

1. manufacturers or their representatives.

Clinical experience, either from a provider or a Medicaid participant

- a. Clinical experience information is available to the Committee through letters received by the Committee and/or by oral testimony given during the public comment period of the P&T meeting. Providers and participants will not be restricted from relating clinical experience, other than the time constraints needed to accommodate speakers during the 60-minute public comment period.
- b. Written submissions should be submitted to a designated Medicaid representative (currently Tami Eide):

**Idaho Medicaid  
Pharmacy & Therapeutics Committee  
Attention: Tami Eide, Pharm.D.  
3232 Elder Street  
Boise, Idaho 83705**

[Tamara.Eide@dhw.idaho.gov](mailto:Tamara.Eide@dhw.idaho.gov)

- c. Written comments can be received at any time but must be received 7 days prior to the meeting if they are to be presented to the P&T members for review prior to the meeting. Written comment by an individual or group must disclose the commentator's employment, and must also disclose whether or not the commentator or group receives compensation, gratuities or grants from or has an affiliation with any drug manufacturer or related group. Individuals writing on their own behalf should designate their correspondence as such.

Scientific information provided by pharmaceutical manufacturers or their representatives

- a. Pharmaceutical manufacturer scientists or representatives must submit in writing any proposed testimony to be considered for review by the P&T Committee Membership.
- b. Pharmaceutical manufacturer representatives who wish to submit scientific information should review the information already available to Committee members. This information is publicly available on the Idaho Medicaid P&T website [www.medicaidpharmacy.idaho.gov](http://www.medicaidpharmacy.idaho.gov). Pharmaceutical representatives may submit scientific information not already available to Committee members through Provider Synergies, the Drug Effectiveness Review Project (DERP) and/or other standard drug information sources. Submitted information is most useful if reviewed in conjunction with drug class reviews that Committee members are already studying. Submission of scientific information, therefore, is required to be submitted to the Idaho Medicaid Pharmacy Unit in writing at least 15 business days prior to the meeting so that if approved, it can be carefully considered by Committee members prior to the meeting.
- c. There may be times when scientific information may become available less than 15 business days prior to the meeting. In such cases, special requests may be made to the Medicaid Pharmacy Unit for submission to the P&T Chairman for approval or rejection.

- d. All scientific information submitted will be restricted to new information only. New information is considered to be: (1) New study results published since the last review that meet good evidence requirements of randomized double-blind active control studies. Placebo controlled, observational, open-label and non-randomized studies are not accepted for consideration. Studies must have been published or accepted for publication in a peer-review journal. Online publications and poster presentations will not be considered. (2) New product or new indication information not included in the Provider Synergies' Therapeutics Class Reviews or the DERP Reviews posted on the P&T Website.
- e. All scientific information submitted must include a one page cover sheet of 250 words or less that summarizes the key points and directs the Committee members to the key areas of the submitted information for consideration. Page number, paragraphs and line numbers should be cited.
- f. Material submitted for review shall be limited to only new information meeting the requirements above. Product monographs and dossiers, P&T Committee briefs, extensive bibliographies, or similar inclusions will not be considered.
- g. Written submissions should be submitted to the Chairman of the P&T Committee through a designated Medicaid representative (currently Tami Eide). Written submissions may either be mailed or e-mailed.

- h. The P&T Committee chairman or his designee will review the submitted information to determine if it meets the new information guidelines noted above. The Department will then advise submitters of acceptance or rejection of the information at least 10 days prior to the meeting. If submitted information is rejected, the P&T Committee Chairman or his designee shall provide a written summary to the submitter detailing the reasons for rejection. The Department will disseminate accepted materials to P&T Committee members for review.
- i. All submitted written testimony and scientific information provided by a pharmaceutical manufacturer shall be posted to the P&T Committee website. Testimony accepted for P&T Committee review will be designated as such.
- j. A company who has submitted information accepted for review has the option of having a designated representative available at the P&T meeting to present the accepted testimony. Such testimony shall not exceed five (5) minutes including questions. Such time limitation may be extended at the discretion of the chairman.
