management of the consequences of power failures, natural disasters, and other emergencies that would affect the hospice's ability to provide care.

This REQUIREMENT is not met as evidenced by:

- Based on record review and interview, it was determined the facility failed to develop an EP plan that included a geographically relevant, facility based and community based risk assessment. Failure to provide a relevant facility and community based risk assessment, has the potential to focus staff training and resources on hazards that are not consistent with the facility location. This deficient practice affected 85 residents, staff and visitors on the date of the survey.

Findings include:

- On 11/13/18 from 8:45 AM - 4:00 PM, review of the provided emergency plan, policies and procedures, revealed the facility HVA (Hazard ID)

---

### Other Residents:

- Other residents being admitted before the revision of the program have the potential to be affected.

The emergency preparedness program has been updated to contain and integrate the community based risk assessment.

- Based on record review and interview, it was determined the facility failed to develop an EP plan that included a geographically relevant, facility based and community based risk assessment. Failure to provide a relevant facility and community based risk assessment, has the potential to focus staff training and resources on hazards that are not consistent with the facility location. This deficient practice affected 85 residents, staff and visitors on the date of the survey.

Findings include:

- On 11/13/18 from 8:45 AM - 4:00 PM, review of the provided emergency plan, policies and procedures, revealed the facility HVA (Hazard ID)

The policies and procedures must be reviewed and updated at least annually. These emergencies include, but are not limited to, fire, equipment or power failures, care-related emergencies, water supply interruption, and natural disasters likely to occur in the facility's geographic area.

This REQUIREMENT is not met as evidenced by:

Based on record review, the facility failed to ensure policies and procedures were aligned with a community-based and facility-based HVA. Failure to develop policies based on relevant facility and community based risks, has the potential to confuse staff and result in irrelevant training on hazards that are not consistent with the facility location. This deficient practice affected 85 residents, staff and visitors on the date of the survey.

Findings include:

On 11/13/18 from 8:45 AM - 4:00 PM, review of the provided emergency plan, policies and procedures, revealed the facility HVA (Hazard Vulnerability Analysis) did not have relevant information from the county all-hazard mitigation plan developed in 2017, such as earthquakes or tornadoes, however policies and procedures did...

## Statement of Deficiencies and Plan of Correction

### Provider/Supplier/CUA Identification Number:

135098

### Multiple Construction

A. Building: ____________________________

B. Wing: ____________________________

### Statement of Deficiencies

This REQUIREMENT is not met as evidenced by:

Based on record review, the facility failed to ensure current contact information for emergency management officials and other resources of assistance was provided in the emergency communication plan. Failure to provide information for resources available to the facility has the potential to hinder facility response and continuity of care for the 85 residents, staff and visitors in the facility on the date of the survey.

**Findings include:**

On 11/13/18 from 8:45 AM - 4:00 PM, review of the provided EOP, revealed the failed to include contact information for emergency officials as follows:

- No phone number for the State Licensing and Certification agency.
- No phone number for the State Long Term Care Ombudsman.

**Reference:**

42 CFR 483.73 (c) (2)

### Corrective Actions:

- The emergency plan has been updated to include the phone numbers of the State Licensing and Certification and State Long Term Ombudsman.

**Corrective Actions:**

The emergency plan will be reviewed at the safety meeting. Maintenance Supervisor will report changes or updates at monthly QAPI meeting.

### Provider's Plan of Correction

The phone numbers for the State Licensing and Certification and State Long Term Ombudsman have been added to the facility emergency plan.

**Measures:**

- The emergency plan has been updated to include the phone numbers of the State Licensing and Certification and State Long Term Ombudsman.

**Corrective Actions:**

- The emergency plan will be reviewed at the safety meeting. Maintenance Supervisor will report changes or updates at monthly QAPI meeting.

### Summary Statement of Deficiencies

Each deficiency must be preceded by full regulatory or LSC identifying information:

- **E 041** Continued From page 7
  - Hospital CAH and LTC Emergency Power
  - CFR(s): 483.73(e)

  (e) Emergency and standby power systems. The hospital must implement emergency and standby power systems based on the emergency plan set forth in paragraph (a) of this section and in the policies and procedures plan set forth in paragraphs (b)(1)(i) and (ii) of this section.

  §483.73(e), §485.625(e)

  (e) Emergency and standby power systems. The LTC facility and the CAH must implement emergency and standby power systems based on the emergency plan set forth in paragraph (a) of this section.

  §482.15(e)(1), §483.73(e)(1), §485.625(e)(1)

  Emergency generator location. The generator must be located in accordance with the location requirements found in the Health Care Facilities Code (NFPA 99 and Tentative Interim Amendments TIA 12-2, TIA 12-3, TIA 12-4, TIA 12-5, and TIA 12-6). Life Safety Code (NFPA 101 and Tentative Interim Amendments TIA 12-1, TIA 12-2, TIA 12-3, and TIA 12-4), and NFPA 110, when a new structure is built or when an existing structure or building is renovated.

  482.15(e)(2), §483.73(e)(2), §485.625(e)(2)

  Emergency generator inspection and testing. The [hospital, CAH and LTC facility] must implement the emergency power system inspection, testing, and maintenance requirements found in the Health Care Facilities Code, NFPA 110, and Life Safety Code.

  482.15(e)(3), §483.73(e)(3), §485.625(e)(3)

  Emergency generator fuel. [Hospitals, CAHs and LTC facilities] that maintain an onsite fuel source

### Provider's Plan of Correction

- **E 041**
  - Residents:
    - Monthly testing and documentation of load places on the system.
    - This will include the AMP draw.
  - Other Residents:
    - Residents residing in the facility had the potential to be affected by this issue.
    - Monthly testing and documentation of load places on the system.
    - This will include the AMP draw.
  - Measures:
    - Documentation of generator testing including AMP draw to be added to the monthly preventative maintenance checklist.
  - Corrective Actions:
    - Maintenance will report compliance at the monthly QAPI meetings.
