Tamara,

My name is Hyrum Davenport, I am an NP in Pocatello, ID. I have used Spravato in my practice for some of my individuals that have treatment resistant depression, and have seen the effect this medication has had in their lives. I cannot tell you the change I have seen for these individuals and their disease state. I hope that Idaho Medicaid will take a good hard look at making Spravato a preferred medication. I would also recommend that access to this medication be considered so that NP's across the state can prescribe this medication for their patients who struggle each day with treatment resistant depression.

Thank you for your time.

Hyrum Davenport
