Notes

- Pregnancies include live births, stillbirths, and induced abortions. Since miscarriages are not reportable, they are not included.
 - Pregnancy rate: number of pregnancies per 1,000 females in corresponding age group.
 - Live birth rate: number of live births per 1,000 females in corresponding age group.
 - Estimated miscarriages (rounded) based on assumption that 1 in 5 pregnancies ends in miscarriage.
 - Number of teens that became pregnant based on number of first-born live births and stillbirths and total induced abortions to teens in 2015.
 - Initiation of prenatal care is based on date of first care visit and length of gestation. Beginning in 2014, length of gestation was changed to be based on the obstetric estimate (OE) for completed weeks gestation. Prior to 2014, length of gestation was based on the date of last normal menses and date of infant's birth.
 - Out-of-wedlock percentage: number of out-of-wedlock live births per 100 live births in corresponding age group.
 - Payment for delivery based on birth records with known payment type. Payment source for delivery may change after the birth certificate is filed with the state.
- Rates are based on the population estimates from the Vintage postcensal series, prepared by the National Center for Health Statistics under a collaborative arrangement with the U.S. Census Bureau, Internet release dates June 26, 2014, June 30, 2015, and June 28, 2016.
