

# CHILDREN'S DD PROGRAM ENHANCEMENT TRAINING

**For independent providers of Children's DD  
intervention services in Idaho.**

The Children's DD team will be providing trainings throughout the state in June to educate independent providers on the needed information to provide intervention services.

## **IMPORTANT - PLEASE NOTE**

There will be two trainings in each hub. The meetings listed first are for individuals who have not attended a previous training or who would like to go through the initial training again. This training will be a complete overview of the Intervention Rules (16.03.09 Rules) and associated processes, case management, a review of forms and documents, and the enrollment process to become an independent provider.

Meetings listed second are for individuals who have attended a previous training. This meeting will cover a comprehensive look at the Assessment and Clinical Treatment Plan, Program Implementation Plans and Q&A.

We look forward to continued collaboration as we work towards the July 1<sup>st</sup> implementation date.
