

Good Morning Tamara,

I am unsure where this needs to go, but I am aware that the pharmacy and therapeutics are meeting today to discuss the medications for the Idaho Medicaid pharmacy benefits.

I would like to see Spravato be approved for our moderate to severe depression patients who have failed conventional medications. I have multiple patients which this would benefit from. It has shown efficacy and improvement in peoples depression and could prevent many hospitalizations and possibly the costs of Electro-convulsive therapy which has significant side effects associated with it.

Thanks for your assistance.
