Subject: Jardiance [External Email]

To whom it may concern,

My name is Brett Zundel, I am a Physician Assistant. I've been in practice for 26 years, I've seen and experience the evolution of various treatment plans for diabetes. I currently work for Rocky Mountain Diabetes, the only endocrinology group in Southeastern Idaho. As we treat our patients, we have various options to help control blood sugars, my biggest concern when I treat a patient with diabetes is to prevent The risk of future cardiovascular problems. Most of our patients that have Medicaid coverage, do pose a higher risk for cardiovascular problems due to social economic status. Due to that reason, I routinely choose Jardiance as my first line of defense in preventing cardiovascular disease with my diabetic patients. It is my goal to share my option with you, to try and reinforce the importance of having a SGL T2 inhibitor on board as part of our treatment plan with all of our diabetic patients. Jardiance has proven to be effective, it is well tolerated and has given us the results that reinforces the importance of this type of medicine to be available to all patients including those with Medicaid.

Sincerely

Brett W Zundel PA-C
