MEDICAID INFORMATION RELEASE MA12-21

To: All Hospital and Physician Providers

From: Paul J. Leary, Administrator

Subject: Revenue codes 0510, 0456, 0760, and 0761

Effective for dates of service on or after January 1, 2013, hospital providers will be allowed to bill facility expenses related to hospital owned outpatient clinic charges using revenue code 0510 with the corresponding CPT service code. This charge represents the room, hospital personnel, and overhead costs of the facility and can be used if the following criteria are met:

- The visit must take place in hospital owned space.
- A hospital employee must render a Medicaid service (i.e., chart medical complaint, vitals, assessment).
- The medical record must be retained by the hospital doing the billing.
- Documentation in the record supports the medical necessity for the medical service.

If the facility does not meet the criteria outlined above, a charge for revenue code 0510 cannot be billed to Medicaid.

The above information should be discussed with visiting physicians and/or hospital employed physicians. The physicians should bill their professional component to Medicaid on the CMS HCFA 1500, with the appropriate site of service indicator 22 (outpatient hospital). The physician claims will be subject to a 30% reduction of the physician fee schedule.

The HCPC/CPT code should reflect the service provided. For example, if a physician visit occurred, 99201-99215, would be billable. The charge billed on the UB04 represents the room and personnel. If the patient receives other services, bill the services under the appropriate revenue code with the corresponding HCPC/CPT.

Services provided by a hospital employed nurse should not be billed as described above. Services provided by the hospital employed nurse should have the entire charge billed on the UB04. Ancillary services, such as lab or injections administered by a nurse, are also billed in full on a UB04.
