TO: BPA PROVIDER NETWORK
FROM: MICHAEL BARTLETT
ATR Project Coordinator
SUBJECT: Adolescent SSH Required RSS

This is just a reminder to all ATR Adolescent SSH providers that both drug testing and case management are required recovery support services to be delivered to all clients in ATR SSH. Per the DHW Adolescent Staffed Safe and Sober Housing Rules and Standards sections 1e and 4f respectively:

Case management is a required recovery support service that facilities providing Adolescent Staffed Safe and Sober Housing must either provide or arrange to be delivered by another agency that is a state approved SUD case management provider and a contracted BPA ATR network provider.

Clients must be drug tested at least 1x week which can be billed through ATR Funding. Drug testing must be conducted by a state approved SUD facility. Clients may be subject to searches when returning to the facility as well as random room checks.

If you have any questions or concerns regarding these requirements please feel free to contact me.
