MEASURE DESCRIPTION:

#632 - WELL CHILD VISITS AGE 3 TO 6 YEARS MEDICAID CHILD indicates the percentage of children, aged 3 to 6 years, who received one or more well-child visits with a primary care practitioner (PCP) during the measurement year.

This rule is based on the CMS Core Set of Children's Health Care Quality Measures for Medicaid, Measure W34-CH, June 2016, HEDIS measure Well-Child Visits in the Third, Fourth, Fifth and Sixth Years of Life (W34), and NQF measure #1516.

PROPRIETARY STATUS: This measure is owned by NCQA [NQF-Endorsed™].

DEVIATIONS from Medicaid criteria:
1. HEDIS specifies that Utilization measures should utilize suspended, pending, and denied claims as well as paid claims. Only paid claims are utilized in our rule measure calculations.
2. For the data collection timeframe of 2015, Medicaid specifies that measures should be calculated using ICD-10 codes for claims with a date of service or date of discharge on or after October 1, 2015. The rules engine has no way to eliminate ICD-9 codes from a measure calculation if they are included on a claim following the October 1, 2015 date. The impact of this on rule results will depend on the extent to which incorrect codes appear on submitted claims.
