

IDAHO DEPARTMENT OF
HEALTH & WELFARE
DIVISION OF BEHAVIORAL HEALTH

Idaho's Behavioral Health Crisis System Presents:

August 25, 9:00am - 3:30pm
Virtual Conference

Behavioral Health Crisis System Conference

Building an Air Traffic Control (ATC) Crisis System

About

The Behavioral Health Crisis System Conference focuses on the ATC Model for Crisis Services. The model is considered to be part of a whole, integrated crisis system of care. This model leverages the methods used in air traffic control to provide a framework for all levels of crisis services. It provides a hub for effective deployment of mobile crisis and ensures there is access to facility services like crisis stabilization and crisis respite.

The conference features award-winning speakers with behavioral health crisis service system expertise. They will provide information on the ATC Model and how to develop and implement it in a crisis system of care.

Come learn, ask questions, and discuss ideas with these experts!

Featured Speakers

David Covington, LPC, MBA — Keynote

Mr. Covington serves as Chief Executive Officer and President of RI International (formerly Recovery Innovations), is a partner in Behavioral Health Link, is the co-founder of CrisisTech 360, and leads the international initiatives "Zero Suicide," "Crisis Now" and "Peer 2.0." He has served on numerous committees and task forces on clinical care and crisis services, including the National Council for Behavioral Health Board of Directors.

Dr. Michael Hogan

Dr. Hogan served as New York State Commissioner of Mental Health from 2007-2012, and now operates a consulting practice in health and behavioral health care. He has served as a member of the National Action Alliance for Suicide Prevention since it was created in 2010, co-chairing task forces on clinical care and interventions and crisis care.

Kappy Madenwald, MSW, LISW-S

Ms. Madenwald is an independent consultant who works with federal, state and local governments, community treatment providers, and managed-care entities in building person-centered, competency-rich behavioral health crisis service systems. She offers unique expertise in the evaluation, development, implementation and/or operation of community-based crisis systems of care.
